

7/2/2013

Dear Ms. Murray,

I sincerely hope that the NH SEC decides not to rehear your decision regarding the wind-energy project proposed by Antrim Wind/Eolian Renewable Energy. Your original decision, so well deliberated and thought out, was a good one for the community. Please do not abandon it.

Furthermore, Eolian does not present itself honestly. One of its press releases states that Eolian is "leading the way in responsible, renewable energy development across New England." How can it be a leader when it has *never* completed a project anywhere? Under the name Seneca Mountain Wind, Eolian has also invaded the Northeast Kingdom in Vermont in an aggressive, deceitful manner. They refuse to accept that "no" votes in Brighton and Newark mean "no," as they keep pushing these towns as well as Ferdinand with proposed MET towers. One of its lessors has sued the Town of Newark because of its very strong stand against the proposed project. Eolian was denied a project in Maine and later sued the town.

In summary, this company is neither responsible nor a leader.

Thank you for your consideration.

Sincerely,

Cynthia Barber
Newark, VT
