Re: Phase IB End-of-Field Letter Review for a Wind Project in Berlin, NH: *Jericho Mountain Wind Project Archaeological Phase IB Field Letter Report*. Prepared by Northeast Archaeology Research Center, Inc.

Dear Mr. Young:

The Division of Historical Resources (Division) is in receipt of a request for review for the Phase IB End-of-Field Letter cited above prepared and submitted by Gemma-Jayne Hudgell of Northeast Archaeology Research Center, Inc. The Division concurs with the recommendations provided and looks forward to review of the final report.

Based upon the information provided in the above cited End-of-Field Letter, it has been determined that there are no known properties of archaeological significance within the area of the undertaking's potential impact and no further identification or evaluative studies are recommended.

If any archeological resources are discovered or affected as a result of project planning or implementation, the Division is to be consulted on the need for appropriate evaluative studies, determinations of National Register eligibility, and mitigative measures (redesign, resource protection, or data recovery) as required by federal law and regulations. Also, as plans change consultation with the Division will be required.

Sincerely,

Richard Boisvert, State Archaeologist  
Deputy State Historic Preservation Officer
