Subject: Wild Meadows Wind Power Project Moratorium

Hello I am writing concerning the proposed Wild Meadows Wind Power Project. I would request at least a 1 year moratorium until more study can be done into the economic, environmental and health issues at stake here. Considering the current state of our economy handing out tax credits to a foreign corporation does not seem to be a fiscally sound idea. The fact that we are a net exporter of power also does not support the concept of putting these giant towers on the most visible hillside of one of New Hampshire's greatest treasures. Please consider a moratorium.

Thank You
