Subject: Newfound Lake Wind Project

I am writing to state my opposition to the proposed wind turbine project at Newfound Lake, NH. As a Bridgewater homeowner, I treasure our rural town and the benefits we receive from tourism. Due to the turbines that have already been placed in the Tenney Mountain area in Groton, our region is already doing its part to support wind energy. The additional turbines will have an adverse effect on a region that needs tourism dollars very badly. Visitors will now go to other areas which will hurt my neighbors who rely on the tourism economy to earn a living. Please do what you can to stop additional wind turbines from being placed in our already overburdened area. Thank you.
