**Subject:** Quality of life.

**Importance:** High

I am a Vietnam war vet. Disabled 100%, These windmills will be off my front lawn, this will cause so much distress in my life, after being a native of NH. Do you really want a death to be your cause. This is the truth I grown to love NH, and worked so hard to make a Quality of life, that you wish to enjoy destroying mine and my family. Please consider the risk to the resident of the find state we love and live in. Now we have towns suing town in which taxes are going up for legal cost and only on that make out is the one land owner for all windmills. Town don't benefit from this. Also the ring neck hawks, bats and birds will die do to this large over powering eye soar.

Solar is the way to go.

PWD

Alexandria

You are all invited to my front lawn to see the disaster that will happen!!!!!!!!!!!!
