Subject: Wild Meadows Wind Farm is in the Wrong Place

One of the greatest tools to encouraging people to support environmental initiatives is to enhance their natural connection to nature. The beauty of Newfound Lake has imbedded the love of nature for many generations of visitors and residents of the area.

Allowing an industrial wind factory to forever scar the ridge line will erase that connection to nature for all who visit Newfound Lake in the future..

As a proponent of environmental initiatives I have to strongly oppose the Wild Meadows Wind Farm because it is being located in the wrong place and the cost of losing the natural beauty of Newfound Lake is too high.

Please oppose what should be called the *Newfound Lake Wind Factory*.

Thank you
