Subject: Wild Meadows Wind Project

To Whom It May Concern:

I am pleading on behalf of the Newfound communtiy, the well being of my family, and myself that there be strong opposition to the Wild Meadows Wind Project.

Wind engery does not reduce the cost of fossil fuels enough to justify the gross expense of erecting and maintaining a wind farm in this region. The Newfound region is extremely dependent upon the pristine environment - both visually and otherwise. The health issues of anyone within two miles of these turbines include but are not limited to: headaches, nausea, migraines, dizziness, increaae in blood pressure, bloody noses, depression, anxiety, sleep disturbances, erratic behavior in domestic pets, and many more. Reduced property values are of great concern as well. My home is less than one mile from the ten turbines planned for the ridge of Mount Forbes in Alexandria.

Iberdrola Renewables and their many counterparts are not disclosing, in truth, all the facts regarding the Wild Meadows Wind Project. What will you be thinking if this project is approved and the beautiful, pristine, Newfound region becomes a ghost town because residents are no longer healthy in their own homes, are not able to sell their homes because no one wants to live with the noise and visual pollution of wind turbines larger than the Statue of Liberty? This project will seriously affect the economy of the Lakes Region of NH because people come here to get AWAY from such visual and audible pollution.

I implore you all to act against the Wild Meadows Wind Project. To educate yourselves beyond the propaganda of those that will grossly finacially benefit from this. Please listen to the voice of the people that will have to deal with it in our every day lives.

Sincerely,  
Michelle Sanborn
