Subject: Wind project and Newfound Lake

Dear Mr Bryce,

Tourists have a choice where to spend their money. The State of NH has done well in the past encouraging tourist visits. Allowing the 24 towers for the Groton wind power project probably did not impact Newfound Lake area tourist visits that much as you can look in the other direction. Adding another 34 454 foot towers at the other side of the same lake will give you the impression you are vacationing in an industrial park. Please do whatever you can to block these wind power projects located on the ridges of mountains surrounding Newfound Lake.

Please help stop this project. Newfound Lake is still a pristine beautiful and clean lake. People come to fish, boat, swim etc. The sunsets over Cardigan mountain will be ruined by these towers.

Regards,
