

February 10, 2013

Dear *Mr. Burack,*

This letter is in response to the proposed Wild Meadow Wind Farm for Groton, Danbury,  
and Grafton

In the fall while climbing Mt. Crosby I was appalled by the view of the Groton Wind Farm on the  
mountains below. The destruction by large blasted areas for the fifty foot cement pads as well as  
roads across to each tower was devastating. These wind farms compromise forever, the beauty,  
and serenity of our mountains and Newfound Lake.

I encourage you to prevent, if possible, the building of any more wind farms in this area. The  
The pristine esthetics of these mountains and Newfound Lake are too precious to N.H. to  
be destroyed.

Thank you,

*Janice Connor*
