Dear Thomas Burack & Committee Members,

We feel that the recent haphazard parade of wind turbines is wreaking devastation to our state, besides changing our lives and the landscape and the comfort of looking to familiar mountains, mountains we thought would never change. They will harm our tourist economy and consequently all our small businesses, even those not directly connected to tourism. New Hampshire is a “town meeting” type of state, run basically by locals, one that cannot flourish without its own tiny separate but compatible self-governments.

Besides their not having enough sustained wind to be practical, we think the wind turbine permission process itself is flawed by the way it's set up and the lack of local government. This can only be corrected by legislation. We urge you to vote in favor of hb580 and hb484 on Jan. 19th at 1 PM at Representatives Hall.

We're including photos of our home with Pillsbury Mountain and Forbes Mountain behind it, where Iberdrola hopes to place 37 wind turbines. Our farm is located at 195 Lynch Rd, Hill, NH.

Very sincerely yours,

Pat & John Lynch

SCHEDULED FOR 37
WIND TURBINES

OUR FARM: 195 LYNCH RD., HILL, N.H.
