

9/26/13

To: Commissioner Thomas Burack,

I am writing to express my concern about the industrial wind turbine project proposed for my town of Danbury + surrounding towns -

I strongly feel there should be an immediate moratorium on the Wild Meadow Wind Project.

Danbury has a lot to lose and nothing to gain. These towers will ruin the natural beauty of this area and there is not much else Danbury has to offer except its "wild meadows + hills, ponds + streams."

If you have not visited the area please do come + walk + experience this beautiful place.

This project will lower our property values + raise our taxes. It's a big money maker for a big + powerful company and a few locals.

Instead of wind we need to educate our children + others to respect nature + conserve electricity + natural resources.

Our schools need to work on ^{teaching} implementing the importance of these issues!

Besides the issues I've mentioned, I've concerns about the effects on people's health and wildlife.

Wind might be a solution if used in the desert or ocean. A lot more research needs to take place.

Sincerely,

Deanna M Stiles
