Subject: Wild Meadows Wind Farm

Please stop Wild Meadows Wind Farm! This is not good for NH! I live in Alexandria and am planning to stay here for the rest of my life, but this impending project is making me second guess that. We live on the border of Cardigan Mountain State Park with plenty of beautiful land, but this project will destroy it all! As a state we are going to lose the natural beauty we have with those monstrosities they want to put up! Animals are going to lose their homes! We have several mating pairs of Bald Eagles on and around Newfound Lake that this is going to affect as well! We have worked so hard to keep Newfound Lake in the beautiful clean condition it is in and this will start a downward slope on our beautiful area! Tourism will suffer, which is the main income for a lot of us here. I don't want this for my children! They love where they live and are devastated that the animals and land will be scarred by this project! They keep asking me why, and all I can say is because people are greedy and don't truly understand the full outcome of this. We hunt for food, we grow our own food. This project will impact us significantly to the point where we may have to move.

Please stop this for the future of our state and the people who live in it!

Thank you,
Melissa Moore
