Dear Jane,

As a property owner in Alexandria NH I am opposed to the proposed Wild Meadows Wind Project with Iberdrola. The monetary and ecological "benefits" are not sufficient to overcome the negatives to the environment, the tourist tax dollars, the real estate values, the danger to wildlife and the desecration of the mountain tops.

The energy created is unequal to the destruction caused. The project in Plymouth has shown me that much of the time when wind is available, the windmills are shut down.

Please stop this project and continue to explore the data before more wind farms are built in NH.

Thank you.
