Hi Mike,

In response to your letter dated December 31<sup>st</sup> regarding completeness of the Wild Meadows wind project, I checked with our Natural Heritage Bureau and they did receive a request for a NHB datacheck regarding the presence of rare species in the project area. The request came through Chris Hernick, Horizons Engineering, and the information they requested was provided. The NHB datacheck is a required part of the process for wetlands permitting. Therefore, I believe things are set from our end. Let me know if you have any questions.

Happy New Year!

Thanks,  
Brad
