Subject: RE: Iberdola's Wild Meadows Application before the NH SEC
Importance: High

Dear Commissioner Burack –

The AMC had planned to file in the matter of Atlantic Wind, LLC's (Iberdola) filing to the NH Site Evaluation Committee for a certificate of Site and Facility for their proposed Wild Meadows Wind Project as submitted Dec 12, 2013 (SEC Docket No. 2013-02). When AMC's commenced to prepare its filing on the completeness of the Application, we were not able to access the Application at the NH SEC web site, as was possible earlier. It is my understanding in conversations with Tim Drew today that the Application has been temporarily removed from the website because a portion of the Application contained sensitive and confidential information that is not legally permitted to be publicized and was in the process of being removed.

The current unavailability of the public record disadvantages AMC in timely preparing its filing on the completeness of the Application, understanding that the NH SEC is supposed to determine completeness of Application within 30 days after receipt of the Application. As a remedy AMC requests that the date of the NH SEC determining completeness of Application be extended 3-5 business days following the re-posting of the Application on the NH SEC web site. This would reasonably permit parties to timely file on the completeness of the record with full access to the Application and record as filed by all parties.

If the removal of the Docket filings from the SEC involved not only redactions but also changes in the Application itself, AMC would also appreciate being notified immediately as to what changes in the Application had occurred.

In advance AMC appreciates your rapid consideration of this matter.

Sincerely, Kenneth Kimball
