Re: Docket 2013-02-Wild Meadows Wind Project

Dear Ms. Murray:

A registered voter and resident of Danbury, NH., I am writing to voice my OPPOSITION to the Wild Meadows Wind Project.

I moved here from the Metropolitan DC area in 2006, and now live in a house we built on 5 acres after scouring the state for the perfect rural location.

I am concerned that the public is being duped by half-truths and statistics, presented by a large corporation -- which have no real foundation.

And that if all that doesn't work then financial inducements (PILOT PROGRAMS) are used as final weapon to convince a poorly informed public that they really would like a wind turbine or two in their backyard.

However, as evidenced by a vote of the Danbury townspeople, who overwhelmingly chose to OPPOSE said project, I am encouraged that the public is indeed informed and has loudly expressed their feelings based on FACT.

I am urging your legislative committee to do that which is right for the people of targeted communities -- and not allow the Wild Meadows Project.

Sincerely,

Deborah Aylward
