Subject: Wind Turbines around Newfound Lake

Greetings: I have a quick inquiring regarding the wind farm proposal on the west side of Newfound Lake. If there is so much opposition to this proposal by the locals as can be seen by the signs and the comments in the local newspapers and local town meetings, why is it still being proposed? Do the people here have any say in this? What is the positive side for the locals? I know what the negative aspects are but have heard nothing to balance the equation. Is there anyone in Concord on the SEC that is representing our interests? I would appreciate your response to my concerns. Thank you in advance. Don Estes
