Lance Masi: Wild Meadows Project

Sent from Windows Mail

Please can't you people look beyond short term money and do what is best for our state. We are number 3 in the country for electrical rates, yet produce more than we need. Now you are willing to produce more under another states energy credits. Whats up with that? Lets concern ourselves with our future , not any other states, and let US decide on energy projects, not corporations that are gonna chew and screw. This isn't your state, its OURS. You are there to work for us, not you. Get it? Please do the right thing.

Sincerely, Lance Masi

12 Patten rd. Alexandria, N.H. 03222
