Bruce Cummings <bhcummings1@gmail.com>

I am writing in support of HB 580.

As a resident of Bridgewater I am horrified and bewildered at the thought of so-called Wind Energy destroying New Hampshire's Lakes Region. It only makes sense to sit down and resolve what exactly the state is attempting to achieve as we step into approving permits for such a visually destructive energy source for states other than our own. IF we are going to enter into further Wind projects and the SEC is going to approve them it only makes sense that the criteria is well established prior to going forward.

The thought of at least three dozen 500 foot monstrosities jutting out of the mountains of NHs Lakes Region in full view of Newfound Lake is simply unconscionable. To have Newfound Lake to be the center of the largest center of 50+ story structures between New York City and Chicago is simply outrageous.

HB 580 hopefully will slow down this craziness for more rational thought before New Hampshire enters the "bridge to nowhere" ilk.

Please support HB 580.

Thank you.
