Dear SEC,

This letter is to express my opposition to wind power. Recent SB-99 workshops have uncovered many needed improvements in the SEC process which must be in place reviewing any application. Furthermore, NH does not need the wind projects to meet its RPS goals and NH does not need the power. NH has already met our RPS goals of 25% by 2025. We should not be destroying NH's scenic ridge lines, jeopardizing our watersheds, killing birds and bats, displacing wildlife and negatively affecting our tourism to meet the energy goals of other states. In addition, current SEC guidelines are ambiguous and need to be clarified. SB-99 workshops have also identified this ambiguity. Please take this into consideration going forward.

Thank you,
Susan Ozkan
Alexandria, NH
