

27th July 2015

Attorney David Wiesner
Site Evaluation Committee
c/o Public Utilities Commission
Concord, N.H. 03301

Dear Attorney Wiesner,

I am writing to ask the Site Evaluation Committee to change the current version of the SEC rules under consideration to honor the citizens properties and values. These rules apply to all large energy projects seeking a permit in New Hampshire, whether transmission lines, pipelines, wind turbines, nuclear plants, other generating facilities, etc.

Energy companies have considerable financial, political and legal advantages. The Site Evaluation Committee's duty should first be to protect the citizens and their property, NOT large energy projects.

Sincerely,

Patricia Kellogg
