Dear Ms Murray:

RE: SEC Rulemaking docket #2014-04

(Leslie Sanderson is sending this message to you on behalf of Mr. and Mrs. Ken Sheldon. Please reply to kenneth.r.sheldon@baml.com to let the Sheldons know you have received this message.)

We are NH residents concerned with the siting of wind turbines and other view/environment destroying energy facilities. While we are generally in favor of alternative energy sources, we realize that careful, prudent consideration must be given to the public's concerns about siting of wind turbines and the like. Our concerns are economic, aesthetic and citizen based (vs corporate). The livelihood of many of our neighbors depends on historically beautiful views that NH has enjoyed. Homes that enjoy historical views would likely depreciate in value if those views are compromised. Construction and noise from wind turbines would adversely affect the quality of life of those who live near the turbines - both human and non-human.

We favor alternative energy sources that provide energy to our state rather than to other states or countries. We want any energy producer in our state to provide its product to NH residents first.

We understand that New Hampshire Wind Watch ("NHWW") will be present at the public hearing on March 4th. We agree with the concerns, issues, etc. that NHWW will bring up at the hearing. As tax-paying citizens who treasure our state's beauty and who are unable to attend the public hearing on March 4th, we are submitting our concerns to you to be read and considered by the Site Evaluation Committee.

Thank you.

Sincerely yours,

Mr. and Mrs. Kenneth R. Sheldon
