Subject: Rule Making

Dear Mr. Wiesner:

This is a quote from Candidate Maggie Hassan when running for governor of New Hampshire in 2012:

“Any proposal that they come forward with must be supported by the communities that are going to be affected. I think it is very important to take into consideration our scenic views and natural landscape because they are such valuable assets.”

She is also concerned that the Site Evaluation Committee hears what she calls “public voices” and seriously considers them.
