SEC Rulemaking Docket-2014-04

Dear Ms. Murray,

In the event the deadline for submissions on this docket is, in fact, extended.....please include this very informative link on sound/infrasound.

<http://mothersagainstwindturbines.com/category/noise-infrasound/>

The fact that Denmark has now banned any more wind "farm" installations due to "wind farm harm," should be something the SEC is familiar with less for the outcome in Denmark but more for the underlying causes and concerns which are the same worldwide, including here in NH.

Thank you.

Larry Goodman
