

NH Site Evaluation Committee

Regarding AWE Docket 2015-02

Nov 8, 2016

Public Notice from abutters, Bruce and Barbara Berwick

Abutters, Bruce and Barbara Berwick are giving public notice to AWE and the site evaluation committee that we have begun construction on a structure, located 20 ft from property line at point closest to turbine 1. This structure's planned use is to camp out with grandchildren, as well as allow neighbors who hunt to use as sleeping quarters. We have contacted Antrim's building inspector who was informed of the intent of the structure and has assured us that we have no need for a building permit for a structure of this size.

We expect that our rights to sleep in our new structure will be without noise decibels exceeding 40 decibels at night and that AWE will make whatever changes are necessary to meet the SEC requirements.

Respectfully submitted,

Barbara Berwick
