Regarding AWE Docket 2015-02

Nov 8, 2016

Objection to AWE's Proposed condition for future structures
From abutter, Barbara Berwick

The proposed conditions as written, do no more than notify people of noise and flicker levels.. As written, they have in essence taken all rights of property owners who have property within areas of high flicker and high noise levels to be assured of their rights to use of their own land for housing or other purposes. This proposal takes away land without compensation. On behalf of all abutters and on behalf of all those who live near enough to be affected by this proposal, we strongly object.

Respectfully submitted,

Barbara Berwick
