

1 STATE OF NEW HAMPSHIRE  
2 SITE EVALUATION COMMITTEE

3 April 22, 2015 - 7:00 p.m.  
4 Oyster River High School  
5 55 Coe Drive  
6 Durham, New Hampshire

7 IN RE: SEC DOCKET NO. 2015-04  
8 PUBLIC SERVICE COMPANY OF  
9 NEW HAMPSHIRE d/b/a  
10 EVERSOURCE ENERGY;  
11 Public Information Session held  
12 pursuant to RSA 162-H:10 regarding  
13 the Application for a Certificate  
14 of Site and Facility for the  
15 Construction of a New 115 kV  
16 Electrical Transmission Line  
17 from Madbury Substation to  
18 Portsmouth Substation.  
19 *(Presentation by Eversource Energy  
20 provided off the record, and  
21 followed up with on-the-record  
22 comments received from the public)*

23 PRESIDING: Hon. Kathleen McGuire (Retired)  
24 (Presiding as the Moderator)

COURT REPORTER: Steven E. Patnaude, LCR No. 52

1 NOTED AS PRESENT:  
2 Counsel for the Applicant: Barry Needleman, Esq.  
3 (McLane Graf Raulerson &  
4 Middleton)

{SEC 2015-04} [Public Information Session] {04-22-15}

1 P R O C E E D I N G

2 MS. MCGUIRE: Good evening. My name is

3 Kathleen McGuire, and I'm a retired Superior Court judge.

4 I was on the Bench for over 25 years before I recently

5 fully retired. And, I graduated from UNH, and I'm not

6 going to tell you what reunion I'm attending this June,

7 but, in any event, I just always love coming back to

8 Durham. It's one of my favorite places in the world.

9 My function tonight is to moderate this

10 public information session about the Seacoast Reliability

11 Project, which is a 13-mile 150 kilovolt electric

12 transmission line that would extend from Madbury to

13 Portsmouth. It's proposed by Public Service of New

14 Hampshire, doing business as Eversource Energy. I want to

15 thank you all very much for coming out tonight and

16 participating in this event.

17 Tonight's public information session is

18 the first step in an administrative process that's

19 required by statute, RSA Chapter 162-H. Before the

20 Seacoast Reliability Project, or any new -- any new energy

21 project, may be built, the company proposing the project

22 has to receive a Certificate of Site and Facility from the

23 New Hampshire Site Evaluation Committee, or more generally

24 known as the "SEC". The SEC is an entity formed by the

{SEC 2015-04} [Public Information Session] {04-22-15}

1 Legislature for the purpose of reviewing and authorizing  
2 proposed energy sites and facilities. The statute  
3 requires that at least 30 days before submitting an  
4 application to the Site Evaluation Committee, the utility  
5 seeking approval must hold a public information session in  
6 each county in which the project is proposed to be built.

7 This Project is proposed for Strafford  
8 and Rockingham County. So, tonight's information session  
9 is the pre-application information session in Strafford  
10 County for this Seacoast Reliability Project. A similar  
11 session will be held tomorrow night in Rockingham County.  
12 The purpose of these meetings is to provide information to  
13 the public about the proposed Project, and offer the  
14 public the opportunity to comment on the proposal.  
15 Perhaps some of you were able to speak to the engineers  
16 and other project experts who are responsible for planning  
17 and implementing this Project during the open house that  
18 was held just prior to this public information session. I  
19 believe there were 35 people here, experts from  
20 Eversource, here to answer your questions.

21 After I've completed my introduction,  
22 Eversource will present a short video that gives an  
23 overview of the Project. You will then be given the  
24 opportunity to comment on the Project. You may do so  
{SEC 2015-04} [Public Information Session] {04-22-15}

1 to your comments, you will have the opportunity to do so  
2 at that time.

3 Tonight's meeting is not a  
4 question-and-answer session. Rather, it's an opportunity  
5 to provide the public with information about the Project,  
6 and to receive initial comments, before Eversource submits  
7 its Application to the Site Evaluation Committee.

8 As I've said previously, this is the  
9 beginning of a lengthy administrative process. The  
10 statute requires at least two more sets of public  
11 information sessions. Once Eversource files its  
12 Application, the SEC has 60 days to determine whether to  
13 accept it. Within 45 days after the Application is  
14 accepted, a second set of public information sessions will  
15 be held. They will be much the same as this one, except  
16 that the moderator will be either the Presiding Officer of  
17 the Site Evaluation Committee or his designee. The SEC  
18 may hold additional information sessions as it deems  
19 reasonable to inform the public. The third set occurs  
20 within 90 days after the Site Evaluation Committee accepts  
21 the Application. The SEC and other state agencies will  
22 hold hearings about the Application and any other permits  
23 that the Project is seeking to acquire.

24 In the past, these hearings involved the  
{SEC 2015-04} [Public Information Session] {04-22-15}

1 orally, by signing up at the kiosk back there that has  
2 comments on it. If you haven't already signed up to  
3 speak, please do so by seeing Deb Mercier, who's back  
4 there at the kiosk. You also can -- and she'll add you to  
5 the list, and I'll call you up to speak in the order that  
6 you signed up. You can also have written comments, and  
7 those, too, will be included with the Application.

8 The statute requires that tonight's  
9 session be recorded, which is why a stenographer, Steve  
10 Patnaude, is here. He's taking down everything that is  
11 said. A transcript of tonight's proceeding will be made  
12 and included in Eversource's Application to the SEC. Your  
13 written comments, as I've said previously, will also be  
14 included in the Application. Because tonight's session is  
15 being recorded, it's very important that it be conducted  
16 in an orderly manner. Only one person may speak at a  
17 time, and you're going to have to speak slowly so that Mr.  
18 Patnaude, he's very good at what he does, but still, so  
19 that he can get down everything that everybody says.

20 Please be sure to direct your comments  
21 to me, and not to each other. To ensure that everyone has  
22 an opportunity to speak, your comments will be limited to  
23 three minutes. After everyone gets an opportunity to  
24 speak, if you would like to complete your comments or add  
{SEC 2015-04} [Public Information Session] {04-22-15}

1 applicant presenting information about the project, the  
2 SEC and state agencies asking the applicant questions  
3 about the project, the public making comments, and the SEC  
4 moderating a question-and-answer session about the project  
5 by the public.

6 The last part of the administrative  
7 process occurs when the SEC holds a public adjudicative  
8 hearing, at which it considers evidence and decides  
9 whether or not to issue a certificate authorizing  
10 Eversource to proceed with the proposed Project. These  
11 hearings typically occur eight months or more after the  
12 application is accepted.

13 Again, thank you for participating in  
14 this initial step in the SEC siting process for the  
15 Seacoast Reliability Project. The video presenting  
16 information about the Project will now be shown, and after  
17 that we'll begin taking your comments.

18 *(Whereupon a video presentation was  
19 shown to the members of the public.)*

20 MS. MCGUIRE: All right. We're going to  
21 begin taking public comments now. And, Marjorie Smith has  
22 signed up first. Good evening.

23 REP. SMITH: Good evening, Judge  
24 McGuire. My name is Marjorie Smith, and I represent  
{SEC 2015-04} [Public Information Session] {04-22-15}

1 Durham and Madbury in the New Hampshire Legislature. I  
2 thank you very much for being here. Knowing of your  
3 professional record, I'm pleased to have someone of your  
4 stature moderating this meeting. And, sorry only that  
5 this format does not really permit a question-and-answer  
6 exchange, which might go a long way to ease some of the  
7 concerns of those of us who live here.

8 I also want to take this opportunity to  
9 thank Eversource. Because, after some intensive  
10 discussion, and some resistance, not electric, but public  
11 relations resistance, Eversource did, in fact, agree to  
12 let this evening be taped by DCAT, our local community  
13 access television, to make it possible for everyone in the  
14 community to follow what's going on.

15 I do not want to make a statement. I  
16 won't presume to say that I know enough to be able to make  
17 a statement. But I do have a number of questions. And, I  
18 would like to get those questions on the record in order  
19 to have people understand some of the concerns.

20 The first question has to do with  
21 reliability. And, I was pleased to see that Eversource  
22 considers reliability to be very important. Much of the  
23 research that has been done about reliability,  
24 particularly with our climate, is that underground --  
{SEC 2015-04} [Public Information Session] {04-22-15}

1 to live with now. And, I hoped that Eversource will  
2 recognize that, although we are not necessarily a  
3 high-rent neighborhood, as might be seen on the Newington  
4 side, that nonetheless we, at the University, and at the  
5 Town, would hope that Eversource would recognize the  
6 importance of burying these lines. Thank you very much.

7 MS. MCGUIRE: Thank you. Kenny Rotner.

8 And, Mr. Rotner, I understand that you want to speak in  
9 two capacities; in your individual capacity and as a  
10 councilor for the Town of Durham?

11 MR. ROTNER: That's correct.

12 MS. MCGUIRE: Okay.

13 MR. ROTNER: My name is Kenny Rotner.  
14 I'm a Durham resident. I'm also a representative on our  
15 Town Council.

16 MS. MCGUIRE: And, that's R-o-t-n-e-r,  
17 correct?

18 MR. ROTNER: That's correct.

19 MS. MCGUIRE: Yes. Okay.

20 MR. ROTNER: And, at our Town Council  
21 meeting this past Monday, on April 20th, there was a  
22 discussion about this matter, and the Council unanimously  
23 -- unanimously, 9 to zero, voted to have this statement  
24 read. And, I'll read that statement: "We highly value  
{SEC 2015-04} [Public Information Session] {04-22-15}

1 placing the wires underground means that we do not have to  
2 worry about trees falling onto the wires, we don't have to  
3 worry about snow, we don't have to worry about ice pulling  
4 the wires down. We do know that, if one combines the  
5 long-term cost, not just the initial cost, but the  
6 long-term cost of the capital action, and then  
7 maintenance, that underground wiring is very  
8 cost-effective.

9 We also understand that Eversource is --  
10 I like to think of it as a public utility, but it really  
11 is a for-profit operation. And, obviously, they are going  
12 to make business decisions that include the ability to  
13 amortize the installation, whether above or below ground,  
14 of the towers or the tubes. But they can, as an operating  
15 cost that goes directly to the users, deal with  
16 maintenance in a very different way financially, and that  
17 is to Eversource's benefit.

18 We, in Durham and in this area, are  
19 proud of what this area looks like. And, although there  
20 are places that, you know, we know that using existing  
21 right-of-way, Eversource's own video showed the difference  
22 between the height of the tree canopy in pretty much all  
23 of the Seacoast area and a 115-foot tower. That is very  
24 different from what we have now and what we have been able  
{SEC 2015-04} [Public Information Session] {04-22-15}

1 our viewscape landscape, and strongly urge Eversource to  
2 take the community's concerns about our environment into  
3 account as they move forward with the plans for their  
4 proposed Project." So, a very simple statement.

5 MS. MCGUIRE: Uh-huh.

6 MR. ROTNER: And, then, just speaking  
7 now not for Town Council, and not speaking as a Town  
8 Councilor, speaking for myself. I would really echo the  
9 comments that were made by Marjorie Smith before me, in  
10 that I believe that our community so values the  
11 environment, we have a very scenic area that we live in.  
12 And, in the presentation, there's mention of the 115-foot  
13 replacements that are going to be for a power line, and a  
14 checkmark was written how that's the best choice for the  
15 current corridor, discounting the concept of burying  
16 wires.

17 And, I feel that our community really  
18 deserves a more detailed presentation of the analysis that  
19 transpired, that came to the conclusion that overhead  
20 wiring was preferential to burying the wires through our  
21 community. Thank you.

22 MS. MCGUIRE: Thank you. William  
23 Getchell, G-e-t-c-h-e-l-l.

24 MR. GETCHELL: Thank you, your Honor. I  
{SEC 2015-04} [Public Information Session] {04-22-15}

1 live down on the shore, and there would be several  
2 overheads basically right on top of my house. And, so, of  
3 course, I want it to go underground as well, and up and  
4 into the woods. I boundary the Nature Conservancy, which  
5 would, I'm sure, request it to be underground through that  
6 area as well.

7 And, one of the things I noticed on the  
8 little map of the -- they showed the path taken, and the  
9 cost to go underground was -- why are they not taking a  
10 more direct route? It seems like, if they went down the  
11 Spaulding Turnpike area underground, you know, it would be  
12 a much reduced distance, and then they could afford to go  
13 underground. And, it would be cheaper, possibly, in that  
14 manner.

15 They take it, they drive -- they  
16 basically run it away from their destination, and then  
17 they turn around and come back. It seems, just in order  
18 to not have to deal with getting another right-of-way,  
19 that that seems foolish to me, and expensive, and not  
20 wise.

21 So, I also would prefer to be  
22 underground with the whole thing. Thank you.

23 MS. McGUIRE: Thank you, Mr. Getchell.  
24 Bill, I don't know if this says "Hall"? Bill Heald?  
{SEC 2015-04} [Public Information Session] {04-22-15}

1 that much, until tonight, I thought it might have been 100  
2 or even 34,000. But -- so, I'm rather surprised that,  
3 when we have that line going through Dover, right through  
4 Middle Road, whatnot, right out to the river, that people  
5 aren't more aware of the fact that that is three times the  
6 voltage of this line. And, I want to thank you very much.

7 MS. McGUIRE: Thank you, Mr. Hall.  
8 Martha Fuller Clark.

9 SEN. FULLER CLARK: Thank you very much.  
10 For the record, I'm Senator Martha Fuller Clark. I  
11 represent Portsmouth, Newington, Newfields, Newmarket,  
12 Madbury, Durham, and Lee. And, I'm here tonight to  
13 comment on the fact that I think it's important that  
14 communities be given a range of choices to look at, and  
15 not be presented with just one solution to the problem of  
16 reliability.

17 And, I would hope going forward that  
18 there would be more opportunity to talk about alternatives  
19 with regard to design, placement location, alternatives  
20 with regard to the height of the towers, and also  
21 alternatives with regard to cost.

22 The question is, you know, what is the  
23 differential in terms of above ground and below ground?  
24 What is the differential in cost, if they continue to use  
{SEC 2015-04} [Public Information Session] {04-22-15}

1 Heald? Bill? Bill H.? Maybe it's -- I don't know, maybe  
2 that's not an "H". Oh, there you are.

3 MR. HALL: Oh. I thought I was going to  
4 be one of the last people to speak. I'm sorry.

5 MS. McGUIRE: Well, you might be, if  
6 more people don't sign up. Would you say your last name?

7 MR. HALL: Yes. William Hall, H-a-l-l.

8 MS. McGUIRE: Okay.

9 MR. HALL: I am disappointed to hear the  
10 stories about underground cable, because, in New  
11 Hampshire, we have ice, and that is a -- cables fail  
12 underground all the time. The other problem is, that in  
13 the nine months of winter or seven months of winter, we  
14 still haven't thawed out to a point where they can work on  
15 cables underground. If you have an underground failure,  
16 then you have to go overhead temporarily, if you're going  
17 to use the cable. So, underground is not a good solution  
18 for reliability.

19 The other thing that I wanted to comment  
20 on, for -- as much for the benefit of people here as  
21 anything else, is that, in Dover, the line going from this  
22 substation to Maine, and then down the other -- through  
23 Eliot, is a 345,000 volt line. And, I know people that  
24 live right next to it, and they -- I didn't know it was  
{SEC 2015-04} [Public Information Session] {04-22-15}

1 where they already have a right-of-way, as opposed to the  
2 proposal I recently heard about running it down the  
3 Spaulding Turnpike.

4 And, in addition to that, what options  
5 does the community have, if they wish to shoulder more of  
6 the cost, in order to have it buried underground? So, is  
7 it just a cost issue that is preventing it from being  
8 considered underground? Or, is it a technical issue that  
9 it can't be buried underground? I think those are  
10 important questions for which the communities that I  
11 represent deserve answers.

12 And, so, I would hope that there will be  
13 further consideration about alternatives. Thank you.

14 MS. McGUIRE: Okay. Thank you very  
15 much. I don't have anybody else on the list. Oops, I  
16 think I'm getting an update. Is there anybody else who  
17 would like to speak? You can get your name on the list  
18 back there. Back there, yes.

19 UNIDENTIFIED SPEAKER: Pam Schullie.

20 UNIDENTIFIED SPEAKER: Pam Schullie, the  
21 next person on the list.

22 MS. McGUIRE: Okay. Pam Schullie.

23 UNIDENTIFIED SPEAKER: How about Paul  
24 Schlie?  
{SEC 2015-04} [Public Information Session] {04-22-15}

1 MS. McGUIRE: Is that what it is?  
 2 MR. SCHLIE: That might be closer  
 3 though.  
 4 MS. McGUIRE: Okay. You signed up?  
 5 MR. SCHLIE: Yes. I think I was first  
 6 on the next list.  
 7 MS. McGUIRE: Okay. Paul, would you  
 8 spell your last name, sir?  
 9 MR. SCHLIE: Sure. S-c-h-l-i-e.  
 10 MS. McGUIRE: S-c-h-l-i-e. Okay.  
 11 MR. SCHLIE: So, I'm a landowner that  
 12 actually -- that Eversource has a limited easement over my  
 13 property which the line is proposed to be built. Being  
 14 somewhat pragmatic, I understand that infrastructure  
 15 growth needs to go somewhere. I'm not enthusiastic about  
 16 the notion of nearly doubling the size of poles on my  
 17 property. There will be an aesthetic impact. There will  
 18 be a financial impact with respect to property valuation.  
 19 At the same point in time, you know,  
 20 there are other factors I think we need to consider. But,  
 21 in my particular case, the path in which the power lines  
 22 are going to be placed -- are going to take is actually  
 23 over wetlands. There's about five acres of wetlands  
 24 behind my -- the back part of my property. So, there's  
 {SEC 2015-04} [Public Information Session] {04-22-15}

1 going to be some amount of impact. I'm hoping that, if  
 2 work does proceed, that accounting -- that there will be  
 3 some accountability with respect to maintaining drainage  
 4 in the area, mitigating the effects to the environment in  
 5 that local area.  
 6 At the same point in time, I'd like to  
 7 believe, and I believe that Eversource would be willing to  
 8 work with the landowners, to affect maybe things like pole  
 9 placement, if there are concerns with respect to heights,  
 10 maybe, you know, give consideration to that.  
 11 Personally, I'd love to see the whole  
 12 thing buried. I don't know if that's possible. Although,  
 13 I fully support that. And, I think, overall, I'd like to  
 14 believe that the Town is also going to be considering that  
 15 understanding that, even though it may have interest in  
 16 realizing more additional tax revenue from such a project,  
 17 there will also be a negative impact on the landowners in  
 18 the local vicinity of the Project. And, I think that  
 19 should also be -- have reciprocal effects to the  
 20 individuals. Thank you.  
 21 MS. McGUIRE: Okay. Thank you,  
 22 Mr. Schlie. Beth -- okay. Beth, how do you say that last  
 23 name?  
 24 MS. OLSHANSKY: Olshansky.  
 {SEC 2015-04} [Public Information Session] {04-22-15}

1 MS. McGUIRE: Okay. Would you spell  
 2 that.  
 3 MS. OLSHANSKY: O-l-s-h-a-n-s-k-y.  
 4 MS. McGUIRE: Okay. Thank you.  
 5 MS. OLSHANSKY: Here, in Durham, we're  
 6 used to having a very transparent public dialogue about  
 7 issues that matter to the community. And, I just want to  
 8 voice my concern about the amount of control and strategy  
 9 that's gone into the design of this public format, which,  
 10 of course, is required to meet the requirements. I think  
 11 many of us are feeling frustrated at the lack of actual  
 12 dialogue that's allowed to take place here tonight. And,  
 13 one comment/question I have is, when will Durham have its  
 14 questions answered?  
 15 I know that our Town Administrator has  
 16 communicated with people at Eversource, asking important  
 17 questions that are critical to the community. We haven't  
 18 seen answers to those questions. There are also people  
 19 here tonight who have questions. And, maybe you're not  
 20 allowed to ask -- answer the question of "when will we  
 21 have our questions answered?" But that is something that  
 22 I would like to know.  
 23 MS. McGUIRE: Well, as I said, there  
 24 will be several more opportunities for public input and  
 {SEC 2015-04} [Public Information Session] {04-22-15}

1 question-and-answer sessions. As I explained, this is  
 2 really the first one of these pre-application, it's a new  
 3 statutory requirement. And, it's, you know, to comply  
 4 with the statute of getting everything down. And, what  
 5 the purpose of the statute is is to give the public a  
 6 chance to comment and provide the public with information  
 7 about -- general information about the Project.  
 8 MS. OLSHANSKY: Since Eversource prides  
 9 itself in offering community -- excellent customer service  
 10 to the community, I would just hope that Eversource would,  
 11 at some point, permit a meaningful dialogue back and forth  
 12 with the community. Thank you.  
 13 MS. McGUIRE: Okay. Thank you. I'm  
 14 going to say, your penmanship is not great in Durham.  
 15 Yes. Come on, what's wrong with printing? Are you next?  
 16 MR. WELSH: Carden Welsh?  
 17 MS. McGUIRE: Yes.  
 18 MR. WELSH: Am I next?  
 19 MS. McGUIRE: Yes, you are. Would you  
 20 please spell your last name, sir.  
 21 MR. WELSH: I didn't go to catholic  
 22 school.  
 23 MS. McGUIRE: I did. I did.  
 24 MR. WELSH: My penmanship is lousy.  
 {SEC 2015-04} [Public Information Session] {04-22-15}

1 MS. McGUIRE: Yes.

2 MR. WELSH: Sorry about that.

3 MS. McGUIRE: So, W-e-l --

4 MR. WELSH: W-e-l-s-h.

5 MS. McGUIRE: Okay. Good. Thank you.

6 MR. WELSH: Yes. I'm Carden Welsh. I'm

7 a resident, I'm an abutter, and I'm on the Town Council.

8 I just wanted to say that, when I was on the Zoning Board

9 of Adjustments, one cell tower was going up, and we spent

10 45 minutes discussing how that one cell tower would impact

11 the viewscape, and whether or not we should allow it.

12 So, it's quite jarring in Durham to have

13 100 poles, up to 115 feet, all of a sudden sprung on us

14 along this way. So, these poles also, it should be noted,

15 cross almost every major road in Durham. They cross

16 Madbury, just outside of Durham, across Main Street,

17 Durham Point Road, 108, Mill Road. In fact, I think

18 you'll have trouble getting into town or out of town

19 without going under these lines. So, for a town in New

20 Hampshire to all of a sudden be surrounded by these high

21 poles, with, you know, several lines on them, is -- has a

22 major impact on the town, and what it looks like and what

23 it will feel like coming in and out.

24 So, I would like to know what  
 {SEC 2015-04} [Public Information Session] {04-22-15}

1 alternatives there are to these taller poles. Are there

2 shorter poles? Can something be put on the ground? Can

3 something be put underground?

4 And, I know, as Senator Clark has asked,

5 there are technical and financial issues associated with

6 putting the lines underground. But I would like it if

7 Durham could sort of see what those financial issues are,

8 and then have the opportunity to make a decision one way

9 or the other.

10 Especially in several places in Durham,

11 it's going to have a huge impact. For instance, going

12 over Main Street, right at the University of New

13 Hampshire, that's where a lot of parents, a lot of

14 potential people come into the town. People love UNH,

15 because it's sort of the feel of a rural university. And,

16 now, all of a sudden we're going to have these big lines

17 there. So, it would be very crucial, I think, to keep

18 them out-of-sight in major areas.

19 I've also heard that there's a -- one of

20 the alternatives that wasn't listed on the chart that had

21 the three alternatives, I understand there's an existing

22 line through Newington where at least some people who are

23 knowledgeable claim you could put an even higher voltage

24 line right in an existing corridor. So, I wonder if that  
 {SEC 2015-04} [Public Information Session] {04-22-15}

1 could also be considered. Thank you.

2 MS. McGUIRE: Thank you very much.

3 Michael --

4 MR. HOFFMAN: Hoffman.

5 MS. McGUIRE: -- Hoffman?

6 MR. HOFFMAN: Thank you.

7 MS. McGUIRE: Is that H-o-f-f-m-a-n?

8 MR. HOFFMAN: That is. That's the best

9 I can do. Sorry, your Honor. Yes. Michael Hoffman, 300

10 Durham Point Road. And, my concern is that, while the

11 state and local communities have spent many millions of

12 dollars in protecting the Great Bay estuary, we're now

13 going to potentially upset some of the sedimentation,

14 which will have a lot to do with the water quality issues

15 in the bay.

16 Also, from a scenic standpoint, having

17 these poles on both sides of the bay is pretty devastating

18 to a natural landmark and recreation area. Of course,

19 they will also be crossing the new -- the new scenic

20 by-way, which is 108 has the designation.

21 The other aspect I'd like to address and

22 concerned about is the corridor appropriateness. This

23 right-of-way is going through an area where there will be

24 virtually no future development. And, it would seem more  
 {SEC 2015-04} [Public Information Session] {04-22-15}

1 logical to send one of the alternative corridors that will

2 have future industrial uses growing, in either the

3 northern route, going through Dover and Eliot, or the

4 southern route, going through Greenland. Both of those

5 seem to be more appropriate routes to me where it could

6 serve the needs of the future.

7 MS. McGUIRE: Thank you very much, Mr.

8 Hoffman. Amanda Merrill.

9 MS. MERRILL: Thank you very much.

10 Amanda Merrill, 8 Meadow Road, Durham. First of all, I

11 just wanted to speak to some of the frustration that's

12 been voiced about the issue of getting answers to

13 questions. And, I know well the schedule of public

14 information sessions and public hearings. But I think it

15 would be valuable if we could at least consider the

16 possibility of, you know, getting answers to questions,

17 even in between those official public sessions.

18 The second thing is, I know in the

19 presentation there was reference to, you know, the issue

20 of reliability, and, therefore, what seems to be the need

21 for this transmission project. I think that it could be

22 useful for the public to have more information about the

23 role of ISO-New Hampshire -- I mean, rather, ISO-New

24 England, the regional grid management agency, in making  
 {SEC 2015-04} [Public Information Session] {04-22-15}

1 those kinds of determinations about reliability, and also  
2 in terms of potential cost allocation.

3 I know that people in Durham, and I  
4 think elsewhere, like to have as much information as  
5 possible. So, I would hope that that could be added to  
6 what's shared with the community. Thank you.

7 MS. McGUIRE: Thank you very much.  
8 Judith Sprag -- Spary? She's a representative.

9 REP. SPANG: And, that's better than  
10 "Spang".

11 MS. McGUIRE: Would you spell your last  
12 name.

13 REP. SPANG: Spang, S-p-a-n-g.

14 MS. McGUIRE: Okay.

15 REP. SPANG: And, I have -- I'm a State  
16 Representative. I have represented Durham for 17 years in  
17 the House of Representatives, and now I represent Durham  
18 and Madbury.

19 I would just like to comment, I guess  
20 some allusion has been made to this by both Senator Fuller  
21 Clark and to our past Senator Amanda Merrill just now.  
22 Durham is, as you're going to find out, a little bit  
23 different from a lot of other communities. Durham is a  
24 university community, and Durham is used to digging very  
{SEC 2015-04} [Public Information Session] {04-22-15}

1 MS. McGUIRE: Hello.

2 MS. LODER: I'm Suzanne Loder, of Oyster  
3 River Drive. I'd like to ask a question, I guess. When  
4 I've traveled in Europe, I've seen countries such as  
5 Germany, parts of Great Britain, and some of the other  
6 countries in Central Europe, I notice that many times they  
7 don't have power lines above ground. And, they experience  
8 some of the same weather conditions that we do here in New  
9 England. And, so, I'm wondering if we don't have the  
10 right engineering and technical capabilities to achieve  
11 that.

12 That's kind of a weird question, because  
13 I see that they do have the capability of putting the  
14 cables underneath Great Bay. So, I guess I would ask, you  
15 know, where's the -- it probably comes to money, and I  
16 understand that. But I think that it would be well for  
17 them to be a little more open about that, so that we can  
18 understand what we have to give up, if that's what they  
19 plan to do. And, I'm talking basically burying the  
20 cables, versus having it as an eyesore, and overwhelming  
21 the scale of our community and our natural area. Thank  
22 you.

23 MS. McGUIRE: Thank you very much.

24 Denis Hebert.  
{SEC 2015-04} [Public Information Session] {04-22-15}

1 deep in their asking -- critical questions that they ask,  
2 fundamental questions that they ask.

3 My question, and I think that others are  
4 wondering this, too, is to what extent is this Project  
5 really needed? And, will the SEC proceedings dig deep  
6 enough to see if this is indeed the only option, and if  
7 it's needed badly enough now for us to be putting money  
8 into it?

9 I think we're all very sensitive to the  
10 fact that we pay some of the highest electric rates in the  
11 country, and that it is putting a real burden on our  
12 economic development. And, we would like to make sure  
13 that we don't do anything that is going to increase the  
14 burden for our ratepayers.

15 I would also like to point out that  
16 Dudley Dudley is in the audience. And, Dudley Dudley was  
17 able to stop Aristotle Onassis from building an oil  
18 refinery here in Durham. And, I would warn Eversource  
19 about taking on Dudley Dudley, if she decides that she  
20 does not like this Project.

21 MS. McGUIRE: Okay. Thank you,  
22 Representative Spang. Suzanne Loder. And, she printed  
23 her name very clear here.

24 MS. LODER: Hello.  
{SEC 2015-04} [Public Information Session] {04-22-15}

1 MR. HEBERT: Thank you. I'm Denis  
2 Hebert, and I'm from Newington, New Hampshire. And, I was  
3 compelled to get up and speak this evening, because I was  
4 going to wait until tomorrow night, when we had a session,  
5 but there were enough questions that were being asked,  
6 especially by our Senator right here, that asked some  
7 question that I think I have the answers to.

8 There was a -- there was three  
9 alternatives for the transmission lines, but there was  
10 also a fourth alternative, which required no transmission  
11 lines, and that is a step-down transformer, which would  
12 have been placed in Newington, New Hampshire, right at the  
13 existing switchyard. The issue comes down to, and, by the  
14 way, they listed, in primary solutions, was this  
15 transmission line, and a second solution was the  
16 transformer solution.

17 The issue it comes down to is money.  
18 One project overall cost, which was not just a  
19 transmission line, but supporting projects, was  
20 \$111 million. And, that's for this transmission line that  
21 we're talking about, and all the supporting projects with  
22 it summed up to \$111 million.

23 The transformer option was \$136 million.  
24 Again, this is what was presented to the ISO-New England  
{SEC 2015-04} [Public Information Session] {04-22-15}

1 for costs, and they're the ones that tell Eversource "Go  
 2 forth and do this project". And, that's what they have  
 3 done. That's why they have chosen this particular route.  
 4 So, but let me explain to you what also  
 5 the transformer option gave us. It gave us a 210 percent  
 6 capacity above the transmission line option. Now, the  
 7 transmission line option, according to their records, and  
 8 I might be wrong on this, because I'm still trying to  
 9 understand this, was good from about ten to fifteen years  
 10 out. Now, I might be incorrect on that. But the  
 11 transformer option allowed a 210 percent capacity of what  
 12 is being offered with the transmission line, and it would  
 13 have effected nobody.  
 14 So, if you were to amortize that over 40  
 15 years of the life of this project, in other words, how  
 16 long this would last, it would be peanuts as far as  
 17 additional cost. But the problem with this is the  
 18 supporting projects where the transmission line are in is  
 19 either under construction right now or has been completed.  
 20 And, my understanding is that those would be lost costs,  
 21 because the supporting projects for both are not  
 22 interchangeable. You can't go from one and say, "well, we  
 23 did the work on this one, we can now apply it to the other  
 24 one." They don't support each other. So, the issue is,  
 {SEC 2015-04} [Public Information Session] {04-22-15}

1 design ultimately needs to incorporate an avian protection  
 2 plan that is consistent with the "best practices"  
 3 recommended by a group called "APEC" -- or, "APIC" --  
 4 "APLIC", rather, which is actually a conservation and  
 5 power industry group. And, I was actually kind of  
 6 disappointed that that was not here this evening.  
 7 My third comment is is my understanding  
 8 is that New Hampshire does not allow local power rates,  
 9 and Eversource has inferred that, if there's something  
 10 special that's required to accommodate our communities,  
 11 that those costs will be recovered locally. And, I'm here  
 12 to make the statement that I don't believe that is true.  
 13 And, if it is true, I don't believe that is fair. And,  
 14 that any additional cost should be recovered across the  
 15 state and not just in our community.  
 16 We talked about the benefits of going  
 17 aboveground versus underground. I don't know what the  
 18 best solution is or if it's a hybrid. And, I guess  
 19 Eversource and others have to worry about the cost and  
 20 feasibility. Although, frankly, I'm not as concerned  
 21 about Eversource's cost.  
 22 But I do think that there's another  
 23 element that needs to be considered there as that  
 24 information comes forward. And, that I could say pretty  
 {SEC 2015-04} [Public Information Session] {04-22-15}

1 is who would pay for those recovered costs if we did the  
 2 autotransformer option?  
 3 And, again, if I have my information  
 4 incorrect, I'd gladly be corrected by Eversource or  
 5 whoever wants to say I am incorrect. But I think that was  
 6 a good solution that is missed. It's gone by. And, it  
 7 was decided by ISO-New England. And, now, the option we  
 8 have to live with is what is presented to you this  
 9 evening.  
 10 The best thing that I can say that we  
 11 can try to do at this point is to get it underground or do  
 12 what you want as far as minimal impact, because this is  
 13 what they're going to do. Thank you very much.  
 14 MS. McGUIRE: Okay. Thank you. Jim  
 15 Lawson.  
 16 MR. LAWSON: Thank you. I have four  
 17 comments. First is, I would like to thank Mr. Hebert,  
 18 expertise that he's brought into the discussion and  
 19 comments tonight. I wish I could speak at that level, but  
 20 I can't. So, I'm going to go up from there. One of the  
 21 things that I've noticed was missing from the information  
 22 this evening was what's called an "avian protection plan".  
 23 That Great Bay is now home to an increasing population of  
 24 Bald Eagles. And, my comment is specifically that this  
 {SEC 2015-04} [Public Information Session] {04-22-15}

1 confidently that, if this Project was to go underground,  
 2 this would be by far the largest construction project ever  
 3 undertaken in the Town of Durham, including the  
 4 construction projects at UNH. And, so, in terms of  
 5 understanding both the cost and feasibility, I think, if  
 6 we look at that, it's also important that the Town is  
 7 provided good information on the impact of a construction  
 8 project of this magnitude. Thank you.  
 9 MS. McGUIRE: Thank you very much. Bill  
 10 Beckett.  
 11 MR. BECKETT: We didn't know about this  
 12 proposed Project until we read about it in the paper.  
 13 And, my understanding, from what I've seen tonight very  
 14 briefly on the screen, is that the transmission line will  
 15 be going through the Adams Point area. And, if that is  
 16 true -- and, it's tall, and it's, frankly, going to be  
 17 ugly. And, what I would like to point out is, that  
 18 there's a great deal of conservation land in that area. I  
 19 don't know if it's hundreds of acres. But that land is  
 20 worth millions and millions of dollars, but it's now, in  
 21 perpetuity, to be conserved the way it is.  
 22 And, it does not seem right that they  
 23 should choose a site where the beauty of the landscape was  
 24 something that people sacrificed many, many dollars by  
 {SEC 2015-04} [Public Information Session] {04-22-15}

1 giving it into conservation -- into the Conservancy. And,  
2 to have this blight go where this beautiful area is is a  
3 shame.

4 My second and last comment relates to  
5 the gentleman, I think his name was Mr. Hall, who  
6 addressed the issue of underground cables in the  
7 wintertime. And, he made the comment that there's ice and  
8 they're hard to get at. Well, I happen to live in a  
9 community in Durham where our house is served partly by  
10 cable -- partly by telephone poles, electric light  
11 poles -- I mean, electric poles, on Durham Point Road, but  
12 then, near our house, it's all underground. And, for the  
13 eighteen years we've lived there, I can assure you that  
14 our power has gone out many, many times, with trees  
15 falling on the wires along Durham Point Road. But it has  
16 never gone out with the underground wires that serve our  
17 community where we live.

18 So, I question whether or not  
19 underground cables can't be feasible. And, they're not --  
20 I have never seen, personally, a problem where we live.  
21 Thank you.

22 MS. McGUIRE: Thank you very much,  
23 Mr. Beckett.

24 Is there anyone else who would like to  
{SEC 2015-04} [Public Information Session] {04-22-15}

1 MS. McCANN: Thank you. I hope you can  
2 note that.

3 MS. McGUIRE: You did. I will note for  
4 the record that it was a great majority.

5 MS. McCANN: Thank you. I guess --

6 MS. McGUIRE: I'm not taking it  
7 personally.

8 MS. McCANN: That's okay. It's not  
9 directed at you personally. You're in the unfortunate  
10 position, I guess.

11 My question is, what exactly is the  
12 reason for proceeding with this Project? We have had that  
13 graph presented to us in the literature and posted online,  
14 that gave checkmarks and Xs, kind of like a ticktacktoe  
15 board. And, I guess we're the winners, or maybe we're the  
16 losers, I don't know. But we got a lot of checkmarks, the  
17 other guys got a lot of Xs, but we didn't get any data.

18 I understand from the person I was  
19 speaking with, one of the representatives, that there will  
20 be data available. And, I ask that that data be available  
21 soon, and be available online, and also at the Town Hall,  
22 so others can see it and copy it and share it.

23 My second comment is that the energy  
24 that will be produced by these or transmitted by these  
{SEC 2015-04} [Public Information Session] {04-22-15}

1 comment verbally? Why don't you just --

2 UNIDENTIFIED SPEAKER: I'd like to  
3 answer questions --

4 MS. McGUIRE: Okay.

5 UNIDENTIFIED SPEAKER: -- that I've been  
6 hearing that no one's answering.

7 (Court reporter interruption.)

8 MS. McGUIRE: Yes. You know, sir,  
9 everything that is said has to be said at the microphone,  
10 because it has to be taken down.

11 MS. McCANN: Can I just speak?

12 MS. McGUIRE: Sure. Just what is your  
13 name?

14 MS. McCANN: Diane McCann, M-c-C-a-n-n.

15 MS. McGUIRE: M-c-C-a-n-n.

16 MS. McCANN: The second "C" is capped.

17 MS. McGUIRE: Okay. And, it's "McCann"?

18

19 MS. McCANN: Yes.

20 MS. McGUIRE: Not "McCain". Yes.

21 MS. McCANN: I just want to express  
22 again, and perhaps we can have a show of hands out of the  
23 audience, of people who are dissatisfied with this format?

24 (Multiple show of hands.)

{SEC 2015-04} [Public Information Session] {04-22-15}

1 wires, I'd just like to know the percentage of the energy  
2 that we'll be receiving here in Durham, and how much will  
3 be used by the Town. You keep talking about the need for  
4 this "on the Seacoast". I don't know what that means.  
5 I'd like an answer to that question.

6 I'd also like an answer to the question  
7 of the impact of cost. What is the cost and how are we  
8 going to manage this? There's been no example, other than  
9 this "\$70 million" that is listed on this piece of paper.  
10 But what is the cost to Durham or to the ratepayers? And,  
11 how will that be managed?

12 The other comment I'd like to make is,  
13 today, in the Wall Street Journal, or at least was  
14 distributed to many of us, that these companies that are  
15 producing the energy or electricity or transmitting it  
16 have made little effort to help the state and the  
17 consumers to conserve energy. They haven't offered much  
18 in terms of alternate energy support. It's mostly been  
19 done by the state, or perhaps some towns, or maybe the  
20 federal government.

21 But Eversource or Public Service has  
22 given us some light bulb reductions or some fan  
23 reductions, but they really haven't been supportive of  
24 alternative energy. And, I think that's what we would  
{SEC 2015-04} [Public Information Session] {04-22-15}

1 like to see, rather than more transmission lines. So,  
 2 thank you.

3 MS. MARTIN: Okay. Thank you,  
 4 Ms. McCann. Is there anybody else who would like to have  
 5 a comment? You've been up before? Yes. Okay, let me get  
 6 everybody else, before we get to you. Yes.

7 MS. HEALD: My name is Donna Heald,  
 8 H-e-a-l-d. And, I would just like to add something to the  
 9 comment that the gentleman said about the Adams Point area  
 10 being a lot of conservation land.

11 MS. McGUIRE: Uh-huh.

12 MS. HEALD: And, in recent years, I have  
 13 been to many presentations by The Nature Conservancy for  
 14 the purpose of fund-raising and things like that. And, it  
 15 has been identified by The Nature Conservancy that the  
 16 Great Bay watershed area is the number one target area for  
 17 conserving land.

18 So, I would just like to add that to his  
 19 comment. Thank you.

20 MS. McGUIRE: Thank you. Is there  
 21 anybody else who would like to comment? Yes, sir.

22 MR. McNITT: My name is Edward McNitt,  
 23 M-c-N-i-t-t. I'm a resident of Durham.

24 MS. McGUIRE: Yes, sir.  
 {SEC 2015-04} [Public Information Session] {04-22-15}

1 MR. McNITT: In all the presentations  
 2 for this proposal, we never have heard where the  
 3 electricity was coming from, where it was going, and who  
 4 is going to use it. It looks as if Durham is being  
 5 penalized for the privilege of having electricity pass  
 6 over its land. If it's going further upstate, does it  
 7 have to go through Durham? If it's going up to Dover,  
 8 isn't there a better way of doing it? Is this particular  
 9 section of line through Durham and UNH really necessary in  
 10 any way, shape or form?

11 And, I think, if there is a genuine  
 12 need, is there some better way of doing it? One of our  
 13 speakers mentioned a special transformer in Newington,  
 14 which would eliminate the need for this entirely. In  
 15 other words, one thing I am concerned on, that we're  
 16 putting all kinds of transmission lines in, which may  
 17 never be of any benefit whatsoever to the people of New  
 18 Hampshire.

19 If it is absolutely necessary that this  
 20 transmission line be put in, the stretch from Route 4 to  
 21 Durham Point Road is a natural for underground wiring.  
 22 It's almost free of ledges. It is even possible that the  
 23 underground wiring could be, over a period of ten years,  
 24 substantially cheaper than the poles.  
 {SEC 2015-04} [Public Information Session] {04-22-15}

1 I don't think we've done a thorough job  
 2 of evaluating the needs or, if there's an absolute need,  
 3 doing it the right way. Thank you.

4 MS. McGUIRE: Thank you, Mr. McNitt.  
 5 Would anyone like to speak? I guess you're up again.

6 MR. HEBERT: Again, my name is Denis  
 7 Hebert. And, I'm from Newington. Some of the process  
 8 that I've learned of what happens -- of what happened to  
 9 these extra costs, if you were to put it underground, it  
 10 goes to what they call as "local cost". And, everyone has  
 11 always been concerned about what does "local" mean? Does  
 12 that mean Durham, Newington, Portsmouth? Does that mean  
 13 the state or does that mean a region? And, no one really  
 14 knows how that would come out, if the extra costs were to  
 15 come out above and beyond, say, these costs that was being  
 16 proposed by Eversource.

17 What they have done in other states, and  
 18 the states have decided to do it, is that they would go  
 19 ahead and pay for it over the entire state. All right, it  
 20 would be the entire state would be paying for it. But the  
 21 process is this, if we cause underground, the cost of the  
 22 Project to go up, say, \$50 million, \$25 million, whatever  
 23 it might be, the Site Evaluation Committee will make that  
 24 determination and issue a license to Eversource to go  
 {SEC 2015-04} [Public Information Session] {04-22-15}

1 ahead and do that and get that done. Eversource then --  
 2 and, again, if I get the process incorrect, please correct  
 3 me, but Eversource then turns around and applies to and  
 4 makes a recommendation to FERC, and don't get me to get  
 5 into what the acronyms are, I think it's "Federal Energy  
 6 Regulators Commission", I think. They make a  
 7 recommendation to them as to how to pay for that. They  
 8 then decide how it's going to be paid, and I think the PUC  
 9 somehow is involved in all of this. So, the question was  
 10 asked "how does that happen?" That's what I've discovered  
 11 how it's paid for.

12 Some of the things we've -- I think you  
 13 can look at now, if you're looking at the issues that we  
 14 have before us that the Site Evaluation Committee has to  
 15 look at, and I'll read these off of what they are  
 16 considering. And, again, I'm going blind, I'm getting  
 17 old. So, I have to take my glasses off to read this:  
 18 "The site and facility", again, these are to get the  
 19 certificate, "the site and facility will not unduly  
 20 interfere with the orderly development of the region, with  
 21 due consideration having been given to the views of  
 22 municipal and regional planning commissions and municipal  
 23 governing bodies."  
 24 So, what that really means is your  
 {SEC 2015-04} [Public Information Session] {04-22-15}

1 planning boards, your selectmen, mayors, whatever you have  
2 representing you, they need to take a position of what  
3 they want or don't want.

4 "The site and facility will not have an  
5 unreasonable adverse effect on aesthetics, historic sites,  
6 air and water quality, the natural environment, and the  
7 public health and safety." They have to take all of these  
8 things into consideration, and that's what they're looking  
9 at. If you go there with other stuff, I'm not sure  
10 they're going to be listening, because this is their  
11 criteria by which they have to evaluate. And, is the --  
12 "the issuance of the certificate will serve the public  
13 interest at large."

14 These are the things that they're going  
15 to be looking at. And, again, to see if we need power in  
16 the region, and does the negative impacts on some  
17 communities out -- does the need for power outweigh the  
18 need for the negative impacts -- or, balancing the need  
19 for the negative impacts that it would have on communities  
20 where the transmission lines are going through. I think I  
21 got that right.

22 And, I think that's what -- the kind of  
23 things that we can do, if you're looking to do something,  
24 to try to stand up and basically get comment into this.  
{SEC 2015-04} [Public Information Session] {04-22-15}

1 MS. LODER: I would just like to --

2 MS. MCGUIRE: Would you state your name.

3 MS. LODER: I'm sorry. Suzanne Loder,  
4 L-o-d-e-r. I would like to respond to the gentleman from  
5 Newington. If it's going to cost a proportional amount  
6 more to put something underground, and we know that the  
7 transformer did the job for a certain amount, and the  
8 additional amount approaches the amount for the  
9 transformer, why not go for the transformer and forget all  
10 of this?

11 MS. MCGUIRE: Okay. Anyone else want to  
12 comment? You did, sir? Yes.

13 MR. HOFFMAN: I would actually like to  
14 take this opportunity --

15 MS. MCGUIRE: You need to --

16 MR. HOFFMAN: Okay. Excuse me. I'd  
17 like to take this opportunity to --

18 MS. MCGUIRE: Okay. You'll have to  
19 first say your name.

20 MR. HOFFMAN: Okay. Michael Hoffman.

21 MS. MCGUIRE: Okay.

22 MR. HOFFMAN: I'd like to take this  
23 opportunity to applaud UNH. In 2006, they installed a gas  
24 line from the Waste Management facility, in Rochester.  
{SEC 2015-04} [Public Information Session] {04-22-15}

1 And, the things of putting it underground and what the  
2 community want is important. And, I think that's what all  
3 you have here tonight.

4 And, I'm very frustrated with this  
5 process as well. I thought this was going to be an open  
6 question-and-answer type thing, and I'm disappointed that  
7 it's not. Because this is truly not New Hampshire,  
8 definitely not Durham, definitely not Newington. And, I  
9 think you're forgetting what these meetings are here  
10 about, and it's very controlled.

11 And, it took a long time to get this  
12 information that I've been trying to gather. And, I think  
13 all of you need and are trying to get on board with this,  
14 but really ask for this information and don't let down. I  
15 think the whole process, when it became -- began with  
16 ISO-New England, we should have been involved at that  
17 point, but there's no mechanism by which we can.

18 And, I think the process, though it's a  
19 better process than what we've had in the past, I think it  
20 needs to be improved to allow public input, before the  
21 decisions are made to go forth and construct. Okay?  
22 Thank you very much.

23 MS. MCGUIRE: Thank you very much,  
24 Mr. Hebert. Okay. Anyone else?  
{SEC 2015-04} [Public Information Session] {04-22-15}

1 And, according to their press release, they're able to get  
2 now 80 to 85 percent of their energy from a carbon neutral  
3 form, and is now reducing the load -- the demand that this  
4 community, including UNH, has on the ISO-New England. So,  
5 our demand in Durham has likely gone down, if the  
6 University is now getting 80 to 85 percent of their load  
7 from their cogeneration plant. Thank you.

8 MS. MCGUIRE: All right. Thank you.

9 Yes.

10 SEN. FULLER CLARK: Thank you very much.

11 MS. MCGUIRE: Again, you're going to  
12 have to say your name.

13 SEN. FULLER CLARK: Again, Senator  
14 Martha Fuller Clark. I just wanted to say that I share  
15 with the people who have taken time out of their busy  
16 lives to come tonight and not be able to actually engage  
17 in a dialogue in a question-and-answer format. And, I  
18 will do my very best to see that going forward this  
19 process can be changed and opened up, so that there will  
20 be that opportunity.

21 MS. MCGUIRE: All right. Thank you.

22 Anyone else like to comment? Good evening.

23 MR. HARRIS: My name is Joel Harris.  
24 I'm from Epping.  
{SEC 2015-04} [Public Information Session] {04-22-15}

1 MS. McGUIRE: Joel Harris?  
 2 MR. HARRIS: Joel Harris.  
 3 MS. McGUIRE: Yes.  
 4 MR. HARRIS: H-a-r-r-i-s.  
 5 MS. McGUIRE: Okay.  
 6 MR. HARRIS: I'm not under this line,  
 7 but I am a recipient of the power that it's going to  
 8 benefit. Epping will probably be very grateful to get a  
 9 little more power, because we're trying to expand our  
 10 town. So, even though the power line has to come from the  
 11 power plants on the seacoast, I think we appreciate it.  
 12 As for the question about the  
 13 underground lines in Europe, they pay three times as much  
 14 for power, for their electricity. I think that was one of  
 15 the reasons they didn't mind going underground over there,  
 16 it's real expensive over there. That was something I know  
 17 about. I've been reading about this, and high voltage  
 18 lines, for quite some time and underground. And, I think,  
 19 when an underground line fails, it's very disastrous. It  
 20 takes everything down, they can't quickly pick it up.  
 21 I heard, in Exeter, they have a  
 22 development that was all underground, I don't know how big  
 23 it was, but they said it would take \$50,000 to dig it up  
 24 and replace it, and it had a lifespan of 50 years. So, if  
 {SEC 2015-04} [Public Information Session] {04-22-15}

1 fellow Durham residents, that the long-term goal of I  
 2 believe most of the people in at least this community is  
 3 to use less energy. We need to learn to live sustainably.  
 4 And, if it costs us more per kilowatt-hour, that's a  
 5 deterrent, and some of us are willing to pay that.  
 6 MS. McGUIRE: Thank you. Is there  
 7 anyone else who would like to come up and speak?  
 8 (No verbal response)  
 9 MS. McGUIRE: Going once?  
 10 (No verbal response)  
 11 MS. McGUIRE: Okay. Then, I note for  
 12 the record that no additional member of the public would  
 13 like to comment at this time.  
 14 I want to thank you all very much for  
 15 coming out tonight. And, again, thank you for your  
 16 comments. They will all be included, the written  
 17 comments, as well as a transcript of these comments will  
 18 be made, and be made part of Eversource's Application to  
 19 the SEC. Thank you very much.  
 20 (Whereupon the Public Information  
 21 Session was adjourned at 8:11 p.m.)  
 22  
 23  
 24 {SEC 2015-04} [Public Information Session] {04-22-15}

1 that's the lifespan of an underground line, it's hard to  
 2 service it.  
 3 And, I've never seen an aboveground  
 4 transmission line, the ones that are in the corridors,  
 5 fail, unless they -- because there's no trees to fall on  
 6 them, because they're far enough away. So, blackouts  
 7 don't occur from those. And, to me, it's easier to  
 8 service aboveground lines, short-term and long-term. They  
 9 just are ugly for most people. And, I prefer the steel  
 10 pole, because they could probably paint it the color of a  
 11 tree bark or something, and then it wouldn't be so ugly.  
 12 And, if anyone here is concerned about  
 13 the electrical energy that might cause cancer, that was a  
 14 study in Colorado like twenty years ago. They found  
 15 everything wrong with the study. It was nothing to do  
 16 with the line itself, it was to do with the socioeconomic  
 17 people that lived near the lines, not the line itself.  
 18 So, a lot of people still fear that. It was mainly the  
 19 looks of the lines and their property valuations that they  
 20 were more concerned about. Thank you.  
 21 MS. McGUIRE: Thank you, Mr. Harris.  
 22 MS. HARRIS: Annmarie Harris,  
 23 A-n-n-m-a-r-i-e, one word, Harris, H-a-r-r-i-s. I guess I  
 24 just have to comment, after hearing all of my well-spoken  
 {SEC 2015-04} [Public Information Session] {04-22-15}

{SEC 2015-04} [Public Information Session] {04-23-15}

PROCEEDING

1 MS. McGUIRE: Good evening. My name is  
 2 Kathleen McGuire. And, I'm a retired New Hampshire  
 3 Superior Court judge. I was on the Bench for over 25  
 4 years before I recently fully retired. My function  
 5 tonight is to moderate this public information session  
 6 about the Seacoast Reliability Project, which is a 13-mile  
 7 115 kilovolt electric transmission line that would extend  
 8 from Madbury to Portsmouth. It's proposed by Public  
 9 Service of New Hampshire, doing business as Eversource  
 10 Energy. I want to thank you all very much for coming out  
 11 tonight to participate in this event.

12  
 13 Tonight's public information session is  
 14 the first step in an administrative process required by  
 15 Statute, RSA Chapter 162-H. Before the Seacoast  
 16 Reliability Project, or any energy project, may be built,  
 17 the Company proposing the project must receive a  
 18 Certificate of Site and Facility from the New Hampshire  
 19 Site Evaluation Committee, or more usually referred to as  
 20 the "SEC". The SEC is an entity formed by the Legislature  
 21 for the purpose of reviewing and authorizing proposed  
 22 energy sites and facilities. RSA Chapter 162-H was  
 23 recently amended to require that at least 30 days before  
 24 submitting an application to the SEC, the utility seeking  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 answered tonight will be answered by writing to you  
 2 individually, if you include your name and address on the  
 3 form.

4 And, hopefully, you also, as far as  
 5 questions go, had an opportunity to speak to the many  
 6 engineers and other Project experts who were here tonight  
 7 from 5:30 to 7:00 to ask questions that you might have.

8 The Legislature -- I mean, so, after  
 9 I've completed this introduction, Eversource will present  
 10 a short video that gives an overview of the Project. And,  
 11 then, the Project Team will answer questions for about 30  
 12 minutes. We will then begin the public information  
 13 session that is required by statute. You will then be  
 14 given the opportunity to comment on the Project. You may  
 15 do so orally, by signing up to speak, or in writing,  
 16 provided by cards that are up there at the kiosk. If you  
 17 haven't already signed up to orally comment, you may do so  
 18 at any time by going over to the kiosk. You will be  
 19 called on to comment in the order that you signed up.

20 The statute requires that tonight's  
 21 public information session be recorded. Which is why a  
 22 stenographer, Steve Patnaude, is here taking down  
 23 everything that is said. A transcript of tonight's  
 24 proceeding will be made and included in Eversource's  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 approval must hold a public information session in each  
 2 county in which the project is proposed to be built. This  
 3 Project is proposed for Strafford and Rockingham Counties.

4 Tonight's meeting is that  
 5 pre-application information session in Rockingham County  
 6 for the Seacoast Reliability Project. A similar session  
 7 was held last night in Durham for Strafford County. The  
 8 purpose of these meetings is to provide information to the  
 9 public about the proposed Project, and to offer the public  
 10 the opportunity to comment on the proposal.

11 The Legislature did not intend for the  
 12 pre-application information sessions to be  
 13 question-and-answer sessions. Nevertheless, based on the  
 14 feedback from last night's session in Durham, about the  
 15 inability of the public to ask questions and get answers  
 16 in a group setting, the Project Team has carved out an  
 17 additional 30 minutes tonight to respond to some of the  
 18 key questions asked last night, questions that you may be  
 19 thinking about yourselves. Additionally, you were all  
 20 provided with a sheet where you could write down -- where  
 21 you can write down your own question. A member of the  
 22 Project Team will respond to as many questions as time  
 23 allows before the official on-the-record public  
 24 information session begins. Any written questions not  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 Application to the Site Evaluation Committee. Your  
 2 comments will also be included as part of the Application.  
 3 Because tonight's meeting is being recorded, it is very  
 4 important that it be conducted in an orderly manner. Only  
 5 one person may speak at a time, and please speak slowly so  
 6 that Mr. Patnaude can get down everything that everyone is  
 7 saying. Please also direct your comments to me and not to  
 8 each other.

9 To ensure that everyone has an  
 10 opportunity to comment, I ask that you keep your comments  
 11 to three minutes. If you need more time to complete your  
 12 comments, after everyone has had a first opportunity to  
 13 speak, then you'll be able to go back up to the mike and  
 14 complete your comments. As tonight's meet -- again, your  
 15 oral and written comments will be made part of the  
 16 Application to the SEC. Eversource anticipates filing the  
 17 Application for the Seacoast Reliability Project by the  
 18 end of May, and it, including all public comments, will be  
 19 available online at the SEC website, and hard copies will  
 20 be delivered to each town that is affected by the Project.  
 21 So, if you wanted access to a hard copy, you can get that  
 22 by going to the town.

23 As I said previously, this is the  
 24 beginning of a lengthy administrative process. The  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 statute requires at least two more sets of public  
2 information sessions. Once Eversource files its  
3 Application, the SEC has 60 days to determine whether to  
4 accept it. Within 45 days after the Application is  
5 accepted, a second set of information sessions will be  
6 held. They will be much the same as this one, except that  
7 the moderator will either be the presiding officer of the  
8 Site Evaluation Committee or its designee. The SEC may  
9 also hold additional information sessions as it deems  
10 reasonable to inform the public.

11 The third set of public information  
12 sessions occurs within 90 days of the Site -- after the  
13 Site Evaluation Committee accepts the Application. The  
14 SEC and other state agencies will hold hearings about the  
15 Application, and any other permits that the Project is  
16 seeking to acquire.

17 In the past, these hearings involved the  
18 applicant presenting information about the proposed  
19 project. The SEC and state agencies asking the applicant  
20 questions about the project, the public making comments,  
21 and the SEC moderating a question-and-answer session about  
22 the project.

23 The last part of the administrative  
24 process occurs when the SEC holds a public adjudicative  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 concerns in writing, and those will be made part of the  
2 Application as well.

3 The first person on the list is Cosmas  
4 locovozzi. How's that?

5 MR. IOCOVOZZI: Thank you.

6 MS. MCGUIRE: Was that close?

7 MR. IOCOVOZZI: Very good, Judge.

8 MS. MCGUIRE: Thank you.

9 MR. IOCOVOZZI: My name is Cos  
10 locovozzi, Selectman, Town of Newington.

11 MS. MCGUIRE: Would you spell your last  
12 name, sir?

13 MR. IOCOVOZZI: "I" as in Ignatius, "o"  
14 like in ostrich, "c" as in cat, "o" as in ostrich, "v" as  
15 in Victor, "o" like in ostrich, "z" like in zebra, "z"  
16 like in zebra, "i" like in Ignatius.

17 MS. MCGUIRE: I hate to ask you, but  
18 would you do your first name, too.

19 MR. IOCOVOZZI: Cosmas, "C" as in cat,  
20 "o" as in ostrich, "s" like in Sam, "m" like in Mary, "a"  
21 like in apple, "s" like in Sam. That's my education of  
22 being an undertaker.

23 Well, thank you for opening this session  
24 up for everybody to give a comment. I just want to make a  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 hearing at which it considers evidence, and decides  
2 whether or not to issue a certificate authorizing  
3 Eversource to proceed with the proposed Project. These  
4 hearings typically occur about eight months after an  
5 application is accepted.

6 Again, thank you for participating in  
7 this initial step of the SEC siting project. The video  
8 presenting information about the Project will now be  
9 shown, after which members of the Project Team will answer  
10 questions for about 30 minutes, and then we will begin  
11 taking your comments.

12 *(Whereupon a video presentation of the*  
13 *Seacoast Reliability Project was*  
14 *presented to the public, and it was*  
15 *followed up with an off-the-record Q&A*  
16 *session with members of the public and*  
17 *members of the Project Team from*  
18 *Eversource Energy.)*

19 MS. MCGUIRE: So, as I told you, you're  
20 now going to have the opportunity to comment. Your  
21 comments will be transcribed and made part of the  
22 Application that is submitted by Eversource to the SEC.  
23 And, additionally, if you don't want to verbally comment,  
24 you have the opportunity to comment or submit questions or  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 statement. Being not only on the Board of Selectmen for,  
2 oh, I don't know, 20 some odd years, you had made a  
3 mention about the residential property values. I believe  
4 they will decrease severely with the height of your poles  
5 and whatever else you've got to do. I believe that the  
6 Town of Newington, with, you had made a mention of the  
7 Town being cut up by the base, the road, the wildlife  
8 refuge, our compact area is getting smaller and smaller  
9 with the homes that we have.

10 And, I do believe, as the RSAs say, we  
11 are the assessors for the Town. And, I do believe that  
12 the impact will be great on a lot of our homes that we  
13 have in the Town of Newington along your right-of-way. I  
14 know you had addressed it. But, just by saying that "Oh,  
15 I don't think it's going to happen", that doesn't give me  
16 that fuzzy feeling, you know?

17 Our job, being selectmen, are to protect  
18 our residents and our businesses in our Town of Newington.  
19 So, I firmly believe that, if you put the transmission  
20 lines underground, you're going to be cutting a lot of  
21 grievance and aggravation for a lot our people in the Town of  
22 Newington.

23 I'll give my rest of my time to my  
24 illustrious Chairman of the Planning Board.  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 MS. MCGUIRE: Is that Lulu Pickering?  
 2 MR. IOCOVOZZI: Lulu? No. Where's  
 3 Lulu?  
 4 MS. MCGUIRE: Lulu is --  
 5 MR. IOCOVOZZI: There she is. Thank  
 6 you.  
 7 MS. MCGUIRE: Okay. Ms. Pickering.  
 8 MS. PICKERING: I wish the PSNH folks  
 9 would come back up front, so I could speak directly to  
 10 whoever is making these decisions.  
 11 But what I would like to say is I'm  
 12 looking at a presentation they gave to the Planning Board  
 13 in January. It's one of their slides. And, they have  
 14 other alternative Newington roots that they considered,  
 15 and those are not the ones that they showed tonight. And,  
 16 there's a other plan that shows taking this new line  
 17 across Arboretum Drive. There's different parts of it,  
 18 whether it cuts across the Wildlife Refuge, whether it  
 19 goes across the property border between the Town of  
 20 Newington and the Wildlife Refuge. So, clearly, somebody  
 21 has looked at this. And, yet, they haven't given us any  
 22 detail or any information about what those other routes  
 23 were and what the considerations were.  
 24 Now, the only thing they do say is that  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 Now, when they talk about a  
 2 "\$22.5 million difference", what I would say is the  
 3 opportunity cost of doing this right, and doing it now, by  
 4 taking this transmission line and putting it along  
 5 Arboretum Drive, it's never going to be cheaper to do that  
 6 than to do it now. And, using their own numbers, when  
 7 they say "by 2025, 25 percent of the load for all of New  
 8 Hampshire is going to be in this area", says that this is  
 9 just the beginning of what they'll have to do with these  
 10 transmission lines. It's never going to be cheaper.  
 11 We would like to work with them to look  
 12 at this proposal that somebody has already looked at, and  
 13 we certainly would like to be engaged in the process and  
 14 find out a lot more information about it. We don't want  
 15 to fight with them. Everybody wants electricity. They  
 16 want all of their electrical gadgets to work. But there's  
 17 just a tiny bit of Newington that still is here, and we  
 18 feel that it's important. So, thank you.  
 19 MS. MCGUIRE: Thank you very much.  
 20 Helen Frink, F-r-i-n-k.  
 21 MS. FRINK: My name is Helen Frink. I'm  
 22 co-owner of the Darius, D-a-r-i-u-s, Frink Farm on Nimble  
 23 Hill Road. This is a historically protected agricultural  
 24 property. Ten years ago, we obtained a conservation  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 the Great Bay Wildlife Refuge, they spoke to somebody,  
 2 they don't say who, and somebody said "no", they want to  
 3 protect the habitat.  
 4 But what I would propose is, if they  
 5 work with us, if they work with the people in the area,  
 6 our boards, our congressional delegates, I think there's  
 7 possibilities to look at some of these things, these  
 8 alternatives, other than just to say from, you know,  
 9 whoever they spoke to, who we don't know who it is, that  
 10 the answer is "no". The other thing is they have a price  
 11 tag here that -- to say to do this would cost an  
 12 additional \$22.5 million.  
 13 When you look at the Town of Newington,  
 14 and I used an expression to Dave, and I don't -- I don't  
 15 say this lightly, but they're -- it's fighting for your  
 16 survival in Newington. The industrial waterfront zone is  
 17 gone. The eight lanes of interstate highway, all of that  
 18 land is gone. The airplanes with the Air National Guard  
 19 and whatever that go right over our heads, we live with  
 20 every day, that took the whole center out of the town.  
 21 The Wildlife Refuge wants to protect the animals. There  
 22 is a tiny, tiny footprint left for the people. And, it  
 23 makes all of the sense in the world to try to protect the  
 24 only residential area that still exists in Newington.  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 easement with a sizable investment of federal money and  
 2 Town of Newington money, and a large contribution by the  
 3 Frink family. We have been there for 200 years. We sell  
 4 grass-fed, pasture-raised beef from a heritage breed of  
 5 cattle.  
 6 I would like to address the question of  
 7 electromagnetic fields radiated by these transmission  
 8 lines. Eversource has sited an eight year-old study by  
 9 the World Health Organization telling us that we need not  
 10 be concerned about that. Nevertheless, many people fear  
 11 electromagnetic field radiation. Those people will be  
 12 unwilling to consider buying farm-raised, pasture-fed beef  
 13 grazing beneath the Eversource power line. It destroys  
 14 our marketing concept, and it destroys one of the last few  
 15 agricultural properties left in Newington's historic core.  
 16 As Lulu Pickering has pointed out, there is only a  
 17 thumbnail left of the Town of Newington.  
 18 The terms "public utility" and "Seacoast  
 19 Reliability Project" mask the fact that Eversource is a  
 20 privately owned, for-profit company. Why should  
 21 Eversource be permitted to defile the little bit that  
 22 remains of Newington's historic core?  
 23 I understand that one of the  
 24 considerations was running the line through the National  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 Wildlife Refuge. I would like to know when wildlife  
2 habitat became more important to the common good than  
3 human habitat and our history roots in this town?

4 MS. McGUIRE: Thank you, Ms. Frink.  
5 Jack Pare, P-a-r-e.

6 MR. PARE: Yes. My name is Jack Pare.  
7 And, I'm a resident of Newington. And, I, too, support  
8 the burying of the cable through Newington's residential  
9 zone, both for aesthetics, which you'll hear a lot about,  
10 and to preserve the historic character of the Historic  
11 District, portions of which are on the National Historic  
12 Register.

13 But, also, there's another reason. It's  
14 the aircraft history of what has been going on over at  
15 Pease. The four alternatives were mentioned during the  
16 discussion, informal discussion, before we got into formal  
17 session: The step-down autotransformer at Newington  
18 Station and three transmission line routes; one going  
19 north of the way, one going south of the bay, and one  
20 crossing the middle of the bay, which is the preferred  
21 alternative.

22 Now, that preferred alternative, as it  
23 began to evolve in the ISO process, was originally  
24 designed to be underground throughout the Newington  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 internet and just looked up the crash history into and out  
2 of Pease. I did not record anything that went beyond the  
3 landings either in Pease or in Newington or in Portsmouth.  
4 B-47, Tail Number 52-726, March 16th, 1958, crashed on  
5 takeoff near the Country Club. That's the Portsmouth end.  
6 B-47, Tail Number 52-562, April 15th, crashed on takeoff.  
7 B-47E, Tail Number 53-4244, January 4th, 1961, crashed on  
8 takeoff. B-47, Tail Number 52-339, December 8, 1964,  
9 crashed on takeoff. KC-95, Tail Number -- excuse me,  
10 KC-97, tail number not known, November 5th, 1962, crashed  
11 on takeoff near the highway. It was carrying about  
12 61,000 pounds of aviation fuel. And, FB-111, Tail Number  
13 68-0263, January 30th, 1981, crashed on takeoff into  
14 Seacrest Village, Portsmouth. Those were takeoff crashes.

15 Landing crashes: B-47E, Tail Number  
16 52-160, 1952, don't have the month, crash-landed on its  
17 belly on the Pease runway. KC-97, Tail Number 52-2703,  
18 don't have the month, 1965, crashed at Pease after an  
19 inflight fire. FB-111A, Tail Number 67-7192, don't have  
20 the date, but severely damaged on landing. FB-111A, Tail  
21 Number 67-7194, don't have a date, hit light stanchion on  
22 landing, the rear half of the airplane was totally  
23 destroyed by fire. KC-135A, Tail Number 59-1494, January  
24 11th, 1990, burned and exploded on ramp soon after  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 residential zone. That was the original design. That was  
2 in the original budget. And, it was done for safety of  
3 flight coming into and out of Pease. And, I can say the  
4 Eversource engineers got that part right.

5 Now, since then, it has been deemed  
6 cheaper to put the towers in above ground, rather than  
7 keeping it buried, according to the original design. And,  
8 people from Eversource went down to FAA headquarters and  
9 got permission to put the towers up in place of keeping it  
10 buried, because they were just a short distance away from  
11 the civilian glide slope there at Pease. Well, I worked  
12 12 years for that FAA Facilities Organization. And, I can  
13 pretty well bet that the person who signed off for it in  
14 Washington didn't know the area around Pease, it's  
15 context, the fact that it's a mixed commercial and  
16 military facility, nor does he -- did he probably know of  
17 the military history.

18 Now, particularly, commercial aircraft  
19 are more conservatively loaded than military ones. Also,  
20 commercial aircraft are more conservatively flown. You  
21 generally hear of a bad weather event and flight  
22 cancellations. Bad weather events don't slow down the  
23 military.

24 Basically, last night I went on the  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 landing. At least they got the plane down.

2 Now, sitting over at the Red Hook, I  
3 have heard apocryphal tales of KC-135 post-inspection  
4 finding pine branches in their landing gear. Is it true?  
5 Is it partially true? How many times might it have been  
6 true? Well, I couldn't find any public record of that in  
7 my Internet search. But the KC-135 carries up to 200,000  
8 pounds, 100 tons, of aviation fuel.

9 Now, and soon we will be getting  
10 KC-46As. They carry 212,299 pounds of fuel, plus cargo.  
11 It's based on the 767. 767s were the planes that brought  
12 down the World Trade Center. And, the KC-46A, being a  
13 tanker version, carry up to two and a half times more  
14 fuel. Imagine that. 100 tons of jet fuel colliding with  
15 a 115,000 volt ignition source 60 to 115-foot tall.

16 Power line construction is planned to  
17 start in the Fall of 2016. The KC-46A is scheduled to  
18 arrive at Pease in fiscal 2018, that begins in the Fall of  
19 2017. Training of the aircrews is supposed to begin at  
20 the same time as the beginning of construction on this  
21 power line.

22 Now, for those of you that don't know  
23 history, and in particularly this safety history, you may  
24 have it likely to be repeated on you. So, I ask the Site  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 Evaluation Committee to bury the lines for safety of  
2 flight reasons, in addition to the reasons of aesthetics  
3 and the preservation of the Historic District. Thank  
4 you.

5 MS. McGUIRE: Thank you, Mr. Pare. Joe  
6 Caldarola. C-a-l-d-a-r-o-l-a, right?

7 MR. CALDAROLA: Yes, that's right. Yes.  
8 I'm a developer and builder. I build houses. And, I own  
9 the property right next to the Town Hall here, right next  
10 to the right-of-way, and right under the flight path of  
11 the airplanes as they take off. And, I'll be building six  
12 houses there. I may be moving into one of them. And,  
13 they all front -- they all about the right-of-way.

14 I've been doing subdivisions for 15, 20  
15 years, and I've always been required to put the power  
16 underground in subdivisions, because it's more reliable,  
17 and it creates higher value for the town. And, it's  
18 just -- it's just a *de facto* default policy.

19 So, my question is, if it's good enough  
20 for new subdivisions, why isn't it good enough as a policy  
21 for a utility? And, I don't understand that. I also  
22 don't understand why the argument is made that it's  
23 less -- it's more expensive. I think it -- I was asking  
24 one of the representatives earlier, and he said "well,  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 by a representative of Eversource, and then answered by a  
2 representative of Eversource. So, I asked "well, why  
3 can't I ask my own question?" And, they said "well, we  
4 don't" -- "that's just not how it's done." I said, "well,  
5 who decides that?" And, "is it an Eversource policy or is  
6 it a PUC thing or what is it?" And, I never really got a  
7 straight answer. And, then, when you started the hearing,  
8 you said that we would be allowed to speak. So, I think  
9 that was certainly unfortunate. And, it certainly mislead  
10 me about what was going to transpire tonight.

11 And, then, I questioned it again later  
12 on, and I was shown this form, which is a blue and white  
13 form, here. And, nobody had ever told me that this form  
14 was available. And, this apparently is the official form  
15 to fill out to submit a comment to the SEC. And, I'd just  
16 like to know how many people in the room actually knew  
17 that this even existed? Anybody? Did anybody know that  
18 is form --

19 (Multiple parties speaking at the same  
20 time.)

21 MR. CALDAROLA: So, that's certainly --  
22 FROM THE FLOOR: Never signed the  
23 sign-in sheet either.

24 MR. CALDAROLA: Yes. So, --  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 they look at a 40-year time horizon, and that's standard  
2 industry practice." I think that's too short. And,  
3 that's probably why it's deemed more expensive.

4 I mean, you know, in Japan, they finance  
5 public utilities for 100 years. You know, why are we  
6 looking at a 40-year time horizon? Sure, it's more  
7 expensive to put in initially. But I think that the  
8 overall value over time is probably no more.

9 And, I heard the argument that "it's  
10 more expensive to make repairs when there are problems."  
11 Well, you know, again, my experience with it is that I've  
12 heard of problems with transformers, I've heard of  
13 problems with poorly installed, you know, conduits and  
14 such. I've never heard of problems happening when -- with  
15 underground -- the actual underground piping that had to  
16 be addressed by digging it up. I've never actually seen  
17 that. And, I've been doing this quite a while.

18 I'd like to point out a couple of  
19 problems with the process tonight. When I arrived, I was  
20 greeted and asked to sign an attendance sheet, and shown a  
21 black and white comment form, black and white printed  
22 form. And, I was invited to write any question I had on  
23 the back of the form, this is at the reception table by  
24 the entrance there. And, that the questions would be read  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 MS. McGUIRE: I just want to just answer  
2 that, that all of the comments, regardless of what form  
3 they're on, will go to the SEC.

4 MR. CALDAROLA: Okay. But I think it  
5 was certainly discouraging to comment, to not be shown the  
6 form, presented the form, have to really press to even  
7 find out there was a form. So, I think that was certainly  
8 an error. And, it looked to me like an intentional  
9 attempt to not have forms filled out.

10 So, the other thing I wonder about is  
11 how many people left discouraged because they were told  
12 that they wouldn't be able to speak? Because I was told I  
13 wouldn't be able to speak, and was milling around with  
14 people, and there's a lot of people here. But maybe a lot  
15 of people didn't leave, but, I don't know, I thought about  
16 leaving myself, because I was told that the public  
17 wouldn't be allowed to speak tonight.

18 Now, this is a little mean-spirited, but  
19 I can't help but ask the question. I've been in a lot of  
20 public hearings with applicants doing developments, some  
21 of them quite large developments larger than this, and I  
22 have never seen so many representatives from an applicant  
23 in a hearing. You know, I counted -- I went around and  
24 counted tags, and there were, I think, 24 badges, 24  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 representatives of Eversource here tonight. And, I don't  
2 understand who's paying them, and I think we are,  
3 probably, so -- and how it can be economically justified?  
4 And, so, I asked somebody who knew, and he said that these  
5 hearings are part of the capital expenses of the utility,  
6 and that therefore they can be -- there's an 11 percent  
7 return that can be earned on them. So, basically, it's a  
8 profit center.

9 So, I'm just wondering why are there 24  
10 people here tonight? I've never seen -- I mean, I've seen  
11 \$100 million applications for applicants where there were  
12 three or four people, just like the people that answered  
13 the questions, you know.

14 So, it's a little mean-spirited, but I  
15 had to ask. Thank you.

16 MS. McGUIRE: We're basically here to  
17 take comments, but I do just want to respond to that.  
18 That this public information session, the pre-application  
19 public information session, resulted from a statutory  
20 change, and it was not required before. So, in a way,  
21 Eversource is sort of feeling its way and trying to comply  
22 with the statutory requirement, which is only to take  
23 comments and to make those part of the record. The public  
24 open house ahead of time and the question-and-answer  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 What doesn't seem to be being done is  
2 taking into account the economic costs of all the issues  
3 that many people have already raised. The diminution of  
4 property value, the loss of tax dollars on that property,  
5 the damage to businesses that will be affected by the  
6 Project, the damage to recreation in the bay and the  
7 community at large, and the businesses that benefit from  
8 that recreational use. The damage to commercial fisheries  
9 and the lobstermen while it's going on. And, we keep  
10 being told that this is "our money", the "public's money",  
11 and that they don't want to spend "our money". Yet, the  
12 only cost that seems to be taken into account is the cost  
13 of the spending, not the cost that's being imposed on the  
14 community to allow them to save the \$20 million, which  
15 they believe is more beneficial in the 40 years.

16 So, I think the calculation is off.  
17 We're only looking at one side of the equation, and the  
18 public is being asked to bear the entire cost of allowing  
19 them to do it in the other way. So, I just wanted to tie  
20 that together.

21 The other comment was, there's been  
22 virtually no discussion, in this meeting or last night's  
23 meeting, about the environmental impact on the bay of the  
24 proposed jet dredging, which, just to make clear, would  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 periods were not required by statute, but I think an  
2 attempt by Eversource to provide information to the public  
3 beyond what the statute envisioned. So, in that way,  
4 Eversource is sort of feeling its way.

5 Last night was the first one of these  
6 they did. Tonight is the second. So, in response to  
7 feedback last night, they included that  
8 question-and-answer session, which wasn't there last  
9 night, and people were frustrated about, so that was  
10 added. But, you know, it's a new process and a new  
11 requirement.

12 Tom Delapo -- no, or Durapo? You'll  
13 have to -- he'll have to spell it himself.

14 MR. DeCAPO: Thank you. Close. DeCapo,  
15 D-e-C-a-p-o.

16 MS. McGUIRE: Ah. Okay. DeCapo.

17 MR. DeCAPO: Thank you. I'd like to  
18 echo a couple of the comments other people made about the  
19 cost. It seems to me that we're talking about  
20 approximately 20 million additional dollars for some  
21 aspects of the Project, and other additional costs to  
22 change additional aspects of the Project in the bay  
23 itself. And, that those are being evaluated against the  
24 cost over 40 years of doing the Project differently.  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 involve 3 miles of up to 8-foot deep, and I believe I  
2 heard -- now I forget, the width of these dredges, that  
3 would put that quantity of sediment up into flotation,  
4 only to come back down somewhere, likely right back there  
5 on the ground in Little Bay and Great Bay, and potentially  
6 covering enormous amounts of base level sea life, which  
7 will have then domino effects on the ecology of the bay,  
8 which no one is really talking about. And, the  
9 alternatives to doing that type of dredging that would not  
10 have any impacts on the bay, of either doing the  
11 horizontal drilling, which again would be more expensive  
12 in the short run, but would not have the ecological  
13 impacts, or other proposals that don't seem to have been  
14 explored, such as surface laying of the cables in  
15 encasement that would protect them from the dangers that  
16 lead them to want to bury the cables.

17 So, I'm very worried that we have this  
18 fabulous ecological resource of the only estuary in New  
19 Hampshire that is being taken for granted and putting it  
20 at enormous risk with virtually no discussion about it.

21 MS. McGUIRE: Thank you. Jane Hislop,  
22 H-i-s-l-o-p.

23 MS. HISLOP: I'm not tall enough. Stand  
24 on my tippy-toes? Hello, Eversource, and everyone else  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 from the Town. I know, when I walked in, I saw more blue  
2 stickers than Town members, but it's nice to see the  
3 audience here.

4 Over the years, Newington has given up  
5 large portions of its limited land resources for the  
6 betterment of the New England region. It has lost over  
7 half of its land to Pease Air Force Base, and recently  
8 more to the enlargement of the Spaulding Turnpike. The  
9 Town and its Conservation Commission has struggled to  
10 maintain the sound environmental character against this  
11 tide of destructive pressures.

12 The Newington Conservation Commission  
13 requests Eversource, SEC, and the other agencies to take  
14 the long view, and decide on the lowest environmental  
15 impact and the most sustainable solution possible on this  
16 Project. Thank you.

17 MS. McGUIRE: Thank you. Susan Geiger,  
18 G-e-i-g-e-r.

19 MS. GEIGER: Yes. Good evening. My  
20 name is Susan Geiger. And, I'm an attorney with the law  
21 firm of Orr & Reno, in Concord, and I represent the Town  
22 of Newington.

23 The Town believes that this Project, as  
24 currently configured, does not satisfy all of the  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 follows: From a planning perspective, the installation of  
2 approximately 50 very tall, between 85 and 100-foot  
3 aboveground utility poles and wires, in a route extending  
4 for four miles through the Town of Newington, would be  
5 inconsistent with the character of many locations along  
6 the route.

7 An overhead transmission line would also  
8 be contrary to the Newington Subdivision Regulations,  
9 which require that all utility lines be placed underground  
10 in the street right-of-way or in dedicated easements.  
11 While we understand that the SEC's authority preempts  
12 local zoning and planning, the SEC must still give the  
13 Town's views due consideration. And, the Town's views on  
14 placement of new utility lines are clearly stated in its  
15 planning regulations; the lines must be buried.

16 Now, with respect to impact on  
17 historical resources, the proposed transmission route, as  
18 you've heard, would run through the Town's Historic  
19 District, which is listed in the National Register of  
20 Historic Places. The overhead line and poles would be  
21 located in very close proximity to and visible from the  
22 historic Frink Farm, as Ms. Frink described, which is  
23 within the Historic District. Thus, the Project will have  
24 an unreasonable adverse effect on historic resources.  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 statutory criteria that would enable the Site Evaluation  
2 Committee to grant a project Certificate of Site and  
3 Facility. Based on preliminary review by the Town, it  
4 believes that this proposed overhead transmission line  
5 will unduly interfere with the orderly development of the  
6 region, and will have an unreasonable adverse effect upon  
7 aesthetics and historical resources. The Town also  
8 believes that this overhead line is not in the public  
9 interest.

10 But, because the SEC application has not  
11 yet been filed, the Town has not had an opportunity to  
12 evaluate any reports. And, so, we may have other comments  
13 about our concerns. As you've heard here tonight, there  
14 are other issues that the SEC must consider, such as  
15 public health and safety and environmental considerations.  
16 So, the Town reserves its right to supplement these  
17 comments at a later date, if necessary.

18 The statute that applies here, RSA  
19 162-H, IV(b), requires the SEC to give due consideration  
20 to the views of the towns' selectboard and planning board,  
21 in determining whether a project will unduly interfere  
22 with the orderly development of the region.

23 The Town's preliminary review and views  
24 on the orderly development and other related issues are as  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 In addition, because the new poles will  
2 be approximately two to three times higher than existing  
3 poles, they will create new visual impacts. The height  
4 and appearance of the new poles will therefore have an  
5 unreasonable adverse effect upon aesthetics, and property  
6 values, which could be negatively impacted. In turn, this  
7 would negatively impact the Town's base, as you've heard  
8 from others.

9 With respect to the public interest  
10 standard under the statute, the Town believes that it's  
11 important to note, as others have, that the Town has  
12 hosted three large generating units in a section of the  
13 town, and the Pease Tradeport in another section. The  
14 Town has hosted utility and other infrastructure that have  
15 been used for the public's benefit for many years. Thus,  
16 the Town has demonstrated a record of accommodating  
17 infrastructure projects. However, in the case of this  
18 particular Project, the Town cannot support it as it's  
19 currently configured.

20 The Town believes that, in order to  
21 satisfy all of the criteria of the statute, the section of  
22 the line that runs through Newington must be buried, in  
23 accordance with the Town's planning requirements, and to  
24 avoid unreasonable adverse effects to aesthetics and  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 historic resources, as noted before.  
 2 Thank you for the opportunity to provide  
 3 the Town of Newton's comments.  
 4 MS. McGUIRE: All right. Thank you,  
 5 Attorney Geiger. David Sweeney.  
 6 MR. SWEENEY: I would like to question  
 7 why, if you want a reliable source of energy to come  
 8 through our town, you don't follow the Planning Board's  
 9 recommendation and go underground? And, I spoke to one of  
 10 the engineers, and "cost" was mentioned. But, if you want  
 11 a more sustainable system, given the right-of-way that  
 12 exists through our town, you could put double cable  
 13 separated by that width and give a redundancy. So, I am  
 14 posing this question to the engineers. It seems to me  
 15 that you would rather destroy the view of our town, as  
 16 opposed to putting your cable under the ground, where it  
 17 will not affect anyone's property.  
 18 MS. McGUIRE: Thank you. Richard  
 19 Hamelin, H-a-m-e-l-i-n.  
 20 MR. HAMELIN: Correct. Yes. Pretty  
 21 much reiterating what other people have said, as far as  
 22 running underground, basically, for aesthetic values, but  
 23 also for public health. Helen Frink brought up a good  
 24 point, and she stole my thunder on that. I was going to  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 together very well by the residents of this town.  
 2 Everybody is, I think, is pulling together and is saying  
 3 the same thing. And, I think the Site Evaluation  
 4 Committee needs to listen to the hardships that this Town  
 5 has had to look, and what we've supported for structure  
 6 for the regional area.  
 7 I don't think it's the Project itself,  
 8 about "wanting reliable power", it is. It's the matter of  
 9 the way we're doing it. And, I think it's in disregard to  
 10 what this town has asked for and what we've been doing and  
 11 acting and planning and putting power lines underground.  
 12 This flies right in the face of everything we've been  
 13 doing for the last 25 to 30 years. Every time we've put  
 14 power in here, we've always put it underground. And,  
 15 we've had that in our Master Plan and in our ordinances to  
 16 cover that.  
 17 The one thing that I'll say, I've been  
 18 involved with this since approximately January of 2013,  
 19 and when Eversource reached out to the Town and said that  
 20 they were looking at some different routes. One of the  
 21 things we asked for was to have alternate routes, which  
 22 was to go to the former Pease Air Force Base. It would go  
 23 through the munitions area, which was greatly disturbed  
 24 when the Air Force came here. And, there's not much more  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 question the effects of the electromagnetic fields put out  
 2 by a 115 kV unit power line. I realize the cables are  
 3 probably shielded. But any project of this magnitude,  
 4 Murphy's Law is definitely going to kick in at some point.  
 5 Thank you.  
 6 MS. McGUIRE: Thank you. Denis Hebert.  
 7 (Court reporter interruption.)  
 8 MS. McGUIRE: Denis, D-e-n-i-s, Hebert,  
 9 H-e-b-e-r-t.  
 10 MR. HEBERT: Hi. Good evening.  
 11 MS. McGUIRE: Good evening.  
 12 MR. HEBERT: The process did get better  
 13 than it was last night.  
 14 MS. McGUIRE: Thank you.  
 15 MR. HEBERT: But I still have to say  
 16 that the process can use some improvement.  
 17 MS. McGUIRE: Okay.  
 18 MR. HEBERT: But the question-and-answer  
 19 is a good -- is a good way to start. So, I don't have  
 20 much more to add than what has already been stated this  
 21 evening. I had a lot to state last night -- I wanted to  
 22 say -- state last night in Durham, but that has already  
 23 been covered here. So, I'm not going to try to cover that  
 24 all over again, because I've got to say it's been put  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 than scrub brush trying to -- forest trying to reestablish  
 2 itself. It's by no means a forest at this point, if you  
 3 go and look at it. It's an empty munitions storage area  
 4 with a lot of bunkers in it.  
 5 And, we asked that they would consider  
 6 crossing the bay, and going up through that area, which is  
 7 now considered to be a wildlife, and getting onto  
 8 Arboretum Drive, which is a paved road. That paved road  
 9 is already a utility corridor that this Town -- or,  
 10 actually, the states have decided we're going to use for a  
 11 natural gas line. We asked about putting that there.  
 12 And, the answer, when we come back -- when we got the  
 13 answer back many months later was that they couldn't do  
 14 it. But it would have no diminishing values on our  
 15 residential area, which is very small and being impacted  
 16 greatly by this.  
 17 So, I'm just going to ask that the SEC,  
 18 Site Evaluation Committee, reconsider that particular  
 19 route. I don't think that probably that's going to  
 20 happen, and that the horse has sort of like going down the  
 21 road on this one, but they should still reconsider it.  
 22 The other thing that they came back to,  
 23 when we talked to them just recently, I think it was like  
 24 in November of this past year, was they originally had put  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 in to put the power lines underground from Great Bay, all  
2 the way up through Hannah Lane. When we had met with them  
3 before that, we had asked them to continue those  
4 underground lines through the rest of the residential  
5 area, which is about another quarter of a mile. They came  
6 back and said that "That was not feasible. In fact, we  
7 are now going to go above ground."

8 Now, that's -- when they come back from  
9 ISO-New England, ISO-New England goes off and they say "go  
10 out and do this", and there's an expected project cost.  
11 That project cost was -- already included an underground  
12 portion, which covered most of Newington. They then took  
13 that project cost and said "Oh, we're not going to do that  
14 anymore, because the FAA said it's okay to put the power  
15 lines up." And, again, this is a bureaucrat in Washington  
16 who made that decision. And, I know that the Committee  
17 met with the Pease Development Authority and some local  
18 FAA people here at Pease, but they are not the  
19 decision-makers, and they can't make a commitment by any  
20 means.

21 And, the people who do make the  
22 decisions did not come to this town, did not listen to the  
23 concerns of the people who are here this evening. I know  
24 Jack Pare, for example, had mentioned about the recent  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 underground. The money was there. And, you can do it,  
2 because it was in your budget.

3 To now sit there and say "Sorry, guys.  
4 We found a cheaper way to do it through your town, and  
5 we're going to take it out of your hide by diminishing  
6 values", that does not work.

7 So, I would like to say to the SEC  
8 Committee -- I would like to say to the SEC Committee,  
9 listen to what everyone here is saying tonight. I think  
10 our attorney, Susan Geiger, put it together very nicely.  
11 She looked at what the regulations are by -- that the SEC  
12 people are looking at. And, they need to pay attention to  
13 what -- the letter that she wrote and what the people here  
14 are saying. We are not against power lines coming to the  
15 region. We are here against the way you're doing it.  
16 Thank you very much.

17 MS. MCGUIRE: Thank you. I would like  
18 to just add some kudos to the people of Newington, who's  
19 penmanship, by the way, is much better than the people in  
20 Durham. I can read all of these names tonight.

21 John Ratigan.

22 MR. RATIGAN: There's a Sister of Mercy  
23 who turns over in her grave every time I pick up a pen.

24 Good evening. I represent the Planning  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 crashes that we've had over the years. And, I do know  
2 that, being a member -- a former member of the military,  
3 that planes did have to sometimes come in a little bit low  
4 for whatever reason, for a variety of reasons.

5 But, if the money was there in the  
6 Project to start with to put it underground, and now  
7 they're saying that they can't put it underground because  
8 it's going to cost money, but they're saying they can't go  
9 back to ISO-New England and ask them to change the project  
10 because it's going to -- it can cost money, in other  
11 words, the cake is baked, but they can unbake it, so to  
12 say, or a portion of it, because they're going to put more  
13 money into their coffers, I have a problem with it.

14 And, I agree with everyone, what  
15 everyone has said here tonight. And, I'm really proud of  
16 all of you, actually, for coming here and how informed you  
17 are, all right? Because this is very, very encouraging to  
18 me to see what all of you are saying and support it.

19 We need to go, at the very least,  
20 underground through the residential area, not the entire  
21 four miles that it passes through Newington. I'm  
22 encouraging that we consider that 1.5 miles of -- a little  
23 bit under 1.5 miles of the proposed line, which is through  
24 the residential area and the Historic District area be  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 Board. I've worked closely with Susan and Denis on this  
2 Project. And, I'd like to ask a favor of all the members  
3 here and the residents here this evening. The encouraging  
4 news about the statute is that the SEC Committee has the  
5 authority to impose reasonable terms and conditions on any  
6 permit that it issues. The downside about this process is  
7 that most of it occurs in Concord, and most of you won't  
8 be able to attend. And, I know human nature is that, when  
9 you've heard 12 of your neighbors stand up and say every  
10 imaginable thing that you agree with this evening, the  
11 tendency is to remain seated. And, since this is a record  
12 being recorded by the stenographer, you have to get up,  
13 each and every one of you, even though it may take a  
14 while, and say how you feel about this, so the people  
15 reading the transcript in Concord will know how many  
16 people are here tonight, and this is a significant portion  
17 of the residents of Newington here tonight, and how you  
18 feel about this.

19 I also encourage every one of you, in  
20 addition to commenting, to fill out the form and to state  
21 how you feel, especially on whether you think the  
22 alternative of burying the line is one in which you  
23 support. Thank you.

24 MS. MCGUIRE: Thank you. Justin  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 Richardson.  
 2 MR. RICHARDSON: Thank you. I'm Justin  
 3 Richardson, 32 Old Post Road, in Newington. I was trying  
 4 to remember when Reunion Day was in Newington, which, and  
 5 for those of you that don't know and those with  
 6 Eversource, Newington was split in half in about 1953,  
 7 when the air base was built. And, I used to have these  
 8 numbers at my fingertips, but I think there's about  
 9 6,500 acres, and I believe about 4,000 were taken by  
 10 eminent domain to establish the base. The number is  
 11 staggering, whatever the exact numbers are. Today, it's  
 12 split about one-third Wildlife Refuge, one-third base --  
 13 excuse me, one-third Pease Development Authority area, and  
 14 one-third Newington residents. But we got the raw end of  
 15 the deal, because the high-and-dry land where you would  
 16 want to build an air base is where the runway is, and, you  
 17 know, where the Town Hall is and where the cemetery is,  
 18 that's where it ends. I mean, anyone who is an historian  
 19 will know, that that's where the best buildable land is.  
 20 And, the remaining land is kind of a swampy area that  
 21 wasn't really good for building a large industrial  
 22 facility.

23 So, Reunion Day is important to  
 24 remember, because, as I was sitting here, I was saying to  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 if you call up the Parker National Wildlife Refuge, who  
 2 administers the Great Bay National Wildlife Refuge and you  
 3 say "well, we'd love to build an electric transmission  
 4 line through your Wildlife Refuge", we know the answer  
 5 will be "no".

6 But, I think, until we have really done  
 7 our due diligence, and we've evaluated the possibility,  
 8 and we say, "by the way, rabbits need scrub habitat."  
 9 That's what they're trying to build and maintain. They're  
 10 taking areas of trees or areas that are treed and then  
 11 weapon areas, and they're trying to get shrubby, low  
 12 vegetation there, exactly the types of habitat that you  
 13 see that exists in transmission rights-of-way.

14 So, we have someone that wants to build  
 15 and maintain shrubby or grassy habitat through the Town of  
 16 Newington. We have an endangered species that needs it,  
 17 and we have a wildlife management agency that's there.  
 18 But the problem is that they don't have the legal  
 19 authority to do it until someone brings our congressional  
 20 delegation on board.

21 So, I think this an opportunity that's  
 22 worth pursuing. And, as long as we just continue to ask  
 23 the folks at Parker Wildlife Refuge, you know, "Can we do  
 24 this?", they will continue to say "no", because they're  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 myself "My gosh, it really would be hard to put a  
 2 transmission right-of-way through a National Wildlife  
 3 Refuge." I suddenly remembered, we used to keep nuclear  
 4 warheads at a SAC base over here, and somehow we got  
 5 Reunion Day, which is when South Newington and the rest of  
 6 Newington were joined again by a road, that's named  
 7 McIntyre Road, after a New Hampshire senator at the time.  
 8 And, today, we have a Wildlife Refuge. And, there are,  
 9 you know, endangered cottontails they're trying to grow  
 10 out there, and that is very important, and I support  
 11 endangered species. I'm a former chairman of the  
 12 Conservation Commission. So, that's great.

13 But if we could manage to connect the  
 14 two halves of Newington, when we were worried about people  
 15 have a road going right by an area where they store  
 16 nuclear weapons, and we were able to do that through the  
 17 help of our congressional delegations, I'm sure we can  
 18 overcome the problem of rabbits. And, that's -- and, I  
 19 think that's important to remember. Because, as a  
 20 municipal lawyer myself, I know often the answers you get  
 21 will depend on who you ask. And, so, if you go to the  
 22 Department of Defense, and you say "well, we want to build  
 23 a road by where you store your nuclear weapons", well,  
 24 it's very obvious what answer you're going to get. And,  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 not being given the right legal authority to do that.  
 2 They're not being -- you know, PSNH -- excuse me,  
 3 Eversource has to come forward with a proposal to say  
 4 "Hey, we could do it this way, and it would actually be a  
 5 benefit for what you're trying to accomplish in the Master  
 6 Plan that they have for the Refuge."

7 So, I think what we need to do is think  
 8 of this as if it's a second Reunion Day. Where we are  
 9 going to build a new path, not a road this time, but a  
 10 transmission right-of-way through the area that was lost  
 11 to the Town, in order to protect Newington's residential  
 12 areas. And, this is something that people will not  
 13 understand, because, working in other towns, whenever I  
 14 hear people talk about "property values", you know, we  
 15 think robust markets. I mean, residences, single-family  
 16 residence, they exist all over the place.

17 My wife and I are outgrowing our  
 18 residence right now. The problem is, and we watch like  
 19 hawks the MLS listings, there are between three and six  
 20 properties a year, six being -- I'm just being  
 21 conservative, I think it's really only three, that go on  
 22 the market every year. There are two species of houses in  
 23 Newington. There are those that are really, really  
 24 rundown, like the one I own, that sell for \$350,000, and,  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 you know, they have swampy land and all sorts of problems  
2 with them. And, then, there are the houses that are worth  
3 5, 6, \$700,000, that working families that are here in  
4 town simply can't afford.

5 And, what's going to happen as a result  
6 of that is that, when these transmission lines come in and  
7 go through the Frink Farm and Gundalow area and the other  
8 areas in town, they may displace a lot of people, but no  
9 one has any choice, because there's only three to six  
10 properties, or whatever the number is, that go on to the  
11 market every year. And, it's a buyer's market. I mean,  
12 they get snapped up. So, people are going to be forced  
13 out of their homes, if they want to move away from these  
14 things. They will have nowhere that they can move to.

15 And, when you go to the cemetery in  
16 Newington, and, you know, it goes back to 1713 and  
17 earlier, the names that you see are things like, you know,  
18 the names that I see in this room today. I mean, you see  
19 Fletchers, Adamses, Frinks, deRochemont, Pickeringes. I  
20 mean, there's, I don't know, I mean, half the people in  
21 this room.

22 So, we're displacing people, you know,  
23 who this is their heritage. And, it's not my heritage, I  
24 don't want to give that impression. But they're not going  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 MS. McGUIRE: All right. Thank you.  
2 Christopher Cross.

3 MR. CROSS: Good evening. I'm  
4 Christopher Cross of 327 Nimble Hill Road. And, I have  
5 three concerns, they have all been mentioned far more  
6 eloquently and factually, but I have some experience with  
7 them that I would like to state on those.

8 As a prior Air Force pilot, I flew  
9 heavily-loaded aircraft from Pease that barely climbed  
10 above the median -- minimum climb gradient that Eversource  
11 are using. Had I lost an engine, I would have no choice  
12 but to sacrifice my altitude for airspeed in order to save  
13 my crew, and I would drop below the flight path. Military  
14 pilots don't have the choice that airline pilots not to  
15 fly. We go, even if there's a chance that some of us will  
16 get airborne if our military mission is needed.

17 By building this power line, Eversource  
18 is truly, in my feeling, risking the lives of our pilots  
19 in emergency situations. Recently, our New Hampshire  
20 senators worked to convince the Air Force to bring they're  
21 newest, heaviest tanker, the KC-46, as Jack actually  
22 mentioned, to Pease Air National Guard Base. What a slap  
23 in the face, not only of our senators, but also the Air  
24 Force, for Eversource to disregard the safety of our  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 to be able to move somewhere else. And, that's why the  
2 adverse effects of a transmission line that's going to be  
3 twice as high as what is there today is really so  
4 significant, because it's going to be uprooting families  
5 that are connected.

6 And, I don't want it to be -- I don't  
7 want the only reason to be that we do that because we  
8 failed to ask the right questions. And, we said "we just  
9 couldn't do it." And, we asked the Fish & Wildlife  
10 Service, and, of course, the law says "no, we can't build  
11 it here". I think it's incumbent on the Committee to ask  
12 the hard question, to say "Look, where is the letter from  
13 Senator Shaheen, from Senator Ayotte, from our  
14 congressmen, saying that they were unable to find a way to  
15 work this. And, what was it that PSNH brought to the  
16 table as a package to help the Wildlife Refuge in its  
17 mission, so this was a good mission for them, because  
18 constructing a transmission line in the right way is going  
19 to create excellent habitat for the Eastern cottontail.  
20 They have a program that they're trying to develop for  
21 that purpose. We could marry these two purposes together.  
22 We can protect the residences in town, which are really an  
23 endangered species into themselves. And, I can't stress  
24 that strongly enough. Thank you.

{SEC 2015-04} [Public Information Session] {04-23-15}

1 pilots and put a power line right in their flight path.  
2 It should be placed underground. There's no choice there.

3 Also, I've experienced the viewscape  
4 that many of the townfolks of Newington have experienced  
5 for some time. On Sundays, I sit in the town meeting  
6 house at the top of the hill that was built in 1711 and  
7 look to the northwest past the town cemetery, the  
8 protected Frink Farm sit, and see the hills of the  
9 Pawtuckaway State Park over the trees. Now, with  
10 Eversource's proposal, I will see new higher power lines  
11 and poles that stain that long-time idyllic view. Again,  
12 they need to go underground.

13 And, third, Eversource has refused to  
14 work with the Town to truly investigate alternative routes  
15 that are actually shorter and outside of our residential  
16 zone. The current Eversource easement was transplanted  
17 from Pease when they built the military base. When  
18 transferred, it went through open fields and forests in  
19 Newington, but today this route is through subdivisions  
20 and personal homes.

21 A shorter route between -- between  
22 Newington's residential zone and the Tradeport is possible  
23 and has been identified. It's shorter, a half a mile. It  
24 also would require a shorter distance not underground, if  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 all cannot be put underground.  
 2 It could be paired likely with only  
 3 one-time contributions, this was mentioned, to  
 4 improvements at the Great Bay Wildlife Refuge that could  
 5 use that funds. And, there are dormant PSNH easements  
 6 that could come into play to lower the cost, and there is  
 7 also other areas of landfills and wetlands that it could  
 8 go over that have little value for the Tradeport to  
 9 extract on this route.

10 I find it really inexcusable that  
 11 Eversource has refused for the last year and a half to  
 12 work with the Town, as we first proposed, to look at these  
 13 other routes seriously and to refine it, because the Town  
 14 has always shown a willingness to provide power to this  
 15 area, to provide an amicable [sic] way that will provide  
 16 the power and still preserve our residential core. Thank  
 17 you very much.

18 MS. McGUIRE: Thank you. Sheryl Bagley.

19 MS. BAGLEY: Hello. My name is Sheryl  
 20 Bagley. I love the Town of Newington. I live at 30  
 21 Hannah Lane. So many times in hearings like this I've  
 22 heard "Not in my backyard." "If it's not in my backyard,  
 23 I don't care." Well, let me say, this is in my backyard  
 24 literally. I have been a good neighbor to PSNH for a long  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 beautiful flier, about "transmission right-of-way  
 2 restoration". And, I look at my right-of-way now, and it  
 3 looks like a wood chipper came through my woods. Imagine  
 4 my wooded lot now is soon to be called "scrub habitat",  
 5 and not scrub habitat, it looks like a tornado came  
 6 through. There's wood chips out there. And, I really  
 7 want to talk to the selectmen about what's going to happen  
 8 to my property? Because it looks like -- it looks like a  
 9 wood chipper. I don't know understand right-of-way  
 10 restoration.

11 Again, I came here wanting to ask  
 12 questions, and I understand that I cannot ask questions  
 13 now. So, I will form my questions in a statement. My  
 14 property looks like wood chips went through, and I'm very  
 15 upset.

16 Finally, I meet with Chris Cross every  
 17 week. I sit with him at the Town Meeting Hall on Sundays.  
 18 And, I do share his view looking over Nimble Hill Road.  
 19 And, it is a beautiful view. As I've been talking to  
 20 other residents, one of the things I hear is like "oh, the  
 21 power line is not going through my yard." And, I can  
 22 understand, there are not very many residential areas in  
 23 Newington where there physically are power lines.  
 24 However, this is going to affect all of the residents in  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 time. In fact, I share my dog run with the power lines in  
 2 my backyard. My dog runs back and forth. I believe I am  
 3 in the right-of-way now. My deck is within the new  
 4 right-of-way. And, when the new power lines go up, I will  
 5 be living in the shadow of these power lines. And, I have  
 6 to say, I am very concerned about the electromagnetic  
 7 fields. These power lines will be going over my bedroom,  
 8 they will be going over -- a shadow of them will be going  
 9 over my son's bedroom, and my grandchildren's.

10 I've lived in Newington for 15 years  
 11 now. It's a beautiful town. I come from North Dakota,  
 12 where there are no trees. I love my town, and I love my  
 13 property. I live on a wooded lot.

14 Wanted to add insult to injury, today,  
 15 as I was looking at the display out here and talking about  
 16 the property restoration, I saw a picture of my property.  
 17 And, it's a wooded lot. It is wooded, with just a little  
 18 right-of-way outside of my deck. And, the Eversource  
 19 people explained to me that the trees that I could see on  
 20 my property were shadows, they weren't actually trees.

21 Well, to add insult to injury, I came  
 22 home this winter and I see that the right-of-way has  
 23 started to be cleared out. It's gone out, I imagine, 20  
 24 feet from the old right-of-way. I can see, on this  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 Newington. As you go up and down Nimble Hill Road, you're  
 2 going to be seeing huge power lines. We're going to look  
 3 like an industrial site. We'll see it from the Town Hall,  
 4 we'll see it from the Town Meeting Hall. It's going to  
 5 affect all of us, not just me, because it's in my  
 6 backyard.

7 But I talk to Chris every Sunday and I  
 8 say "What's happening? What's going on? Are you talking?  
 9 Are you talking to the lawyers?" He says "Yes. We're  
 10 proposing alternative routes. We're talking, we're doing  
 11 this." Eversource will not respond to us. Every proposal  
 12 we've given, they have ignored us. And, I don't  
 13 understand why? Why it's come to this? And, now, we're  
 14 essentially powerless here, with no options, when our Town  
 15 has been trying so hard to negotiate prior to this.

16 And, that is my final statement, in the  
 17 form of a question, is what happened? How did we get to  
 18 here without any other options? Thank you.

19 MS. McGUIRE: Thank you. Appreciate it.  
 20 Martha Fuller Clark.

21 SEN. FULLER CLARK: Good evening.

22 MS. McGUIRE: Good evening.

23 SEN. FULLER CLARK: I'm Martha Fuller  
 24 Clark. I am a senator for the Town of Newington. And, I  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 am here this evening to listen to what everyone has had to  
 2 say. I'm here to say that I support them. That I am  
 3 dismayed that there hasn't been an opportunity in this  
 4 process for a true vetting of alternatives, a true  
 5 understanding on what the choices might be. It seems like  
 6 we're going down a narrower and narrower path, with little  
 7 or no options. We need to understand what those  
 8 alternatives are. What are the costs associated with  
 9 those alternatives. And, if a community were to choose to  
 10 bear the burden, or this entire area, to choose to bear  
 11 the burden of the increased costs, which I have been told  
 12 is \$10 million for every mile. All right. So, that would  
 13 be \$120 million. But that's just what we've heard from  
 14 Eversource. I want to know if there's a way to get some  
 15 outside independent evaluation of, actually, are those  
 16 valid projections of what it would cost in increased  
 17 dollars for this entire plan? We don't know that.

18 And, how we take into consideration the  
 19 quality of life, the value, the economic value of that  
 20 quality of life, which is so important to the State of New  
 21 Hampshire, as we figure out, you know, the tradeoffs  
 22 economically. We've heard technically that these lines  
 23 can be buried, you know, but we haven't really seen a  
 24 willingness on the part of Eversource to address that up  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 put in this pre-hearing process, but already it feels like  
 2 it's too far down the road. Thank you.

3 MS. MCGUIRE: Thank you, Senator. Gary  
 4 Kiedaisch -- you'll have to say that and spell that one.

5 MR. KIEDAISCH: I'll maybe have to spell  
 6 it like Cos did. That's Gary Kiedaisch,  
 7 K-i-e-d-a-i-s-c-h. And, thank you for the opportunity to  
 8 comment. I will not reiterate so much of what I've heard  
 9 tonight, which everybody has done so eloquently and so  
 10 well. But I stand before the Eversource people tonight,  
 11 not only as a 15-year resident, with no family members in  
 12 the cemetery yet, but as a CEO of six companies over the  
 13 last 26 years. Three of which were public, two of which  
 14 were private, and they range in sizes from 2 billion, down  
 15 to \$100 million. And, what this is all about is a private  
 16 company effecting undue adverse impact on this town.  
 17 Every company, private or public, has the social  
 18 responsibility to do what's right. And, in this case, I  
 19 will represent to the executives and to the private  
 20 investors of your company, you're not doing what's right.

21 And, if you go forward, without looking  
 22 at other alternatives and hearing out what this town has  
 23 passionately asked you to do, then you're violating your  
 24 social responsibilities, and you shouldn't be the  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 front in a way that is negotiable. And, I think that is a  
 2 real disappointment.

3 And, I would hope that, as part of the  
 4 SEC process, that they will take that into consideration,  
 5 that, you know, there were other alternatives in 2012 that  
 6 were rejected, that would have not involved having the  
 7 power line development that we're seeing today. That was  
 8 rejected. Why? We don't know why that was rejected.

9 And, that even here we've looked at --  
 10 heard about three or four different choices. One of the  
 11 choices we haven't talked about at all. We had the answer  
 12 here early on about "is it needed?" I would like to see  
 13 more evidence that it's needed. I'd like to know, we're  
 14 looking at creating the pipeline for the electric energy  
 15 through these transmission wires. But where is this  
 16 energy going to come from and where is it going? And, I  
 17 think that's part of the package as well.

18 So, I'm just here tonight to pose some  
 19 additional questions, to say, I, too, am willing to work  
 20 with the Town of Newington. I'm willing to work in  
 21 relationship to the statute that was reformulated last  
 22 year. And, if we need to look at going forward, that the  
 23 process that we put in place isn't effective enough, how  
 24 can we change it so that it will be more effective? We  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 executives. Whether you stand there with your hands  
 2 folded, and negative posture, sir, if you were one of my  
 3 executives, I'd have a discussion with you about your  
 4 posturing.

5 UNIDENTIFIED SPEAKER: I'm listening.

6 MR. KIEDAISCH: You need to let -- and,  
 7 as a warning to the Town, there's a saying in business,  
 8 that "You never want to let the camel's nose get inside  
 9 the tent, because the next thing is the entire camel is  
 10 inside the tent." And, what you heard tonight, what you  
 11 heard that this region is the fastest growing region in  
 12 the state, and that we're going to have all this increased  
 13 demand going on for a long period of time. So, are we  
 14 just looking at the camel's nose now? And, what do those  
 15 transmission lines look like five, ten, fifteen, twenty,  
 16 fifty years from now?

17 There's been a lot of discussion about  
 18 how small and how precious our little piece of paradise is  
 19 here. And, it's ashame what happened to the Town so many  
 20 times over. And, if you want to have good view of  
 21 paradise lost, and some of you -- if any of you ever went  
 22 to Disneyland in Anaheim, California in the '60s, if you  
 23 remember the '60s, you'll have a very different impression  
 24 of what Anaheim, California looked like in 1960 and what  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 it looks like today. I was there just a couple of months  
2 ago. It looked like a spaghetti western of power lines,  
3 transmission lines going every possible direction. It is  
4 paradise lost.

5 This is an opportunity, one opportunity  
6 to stop a further assault on our town. I totally support  
7 everything that was said tonight. And, I personally am  
8 going to fight it as hard as I can. And, thank you to the  
9 Town and thank you to the selectmen for all that you're  
10 doing to help us.

11 MS. McGUIRE: Thank you. Alexandra  
12 Jacobs?

13 MS. JACUCH: Jacuch.

14 MS. McGUIRE: J-a-c-u-c-h.

15 MS. JACUCH: Hi. I'm Alex Jacuch. I  
16 live at 236 Little Bay Road. And, I am not fully educated  
17 at everything that's been going on. I have been trying to  
18 follow it in the newspaper, reading everything I can about  
19 it, stopping in and talking, and just listening to the  
20 people who came before me speaking tonight. I appreciate  
21 all the work and information you provided.

22 So, I can just tell you, as someone  
23 living in town, who has a young child, you know, what my  
24 thoughts are. And, my first concern is health concerns.  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 well the town has done in preserving the historic and the  
2 residential districts, yet maintaining everything moving  
3 forward, but they have done it in a way that honors the  
4 industry, the businesses, and the people and the history  
5 as well. And, I don't get the sense of everything that  
6 I've heard that Eversource is doing that. And, I think  
7 that breeds a lot of hard feelings. And, I hope that  
8 there's still a lot more time to work this out in a way  
9 that's going to be best for everyone.

10 I think that's -- I think that's all I  
11 have to say.

12 MS. McGUIRE: Thank you very much. I  
13 don't have any more names on the paper.

14 MR. NAWROCKI: I meant to put my name,  
15 could I go?

16 MS. McGUIRE: Come on up.

17 MR. NAWROCKI: Okay. Awesome. All  
18 right. So, --

19 MS. McGUIRE: Okay. Just wait until you  
20 get to the microphone.

21 MR. NAWROCKI: Yes.

22 MS. McGUIRE: And, would you say your  
23 name please.

24 MR. NAWROCKI: My name is Keven  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 I don't know a lot about, and I wanted to learn a lot more  
2 about, but I'd like to also learn from someone other than  
3 Eversource, some of the, you know, issues surrounding  
4 electromagnetic fields and other emissions. I want to  
5 know and to find out more about, if it's buried  
6 underground, does that alleviate that issue? Of course, I  
7 think, as everyone here would love to see it, if those  
8 lines are going in. And, I fully support supporting the  
9 community we live in. I don't believe in "not in my  
10 backyard, but someone else's". So, but, again, has  
11 everything been done to work with the people that live in  
12 the town, and what we go through and what we value in our  
13 quality of life. That, however the lines go in, it's  
14 going to be first in the safest way. And, second, in a  
15 way that honors the people in this community. And, like  
16 others have said, and I also fully support everything that  
17 everyone has said before me.

18 This is an old, rich, and historic town.  
19 And, people that decide to move here, like we did 20 years  
20 ago, and start our family here, really cherish and value  
21 this piece of life here. And, I look around and I look at  
22 the industrial businesses down on the waterfront, on  
23 Shattuck Way, and the malls and everything over there,  
24 down on, whatever that road is, Woodbury. And, I see how  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 Nawrocki. And, I'm here to --

2 MS. McGUIRE: Okay, sir. Keven, would  
3 you spell your last name.

4 MR. NAWROCKI: Oh. Yes. Yes, it's a  
5 tough one. N-a-w-r-o-c-k-i. So, one issue that has been  
6 coming up a couple of times is the issue of the  
7 electromagnetic frequencies put off by this proposed  
8 Project, through this line, through this 115 kV unit.  
9 Well, you know, as -- I spoke to three lovely ladies today  
10 that are much old -- they have been around much longer  
11 than me, and they remember back when there was a fish in  
12 the Great Bay/Little Bay, the rainbow smelt, that this  
13 fish comes in annually for its breeding purposes, of  
14 coming through the East Coast, coming into the Great Bay,  
15 going into the Little Bay, and then they spawn there.

16 Now, the problem with the proposed route  
17 of having this power line go under water is that that  
18 electromagnetic radiation, you know, fish, a lot of fish,  
19 the rainbow smelt, uses their perception of  
20 electromagnetic frequencies in the Earth's geomagnetic  
21 frequency -- I mean, you know, fields, that's how they  
22 navigate, to get in and out of water systems through their  
23 perception of electromagnetic frequencies.

24 Now, I don't know about electromagnetic  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 frequency effect on human health. I personally have some  
 2 worry about that. But that's not something that we can  
 3 measure. We can't understand how electromagnetic  
 4 frequencies are going to affect human health. But we do  
 5 know that they affect the ability for fish to navigate.  
 6 And, this could be catastrophic. It would not -- I  
 7 wouldn't be up here if this wasn't on the East Coast, if  
 8 this wasn't such an important migrational pattern area  
 9 that would be affected directly by just this Project. I  
 10 wouldn't be here, you know. But this scares me. This  
 11 legitimately scares me.

12 That's all I have to say.

13 MS. MCGUIRE: Thank you.

14 UNIDENTIFIED SPEAKER: Judge, we have  
 15 another gentleman who would like to speak.

16 MS. MCGUIRE: Okay. Sure.

17 MR. FRIZZELL: Hi. My name is Keith  
 18 Frizzell, F-r-i-z-z-e-l-l. I'm a Newington resident.  
 19 And, I'm not going to rehash what everyone has said,  
 20 because it's already been said. However, one thing that I  
 21 have noticed is, you have all these people in the room,  
 22 and I haven't heard a single person come up and say "Hey,  
 23 that's a great idea." You know, everyone is against it.

24 And, I think about the whole idea of an  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 MS. MCGUIRE: Thank you, Mr. Frizzell.

2 MR. BELANGER: Hi. James Belanger,  
 3 from -- from Newington.

4 MS. MCGUIRE: Belanger?

5 MR. BELANGER: Belanger,  
 6 B-e-l-a-n-g-e-r. I'm very proud of being in Newington. I  
 7 agree with all the comments that were said today. I'm  
 8 very much against this Project going through the  
 9 residential core of Newington, for multiple reasons, as  
 10 discussed.

11 There are other routes. Avoidance,  
 12 certainly, is the best route. Underground -- avoidance is  
 13 better than underground, overhead simply not acceptable.  
 14 There you go.

15 MS. MCGUIRE: Thank you.

16 MR. KELLY: Hi. Thank you. My name is  
 17 Albert Kelly. I'm a resident of Rye. I have a business  
 18 on Shattuck Way, over, across from Tyco. And, the  
 19 difference between the normal power lines and the ones  
 20 they're proposing is there's one over there, right across  
 21 from my office window, and it's a disaster.

22 And, I take the route by the Frink Farm  
 23 at least five times a week, sometimes I'll go around the  
 24 Great Bay Marina. I go the back -- I go home to Rye from  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 alternate route. You have all these people that are  
 2 against this Project. However, there's an alternate route  
 3 that is really going through one property, Pease  
 4 Development, all right, the Pease Air Force Base.

5 As a utility, you're coming in contact  
 6 and dealing with the state, federal government, local  
 7 governments all the time. I'm sure you have great working  
 8 relationships with them. You have to deal with them all  
 9 the time, with all kinds of upgrades on existing lines  
 10 such as this. But here's an opportunity to create a new  
 11 route, alleviate an issue in the town, not create a bigger  
 12 problem for everyone in the town, and it only requires  
 13 dealing with one person, you know, or a group of people,  
 14 but one entity, Pease Development Authority. You can skip  
 15 all of the residential area. It's an area that is treed.  
 16 So, it would do a good job of hiding those towers.

17 The existing towers, the primary -- the  
 18 primary route that it goes through now in Newington is  
 19 essentially fields or open areas with houses. There is no  
 20 way to hide those large towers. You know, outside of the  
 21 fact that they're going to be in people's backyards, but,  
 22 when it goes through a wooded area, there is concealment  
 23 right there, through the Pease Development. The Pease --  
 24 Pease Air Force Base offers all of those items.  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 McIntyre Road. And, I do that because it's beautiful. I  
 2 was born and raised on Dover Point. I still own my  
 3 mother's house. I own a significant amount of acreage on  
 4 Adams Point.

5 And, of course, when this came up, I'm  
 6 like "Oh, my God, they're going to run power lines  
 7 through." Well, I'm saved, right, because I'm south. I'm  
 8 not going to see them. But it's not in my backyard, but I  
 9 can say that, even if it's one person's backyard, one  
 10 resident's backyard, with the understanding that most  
 11 people, their largest asset is in their home. That that's  
 12 where their equity, that's where their wealth, that's what  
 13 they pass onto. That is what they have. And, to think  
 14 that you're going to destroy that person's equity, because  
 15 you're going to have these awful-looking power lines is a  
 16 disaster for this community.

17 And, two more points. I looked at a  
 18 piece of land to buy in Rye, I was about to buy it. This  
 19 is two years ago. The lot, I thought, you know, I'd buy a  
 20 nice lot. Well, the leaves fell and I saw the cellphone  
 21 tower that might have been in North Hampton. I  
 22 immediately walked from that property. I mean, I didn't  
 23 have any interest in that property at all. I don't want  
 24 to look at the cell tower. And, the cell tower, frankly,  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 is pretty attractive compared to the power lines you're  
2 talking about.

3 And, I think -- I think, as a group,  
4 that there's a lot of people here. And, I've been in the  
5 area my whole life. And, you know, I think Representative  
6 Fuller who mentioned the pipeline. And, I got a flashback  
7 of 50, 40 years ago of the Onassis potential nightmare,  
8 that really was a passionate topic in the area. I was  
9 eighth grade/freshman year in high school. And, to think,  
10 I can remember the names of Dudley and Sandburg, and these  
11 people fighting to stop that. And, could you imagine, if  
12 that was successful, what this area would be like today?

13 So, the very experienced executive  
14 talking about the water, the effect of the water, never  
15 mind the oysters that are an issue, in the river, some  
16 great comments were made up. But, you know, "the camel's  
17 nose in the tent", I think that was beautiful. And, I  
18 think you have to band together and to overcome this and  
19 put them underground, you're going to have to fight. And,  
20 you're going to have to create a committee.

21 And, it isn't in my backyard, but I  
22 would like to treat it like it is. And, I think, if  
23 everybody bands together and calls their senator, and, I  
24 mean, Shaheen, whatever it takes, and throw some political  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 capital around, because we vote first, and there is  
2 nothing but elections in here, in New Hampshire. So,  
3 throw your own weight around. Because we think there's a  
4 lot of people here, but there really isn't.

5 Because, once again, Newington is being  
6 asked to support the greater good for the rest of the  
7 region at Newington's expense. And, Newington is a  
8 beautiful town. And, I just own the commercial property.  
9 And, I really think you ought to create subcommittees and  
10 push this forward and very hard up in Concord. Thank you.

11 MS. McGUIRE: Thank you. And, would you  
12 like to speak?

13 MS. HEBERT: My name is Ann Hyland  
14 Hebert.

15 MS. McGUIRE: Ann?

16 MS. HEBERT: Hyland, H-y-l-a-n-d,  
17 Hebert, H-e-b-e-r-t. Newington is a community. It's a  
18 small community. We are a family. Eversource management  
19 executives this evening said "we considered", "we  
20 discussed", "we reviewed", "we looked at", "we designed",  
21 "we analyzed the cost of". Who is "we"? Newington did  
22 not have a seat at that table. We requested a seat at  
23 that table.

24 You made your decision. We are not a  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 small town. We're little, but we have a very big voice.  
2 "We" is now "us", and we are here. Thank you.

3 MS. McGUIRE: Thank you. Sir.

4 MR. VIETAS: Good evening. I moved to  
5 Newington about twenty --

6 MS. McGUIRE: Sir, would you tell us  
7 your name please.

8 MR. VIETAS: Oh. My name is Larry  
9 Vietas, that is V, as in Victor, i-e-t-a-s. And, I've  
10 been a Newington resident for over twenty years. I came  
11 to this town because of the rural character of it. And,  
12 these power lines that are proposed to go through the  
13 town, and the structures that are supposed to support  
14 them, are going to ruin the whole effect of this beautiful  
15 town.

16 The people have voiced that tonight, and  
17 they have given many reasons beyond the visual effect of  
18 the town. And, I thank -- I support all of these reasons.

19 There's one thing that I did -- I don't  
20 want to repeat everything that was said, but the  
21 electromagnetic field, there's been studies that talk  
22 about the electromagnetic field. But there's no  
23 conclusive evidence that there's no harm to individuals,  
24 people, who are in close proximity to that electromagnetic  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 field, and live day in and day out and sleep with that  
2 effect, maybe real close to their house, and the effects  
3 of that over years.

4 Many years ago, we had a wonderful  
5 product called "asbestos". And, everyone thought that was  
6 the greatest thing. We all know now what the effects of  
7 that are on people today.

8 I'm sure that this electromagnetic field  
9 would be better if it was run through the Wildlife  
10 Preserve. I think, if we got a few deer that might have  
11 some effects, it would be much better. In fact, the deer  
12 are kind of over-populating Newington, as far as I can  
13 see.

14 Anyway, that's one thing that I would  
15 like to see, is that this be routed through the Wildlife  
16 Preserve, not through the Town of Newington. And, if  
17 necessary, at all last resorts, it should be underground.  
18 Thank you.

19 MS. McGUIRE: Thank you.

20 MS. PREFONTAINE: I'll just go ahead and  
21 spell my name. Lisa Prefontaine, P-r-e-f-o-n-t-a-i-n-e.  
22 I want to reiterate some of the comments that were made on  
23 the electromagnetic fields, especially Larry's concern on  
24 where those lines are placed.  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 For those who don't know, I am a  
 2 healthcare provider. And, I do evidence-based --  
 3 (Court reporter interruption.)  
 4 MS. PREFONTAINE: -- evidence --  
 5 evident-based medicine. So, I am doing medical research  
 6 and writing. And, as Larry mentioned, the effect of EMF  
 7 are inconclusive. But the early studies have shown that,  
 8 yes, it does have a negative effect, even when buried. So  
 9 that means, if you live near the line, I'm not just  
 10 talking to the lines over your head, I'm talking the lines  
 11 below your feet. The earth does not shield the magnetic  
 12 effect that we would have with these lines. And, in fact,  
 13 I confirmed that tonight when I came in one with one of  
 14 the engineers supplied from Eversource. And, of course,  
 15 it was a little bit sugarcoated, and "Oh, well, you know,  
 16 the studies are really just poor quality, they're not  
 17 cohorts. So, we can't say anything."  
 18 But I can tell you, from the studies  
 19 that I've seen, that, yes, we can say something. Can we  
 20 make a direct correlation? No. But what we can say is  
 21 that there's enough evidence to suggest we need more  
 22 research. That research takes time.  
 23 Yes, I know we need power. Yes, I know  
 24 that power has to come from somewhere. We all get that.  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 But there's no rush to do this tomorrow. There's no one  
 2 saying this has to be in by 2016. We may need the power  
 3 twenty years from now. But what we don't want, is thirty  
 4 years from now, all of a sudden we have this huge  
 5 environmental impact on our human health. So, we might as  
 6 well just call Erin Brockovich now, have her start  
 7 studying now on the impacts of what's going to happen to  
 8 us.  
 9 And, like Larry mentioned, asbestos was  
 10 a great thing, tobacco was a great thing. Now, look what  
 11 has happened. So, why rush? Why not take the time and  
 12 have independent studies done? Not from Eversource, no  
 13 offense, but somewhat discriminatory. Get some evidence,  
 14 get some research out there and see what other sources we  
 15 can look at, and then take that information and reroute  
 16 the lines to a place that has minimal impact.  
 17 I appreciate the comments about the bay.  
 18 That's fantastic. Didn't even think about that. Kudos to  
 19 you. And, while I don't want to see anybody impacted,  
 20 whether it's wildlife or humans, you do have to, at some  
 21 point, balance out which is the worst of the two evils.  
 22 Of course, nobody wants it through the bay or through the  
 23 Wildlife Refuge. But which is worse? Having a deer or  
 24 two have an impact or loss of human life? I'm not sure.  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 One thing I can see -- can say that,  
 2 through my own observations in healthcare, one of the  
 3 comments that we're investigating currently from EMF is  
 4 the impact on metal implants and electronic implants in  
 5 people's bodies. This town is not a young town. We have  
 6 a lot of population that are over the age of 50. How many  
 7 people in this room have a hip implant? That alone, a  
 8 giant piece of metal, think about this logically, you  
 9 can't even go into an MRI with a giant piece of metal in  
 10 your body. Granted, the Tesla of that, the magnetic waves  
 11 are condensed, it's not the same as being right near a  
 12 power line.  
 13 But the point is that this magnetic  
 14 field has an impact on people. And, then, if you've got a  
 15 hip implant, you've got a defibrillator, got any metal  
 16 implant in your body, you're going to feel those effects  
 17 even more.  
 18 So, while I can say I agree with  
 19 everyone that we don't want to see these lines, it's  
 20 better to bury them, whatever, you're not shielding  
 21 yourself by burying them. So, they need to be moved  
 22 completely away from the residential area. The farther  
 23 away they are from the magnetic fields, the lower the  
 24 effects will be. They need to be far enough away that we  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 all don't get sick.  
 2 And, as Ann Hebert had mentioned, we're  
 3 a family. I don't want to see one person in my family  
 4 hurt by this power line, and by the unconscionable lack of  
 5 consideration about alternatives. I don't care about the  
 6 costs. You can't calculate the cost of loss of human  
 7 life. You can't calculate the cost of health over a long  
 8 period of time. So, it may cost a little more money and  
 9 may take a little more time. But wouldn't that time be  
 10 better well spent researching your options than worrying  
 11 about my family thirty years from now.  
 12 MS. MCGUIRE: Thank you.  
 13 MR. METZGER: Hi. Mike Metzger, from  
 14 Welch Cove, 23 Welch Cove. I moved here about two years  
 15 ago. One thing I haven't heard is that, we've all been  
 16 talking about the visual impact of the lines going in,  
 17 which is fairly obvious, but no one has mentioned that  
 18 these things actually make a fairly annoying hum. I grew  
 19 up in New Jersey, I used to play around power lines. And,  
 20 I mean, -- but, I mean, you're actually going to hear a  
 21 steady hum from these. So, if these come right near your  
 22 house, you know, it's not just the visual impact when  
 23 there's daylight, but, when you're trying to sleep, and  
 24 you've got your window open, you're going to hear the  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 "zzzz". So, there's that to consider.  
 2 The second thing is, you're seeing the  
 3 gradual transition from, we have the smaller, you know,  
 4 the present smaller poles, we're going to upgrade, the  
 5 poles are going to get larger. Well, guess what? In  
 6 twenty years, the Company is going to come through again  
 7 and say "we're going to need to put the huge power line  
 8 that you see everywhere." I think that's just going to be  
 9 the natural evolution. And, I think you've got to kind of  
 10 nip it in the bud and, you know, do the right thing  
 11 aesthetically, personally, I think, you know, bury the  
 12 whole thing now.

13 In terms of putting it in the Wildlife  
 14 Preserve, I'd be okay with that, except it looks like  
 15 there's two proposed routes. One is deep within the  
 16 Wildlife Reserve, and the other one is right along the  
 17 edge, which, again, is, you know, right along, basically,  
 18 my neighborhood, about four or five other houses.

19 So, you know, I just want to make sure  
 20 that, when people say "Yeah, yeah, put it in the Wildlife  
 21 Preserve." I was like, "well, where?" You know, they're  
 22 right around the border, in the field, which is back to  
 23 problem number one.

24 But I don't know. I just think other  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 F-r-i-n-k. I understand that Public Service got out more  
 2 or less of their generating business or is trying to get  
 3 out of the generating business and has gone into the  
 4 transmission business now as Eversource. But my question  
 5 is, if we're talking about local reliability projects, why  
 6 is it that Public Service down on Gosling Road is shut  
 7 down? Why are generating plants in the area sort of, I've  
 8 heard rumors, in danger of shutting down? I mean, if you  
 9 want reliability of power, isn't it better to have a power  
 10 plant in your backyard that you already have than power  
 11 from some unknown source, maybe Canada, coming through  
 12 these power lines?

13 And, who are the generators, if it isn't  
 14 Public Service? Are these small companies now out of  
 15 business because of competition or cheap power that is  
 16 coming through these lines? I think that small is  
 17 beautiful, and local is great. And, I don't know why the  
 18 power plants that we have here aren't working, if there's  
 19 this great huge demand.

20 So, maybe we need a somewhat bigger -- a  
 21 bigger picture or a larger entity to look at our power  
 22 needs, and find out why Public Service, down on Gosling  
 23 Road, which is the terminus of this Project, is not any  
 24 longer a generating plant. Thank you.

{SEC 2015-04} [Public Information Session] {04-23-15}

1 countries seem to get this, kind of a -- you know, you go  
 2 throughout Europe, and for some reason, maybe because  
 3 there's nothing, you know, they tend to get aesthetics  
 4 more than we do, and they tend to preserve their cities  
 5 and towns. And, you really don't see telephone poles  
 6 anywhere in Europe, because -- and they will pay the extra  
 7 money to sink them, because it really makes a huge  
 8 difference aesthetically.

9 (Court reporter interruption due to  
 10 someone speaking from the audience.)

11 MS. McGUIRE: Sir. Sir.

12 MR. METZGER: That's all I had to say.

13 MS. McGUIRE: He needs to take an  
 14 accurate record. Hello.

15 MS. BUSH: Hi. I'm Carol Bush, 40  
 16 Hannah Lane. We probably live the closest to this  
 17 power -- the current power line. And, within the last, I  
 18 don't know, five years, five, six years, we've had two  
 19 dogs die from cancer. And, I just had surgery from  
 20 cancer -- for cancer. So, I really -- I don't know about  
 21 the electromagnetic stuff, but I -- they can't convince me  
 22 it's not dangerous.

23 MS. McGUIRE: Thank you.

24 MR. FRINK: Yes. I'm John Frink,  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 MS. McGUIRE: Thank you.

2 MR. HAAS: My name is Tommy Haas.

3 MS. McGUIRE: Tommy?

4 MR. HAAS: Yes. Haas, H-a-a-s. I'm a  
 5 resident of Durham. I live right on Great Bay. And, I'm  
 6 concerned about the environmental impact of specifically  
 7 the buried lines that would go through Little Bay. If  
 8 they're -- if they were to be, I heard the man with "the  
 9 camel and the nose" talking about blasting or the soil  
 10 needing to be resettled, if that was done through the use  
 11 of explosives, it would put up a lot of soil. It would  
 12 displace a lot of marine life. It would very much disturb  
 13 the delicate mineral balance in the bay that's required  
 14 for life to exist there.

15 And, depending on what type of cables  
 16 they are, certain cables can actually emit environmental  
 17 pollutants, physical environmental pollutants and  
 18 different minerals that could disrupt the mineral balance  
 19 even further.

20 I'm also concerned about the  
 21 electromagnetic effects on the navigation of different  
 22 species through that area. Thank you.

23 MS. McGUIRE: Thank you.

24 MR. RAYMOND: My name is Bob Raymond. I  
 {SEC 2015-04} [Public Information Session] {04-23-15}

1 live at 5 Gundalow Landing. And, I'm fortunate enough to  
2 have one the current poles in my yard decorating it. I'm  
3 not looking forward to the future.

4 My only comment is that, I, you know,  
5 all the comments that were made tonight very rational, you  
6 know, very effective. I worry about the process. I worry  
7 about the SEC taking into account what people are saying.  
8 I'm worried about that. I don't know how to proceed from  
9 here, but I will follow this as closely as I can.

10 And, I have one modest proposal to  
11 suggest, that the people from this Company, perhaps we  
12 could supply them, if they go ahead with this project, we  
13 could make sure they all have one of these poles in their  
14 yard as well. Thank you.

15 MS. McGUIRE: Is there anyone else who  
16 would like to speak?

17 (Show of hands.)

18 MS. McGUIRE: Okay. I want to make sure  
19 everybody else has spoken for the first time. Does  
20 anybody else want to speak for the first time?

21 MR. GETCHELL: Well, I spoke yesterday  
22 in Durham, but I --

23 MS. McGUIRE: Oh. Well, we won't count  
24 that.

{SEC 2015-04} [Public Information Session] {04-23-15}

1 And, we lived in Portsmouth for about twenty years. Used  
2 to take bike rides through Newington. And, my wife one  
3 day said "this is such a beautiful place, we've got to  
4 live here." And, we were lucky enough to pick up one of  
5 those three or four houses that comes up every year. And,  
6 one of the poles does go -- it's certainly visible from my  
7 property, not in my backyard, but close enough.

8 And, I just really ask that the people  
9 at Eversource consider all of the great points that people  
10 have brought up in the room, and wanted to make sure we  
11 get on the record. So, thank you.

12 MS. McGUIRE: Thank you. Anybody else  
13 who wants to speak for the first time?

14 (No indication given.)

15 MS. McGUIRE: Okay. Mr. Hebert.

16 MR. HEBERT: Thank you. Denis Hebert,  
17 Gundalow Landing. Thank you for, again, I know you've  
18 been standing here for a long time.

19 MS. McGUIRE: No, that's --

20 MR. HEBERT: And, then, doing it two  
21 nights in a row, that's pretty tough.

22 MS. McGUIRE: Well, when you're  
23 young, --

24 MR. HEBERT: Yeah, you're right.

{SEC 2015-04} [Public Information Session] {04-23-15}

1 MR. GETCHELL: My name is William  
2 Getchell, G-e-t-c-h-e-l-l, for the Foster's, who thought I  
3 was "Gatchell".

4 I, too, will have a pole in my yard, and  
5 will maybe have four poles there, I don't know. To speak  
6 to going under the bay, what Tom DeCapo spoke of earlier,  
7 I've been going there since 1960, there's a picture of me  
8 as a little baby there. Twice now the line under the bay  
9 has failed. So, all you're seeing, in this project that  
10 goes under the bay, may happen every fifteen, twenty years  
11 to the bay, if we choose this "across-the-bay route".  
12 That's all I have to say. Thank you.

13 MS. McGUIRE: Okay. Thank you,  
14 Mr. Getchell. Yes.

15 MS. CLARKIN: Good evening. My name is  
16 Pam Pappas, P-a-p-p-a-s, Clarkin, C-l-a-r-k-i-n. I just  
17 wanted to voice my concern and that I object to this  
18 proposal, this plan, as it has been presented to us.

19 And, that's all I wanted, to state my  
20 feelings towards the Project.

21 MS. McGUIRE: Thank you. Yes, sir.

22 MR. QUINN: Hi. My name is Steve Quinn.  
23 I've been in Newington for about six years. My wife and I  
24 and my family were drawn to the area due to its beauty.

{SEC 2015-04} [Public Information Session] {04-23-15}

1 MS. McGUIRE: -- it's no problem.

2 MR. HEBERT: What, you're 29?

3 MS. McGUIRE: Yes, probably that.

4 MR. HEBERT: I'm up here again because  
5 I'm questioning the process, of how now we're getting into  
6 the process. And, I'm going to get to the bottom line  
7 very quickly, but I'm going to go back as to the reason  
8 why.

9 I'd like to know if the SEC can remand  
10 or decide that this start, go back to ISO-New England to  
11 look at these other solutions that we feel have been set  
12 aside and not seriously looked into, as far as the  
13 alternate routes and alternate solutions, such as the  
14 autotransformer and so forth, that was proposed and I know  
15 it was discussed in great deal yesterday in Durham. And,  
16 it's an unfortunate option that has gone by the wayside,  
17 and, so, like the horse is out of the barn and ten miles  
18 down the road, and we're not going to get it back.

19 So, I'd like to talk about the process a  
20 little bit, so everyone understands it, and how this  
21 happened. ISO-New England has a responsibility of looking  
22 at the balancing of power within New England, and they do  
23 a really good job. And, they're required to do that.

24 Eversource then goes to them, makes some presentations,  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 and then they come up with the best solution. However,  
2 there's no one from here sitting at the table when those  
3 decisions are being made.

4 When that decision is being made, and,  
5 again, we were contacted in I think it was January 2013,  
6 originally, maybe it was -- I can't remember, maybe it was  
7 even 2012, in November. We proposed several routes to be  
8 considered. But what I discovered, after they did go look  
9 at them briefly, they did talk to the Pease Development  
10 Authority, they did talk to the FAA. They did talk to,  
11 again, the FAA -- the local FAA, not the ones that make  
12 the decisions. But we asked to be a part of the process  
13 right from day one, at least on those proposals that the  
14 Town made for them to consider. The answer was "no, we  
15 don't want you at the table."

16 I offered my time personally, as an  
17 electrical engineer, to sit down, and sign a nondisclosure  
18 statement saying that I'd be willing to sit in there and  
19 just make sure that they did their due diligence and would  
20 be a part of the process, and actually would be a  
21 proponent of theirs, if the end result was "this is the  
22 best solution." But we weren't invited.

23 Now, I think this is a big step in what  
24 we did tonight, because before it used to be something  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 Wildlife Refuge, when Pease Air Force Base went away. The  
2 comment was "Pease, we can deal with them, because we've  
3 worked with them before, and they're relatively easy to  
4 get along with, as far as dealing with sort of the public  
5 utilities and the PDA. But the Feds, oh, my God, we don't  
6 want to go there."

7 And, I said "Well, wait a minute. Give  
8 us the opportunity to try and be there with you to  
9 discuss -- make these discussions." They said "No, we're  
10 not going to do it." I mean, "you're not welcome to do  
11 that." So, I mean, it wasn't that bold. It was just like  
12 "No, we're going to take care of it. We're going to give  
13 it a try."

14 Several months go by, you know,  
15 somewhere between March, and I think we finally got an  
16 answer I think it was either November or December of last  
17 year, and we finally heard that they did not want to do  
18 those options.

19 I feel like a lot of time was wasted.  
20 And, if this Project is so important it has to happen so  
21 quickly, why did we wait so long, to come back and tell us  
22 "no, we can't do it", when they already had their minds  
23 made up, in my opinion, based on working with them, that  
24 they weren't going to do any other option. This was it.  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 completely different. It didn't even have these times or  
2 opportunities for you to get up and speak. But we missed  
3 the mark, I think. And, I think our state representatives  
4 would, I think, if they saw what was going on, and know  
5 Senator Martha Fuller Clark is here, and I think she's  
6 seeing these things, and I think she does want to make  
7 some changes or propose some changes later, but here we  
8 are now with this process. I know we need power soon in  
9 the region, and I think the Town wants to support power,  
10 but not the way it's being done, as I said, earlier this  
11 evening.

12 I think some big opportunities were  
13 missed, and I think some opportunities are long gone.  
14 But, I think, going back and looking at the Pease option,  
15 and, again, the Pease option we presented was well into  
16 Pease. They said "well, what about right along the  
17 residential area?" Or, "what about going down McIntyre  
18 Road?" They kicked those out, but we rejected them almost  
19 immediately when that was done.

20 We feel like those options could have  
21 been -- the problems with those options or the option  
22 going through Pease could have very easily been dealt with  
23 with the input from Newington, because it's a part of  
24 Newington. And, also, we also helped establish the  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 And, that ISO-New England is the one who made that with  
2 them, and said "go out there, construct, and get it done."

3 And, let me tell you why -- a little bit  
4 why I'm saying that. This Project requires not just this  
5 transmission line, but a whole bunch of supportive  
6 projects that need to be updated to support it. They are  
7 in the process of finishing those other projects, which  
8 are multimillion dollar projects, by the way, or in the  
9 process of -- or already have completed them, but they  
10 waited to the very last thing to bring this forward, and  
11 it's forcing the hand of the Site Evaluation Committee to  
12 accept it, because there are millions and millions of  
13 dollars already obligated and spent to do this.

14 Now, what does that mean? If they  
15 abandon this option, those are stranded costs. Who pays  
16 for stranded costs? They're going to try to put it on the  
17 rate payers -- ratepayers. Why aren't the people who  
18 invest in the Company, why don't they have any risk? Why  
19 doesn't Eversource have a risk by putting those other  
20 things done, that they're doing right now and spending the  
21 money, before they get the approval for the critical link  
22 to make the entire Project work? That doesn't make sense.  
23 You just don't do those things.

24 So, I'm asking that the Site Evaluation  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 Committee push back for public opinion and public input,  
2 and have ready considerations at least to recover those  
3 costs that they have already spent money on, on the  
4 projects they have already spent money on, to look at  
5 Please more carefully, and with our help. Because our  
6 help, I know we have input, we can make a big impact on  
7 those people, as far as trying to get through there.

8 And, I agree with almost everything that  
9 has been said this evening as far as this Project. And,  
10 again, the Town is not against getting power into this  
11 area. It's just against the way it's being done. Thank  
12 you?

13 MS. McGUIRE: Thank you.

14 MR. KIEDAISCH: Gary Kiedaisch again. I  
15 just wanted to add one additional thing.

16 MS. McGUIRE: I'm sorry. Can you say  
17 your name slower please?

18 MR. KIEDAISCH: Gary Kiedaisch,  
19 K-i-e-d-a-i-s-c-h. I had the good or the misfortune of  
20 running a business for eight years in the great state of  
21 Vermont. They have an environmental land law called "Act  
22 250". And, within that law, it states that "No project  
23 will ever be approved if it suffers from undue adverse  
24 impact." What does that mean? "Undue" meaning that  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 that. There's a double-edged sword always here. But  
2 undue -- this is undue adverse impact, because you have  
3 alternatives, and your lowest cost is not going to be your  
4 best cost. Trust me on this.

5 MS. McGUIRE: Okay. Thank you.

6 FROM THE FLOOR: You're the man, Gary.

7 MS. McGUIRE: Trying to find his way  
8 through.

9 MR. COOLEY: Hi. My name is Ralph  
10 Cooley. My family and I bought property here in Newington  
11 in 1981 or '2. And, we built a house in 2000. And, when  
12 they got ready to put the electric lines in, they said  
13 "they must be buried." So, they buried the power line.  
14 And, they said it was for a safety reason and for  
15 aesthetics.

16 And, so, I'm just wondering why, today,  
17 in a more modern era, are we arguing about these wires  
18 that we have now. So, I would like to see them buried.

19 MS. McGUIRE: Thank you, Mr. Cooley.  
20 Okay.

21 MR. NAWROCKI: I just wanted to  
22 revisit --

23 MS. McGUIRE: Okay. You're going to  
24 have to say your name again.

{SEC 2015-04} [Public Information Session] {04-23-15}

1 there's some other option that was not considered. I saw  
2 up here tonight three criteria for this Project. The  
3 third criteria, what was it? The lowest cost.

4 FROM THE FLOOR: The cost.

5 FROM THE FLOOR: Right.

6 MR. KIEDAISCH: It didn't -- the lowest  
7 cost in this case is not the best cost for the Company,  
8 for your investors. And, I would suggest to this group  
9 here that, and suggest to the investors and the executives  
10 of this company, go back to your partners and tell them  
11 "It was a disaster tonight." Don't go and whitewash it  
12 and say "A little bit of resistance, but we'll get it  
13 through." Because we didn't hear one -- it's been said  
14 before, not one person stood up and supported this. Not  
15 one single person, not one constituency. Is there anybody  
16 that agrees with it?

17 FROM THE FLOOR: No.

18 MR. KIEDAISCH: Not one. And, what does  
19 it take to get it through to you guys that you haven't got  
20 it right? You are not -- while we don't have a law in the  
21 State of New Hampshire, like Vermont does, of Act 250 and  
22 "we don't need it, we don't want it".

23 (Multiple speaking at the same time.)

24 MR. KIEDAISCH: Believe me, let's do  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 MR. NAWROCKI: My name is Keven,  
2 K-e-v-e-n, N-a-w-r-o-c-k-i. So, one thing, I don't  
3 remember who said it, but someone had said that this  
4 Project had been attempted before to go under the bay, who  
5 said that? Some --

6 FROM THE FLOOR: There was --

7 MS. McGUIRE: Okay.

8 MR. NAWROCKI: Yes.

9 MS. McGUIRE: I'm sorry. Mr. Nawrocki,  
10 you just need to make your comments, okay?

11 MR. NAWROCKI: Okay.

12 MS. McGUIRE: We have to ensure that we  
13 have an orderly proceeding and the comments can all be  
14 taken down, okay?

15 MR. NAWROCKI: Okay. So, to put it  
16 really quick, if this has been attempted before, or if  
17 there is any chance of this not working if it goes  
18 underneath the bay, and we know that a lot of different  
19 species are really sensitive to the nutrient contents and  
20 mineral contents of the water, and we're talking about  
21 drilling something underneath the bay, that's going to put  
22 a bunch of sediment up into the water. It's not -- It's  
23 going to settle all over the place, it's completely  
24 random. We don't know what's going to happen. And, we're  
{SEC 2015-04} [Public Information Session] {04-23-15}

1 just going to -- why would we go through with that? Why  
2 would we take such a risk that we do not know the effect  
3 of. That's all I have to say.

4 MS. McGUIRE: Thank you. Anybody else?  
5 (No verbal response)

6 MS. McGUIRE: All right. Then, for the  
7 record, I want to just note for the record that no one  
8 else cares to comment at this point. And, I want to thank  
9 you all very much for coming out and sharing your feelings  
10 about the Project. And, be safe driving home tonight.

11 FROM THE FLOOR: Thank you.  
12 (Whereupon the meeting was adjourned at  
13 9:29 p.m.)
