**Re: SEC Docket No. 2015-04: Public Service Company of New Hampshire d/b/a
Eversource Energy for a New 115k Transmission Line from Madbury Substation to
Portsmouth Substation
Applicant's Partially Assented-To Motion to Re-Open Record for a Limited
Purpose**

Dear Ms. Monroe:

Enclosed for filing in the above-referenced docket is the Applicant's Partially Assented-To Motion to Re-Open Record for a Limited Purpose and an Addendum to Visual Assessment Regarding Historic Sites That Have Been Determined Eligible.

Please call me with any questions.

Sincerely,

for

Barry Needleman

STATE OF NEW HAMPSHIRE

SITE EVALUATION COMMITTEE

SEC DOCKET NO. 2015-04

**APPLICATION OF PUBLIC SERVICE COMPANY OF NEW HAMPSHIRE
D/B/A EVERSOURCE ENERGY
FOR A CERTIFICATE OF SITE AND FACILITY**

**APPLICANT'S PARTIALLY ASSENTED-TO MOTION TO RE-OPEN RECORD FOR
A LIMITED PURPOSE**

NOW COMES Public Service Company of New Hampshire d/b/a Eversource Energy ("Eversource") (the "Applicant"), by and through its attorneys, McLane Middleton, Professional Association, and respectfully requests that the Presiding Officer re-open the record pursuant to N.H. Code Admin Rule Site 202.27 for the limited purpose of receiving relevant, material, and non-duplicative evidence and argument relating solely to the Applicant's assessment of certain historic sites that have been determined eligible for listing on the State Register of Historic Places or National Register of Historic Places ("Determined Eligible Sites"). In support of its Motion, the Applicant states as follows:

1. Eversource filed an Application for a Certificate of Site of Facility on April 12, 2016. By Order dated June 13, 2016, the Subcommittee accepted the Application and determined that it contained sufficient information to carry out the purposes of RSA 162-H.
2. Beginning on August 29, 2018 and continuing through October 26, 2018, the Subcommittee held adjudicative hearings.
3. During the examinations of Applicant's aesthetics witness David Raphael, and Counsel for the Public witnesses Michael Lawrence and Patricia O'Donnell, questions were asked about LandWorks' review of Determined Eligible Sites as part of the visual assessment.
4. On October 26, 2018, the official record closed pursuant to Site 202.26.

5. The Applicant now seeks leave from the Presiding Officer to submit a brief addendum to the Applicant's Visual Assessment, App. Ex. 51. *See* Attachment A to this Motion. The Addendum supplements the existing record by addressing a very narrow and discrete issue, namely, confirming that no Determined Eligible Sites that are scenic resources within the area of potential visual impact were overlooked in the original VA.

6. The Applicant believes sufficient evidence exists in the record to demonstrate the Project will not have an unreasonable adverse effect on aesthetics including, giving consideration to the subset of scenic resources known as Determined Eligible Sites. However, the Applicant also believes the Committee would be aided by supplementing the record to ensure that to the extent anyone may have lingering questions about this matter, they are addressed unequivocally so that the Committee can give full consideration to this issue.

7. RSA 541-A:30-a, III(i) requires an agency to propagate rules addressing reopening of the record. Site 202.27(a) provides that "a party may request by written motion that the record in any proceeding be re-opened to receive relevant, material and non-duplicative testimony, evidence or argument." Site 202.27(b) provides that "If the presiding officer determines that additional testimony, evidence or argument is necessary for a full consideration of the issues presented in the proceeding, the record shall be reopened to accept the offered testimony, evidence or argument."

8. The Applicant's request to reopen the record falls squarely within the requirements of Site 202.27(a)–(b). The offered evidence is relevant, material and non-duplicative. Site 202.27(a). The additional evidence will also allow for "a full consideration of the issues presented at the hearing." Site 202.27(b).

9. The Site Evaluation Committee has ruled on Motions to Reopen the Record in at least two prior occasions. First, The SEC granted a Motion to Reopen the Record in *Application of Granite Reliable Power, LLC*, Docket 2008-04. See *Order Granting Motion to Re-Open, In Part, Temporarily Suspending Deliberations, Enlarging Time Frames, and Setting Procedural Schedule*, Docket 2008-04 (May 8, 2009). In that case, an intervener group requested that the SEC re-open the record after deliberations commenced, but before the Subcommittee issued a final decision. *Id.* at 2. Prior to completing deliberations, the Subcommittee made certain requests to a state agency and to the applicant. *Id.* at 1. The Subcommittee reopened the record in that case to allow interveners to respond to the newly requested information. *Id.* at 3.

10. In deciding whether to reopen the record, the Subcommittee addressed a request from interveners to respond to information that was asked for during deliberations by the Subcommittee and from the applicant, namely, a status report on the Federal Aviation Administration's determination of hazards to air navigation posed by the proposed wind turbines. *Id.* at 2–3. The Presiding Officer noted that “the relevant issue with respect to turbine heights relates back to cross-examination earlier in the proceeding that showed a discrepancy between particular documents provided by the Applicant.” *Id.* However, the Presiding Officer found that “the record was clear by the time of closing arguments . . . [and] nothing further [w]as required for the Subcommittee to further consider the issues.” *Id.* While the record was re-opened in that docket to address other issues, the Presiding Officer's reasoning on whether to reopen the record on this issue was sound and is instructive here—if the submission of clarifying information regarding a narrow issue that arose during the proceeding would be helpful, the record may be re-opened for such clarification.

11. The SEC also considered a Motion to Reopen the Record in Antrim I, Docket 2012-01. In that case, Antrim Wind Energy, LLC simultaneously filed a Motion for Rehearing and Motion to Re-Open the Record—30 days after the Subcommittee had already voted to deny the application. In Docket 2012-01, following the Subcommittee’s final decision, the applicant submitted revised plans, which materially altered the Project by removing one out of ten proposed wind turbines. The applicant’s Motion to Reopen the Record was denied because “the new evidence submitted by the applicant would have required the re-review of the entire Application in light of the requirements set forth by RSA 162-H.” *Application of Antrim Wind Energy, LLC, Order on Pending Motions*, Docket 2012-01 at 10 (Sept. 10, 2013). The Order specifically noted that:

A distinction must be made between a request which would require the Subcommittee to review new evidence and a request which would materially change the original Application and would require the Subcommittee to conduct an extensive re-review of the entire Application. Although reopening of the record is permissible under the first set of circumstances, it is unacceptable under the second.

Id. at 11.

12. Here, the Applicant seeks leave to do precisely what the *Order on Pending Motions* in Antrim I noted would be permissible, namely, to present additional evidence after the close of the record on a very narrow issue that would not materially change the original application or amend the Project in any way.

13. The Addendum provides relevant, discrete information that will allow full consideration of the issues presented at the hearing. More specifically, it confirms that no Determined Eligible Sites that are actually scenic resources under Site 102.45 were overlooked in the VA. After sites are screened based on lack of visibility, lack of public access and/or lack of scenic quality, none remain that were not already considered.

14. Counsel for the Public does not object to the request to reopen the record, subject to the requirement of Site 202.27(c) that all parties have a full opportunity to respond to or rebut the newly submitted addendum, including the ability to request an opportunity to cross-examine on the new evidence.

15. The Towns of Newington and Durham and CLF object. The other parties did not respond to a request for their positions.

16. The Applicant respectfully requests that the Presiding Officer Re-Open the Record pursuant to Site 202.27 for the limited purpose of receiving the attached Addendum.

[Remainder of page intentionally left blank]

WHEREFORE, the Applicant respectfully asks that the Presiding Officer:

- A. Grant the Applicant's Motion to Reopen the Record; and
- B. Grant such other further relief as is deemed just and appropriate.

Respectfully Submitted,

Public Service Company of New Hampshire d/b/a
Eversource Energy

By its attorneys,

McLANE MIDDLETON

Certificate of Service

I hereby certify that on the 2nd day of November, 2018, an electronic copy of this objection was filed with the NH Site Evaluation Committee and an electronic copy was sent to the Distribution List.

Barry Needleman

I. SRP – Addendum to Visual Assessment Regarding Historic Sites that have been Determined Eligible

A. Introduction and Background

On behalf of Public Service Company of New Hampshire d/b/a Eversource Energy (“Eversource”) LandWorks submits this Addendum to its April 12, 2016 Visual Assessment (App. Ex. 51 and 52), as modified by the Amendment to the Visual Assessment dated March 29, 2017 (App. Ex. 95 and 96), and as updated by the Supplemental Pre-filed Testimony of David Raphael and attachments (App. Ex. 142) (collectively the “VA”). This Addendum relates to historic sites that have been determined eligible for inclusion in the State Register of Historic Places or the National Register of Historic Places maintained by the Secretary of the Interior pursuant to Site 102.23 (hereinafter “Determined Eligible Sites”).

B. Additional Evidence

LandWorks and Preservation Company conducted a further review of Determined Eligible Sites within the area of potential visual impact. Based on this review, LandWorks confirmed that its VA did not overlook any Determined Eligible Sites within 10 miles of the Project. More specifically, after sites were screened based on lack of visibility, lack of public access and/or lack of scenic quality, none remain that were not already considered.

NH Division of Historical Resources (“DHR”) previously provided Eversource with a list of all Determined Eligible Sites in the following towns within, or where a portion of the Town is within the 10-mile area of potential visual effect: Barrington, Brentwood, Dover, Durham, Epping, Exeter, Freemont, Greenland, Hampton, Hampton Falls, Lee, Madbury, Newcastle, Newfields, Newington, Newmarket, North Hampton, Nottingham, Portsmouth, Rochester, Rollinsford, Rye, Somersworth and Stratham. See Addendum Attachment 1.¹

Preservation Company winnowed down the DHR list to 112 properties. See App. Ex. 265. Preservation Company did so in the following manner. First, they eliminated resources that lie outside of the 10-mile area of potential visual effect. They then removed any resources that have been listed in the National Register or NH State Register of Historic Places because they were already addressed as part of the visual assessment. Duplicate resources were also removed (there are many examples of resources being listed multiple times). Buildings and structures that no longer exist were removed. Private residences were removed from consideration since they are not publically accessible and therefore cannot be a scenic resource under Site 102.45. From the list of 112 resources, Preservation Company subsequently identified additional duplications that reduced the list to 107 sites.²

¹ Applicant intended during the hearing to attach this list as Exhibit 265. Instead, Exhibit 265 is the list of 112 properties Preservation Company winnowed down from this original DHR List. The original DHR list received in July 2017 is attached here as Addendum Attachment 1.

² The Applicant also ascertained from DHR records additional sites that have been determined eligible since July 11, 2018. No new sites with potential visibility were identified from this update. Further, although eligible historic districts were not included on the original July 2017 DHR list provided to the Applicant, the Applicant also reviewed DHR’s posted lists of Area Forms on file. Only two historic districts were identified as resources with potential visibility, Fox Point in Newington and Wiswall Falls in Durham. Both locations were considered in the VA. See e.g., App. Ex. 51 at 50, 54, 58, 60, 62–64, 71–73, 86 (Fox Point); *id* at 50 (Wiswall Falls).

LandWorks then conducted a visibility analysis for each of those 107 sites. In accordance with the methodology described in the VA, LandWorks determined visibility based upon a multi-step review process, that included the following:

1. Analyzing the 10 mile viewshed;
2. Reviewing available USGS and DeLorme Atlas and Gazetteer mapping;
3. Assessing Google Earth Pro aerial and street views; and
4. Recalling site knowledge and reviewing site notes from field work conducted for the project visual assessment.

Based on this review, LandWorks determined that of the 107 Determined Eligible Sites, the following have potential visibility:

1. Morrill Hall at the University of New Hampshire (labeled DUR009 on App. Ex. 265)
2. Historic buildings along Woodbury Avenue in Newington:
 - Louis deRochemont Mansion (NWN0244)
 - Beane Farm (NWN0204)
 - Isaac Dow House (NWN0205)
 - Portsmouth Water Booster Station (NWN0228)
3. The General Sullivan Bridge in Dover NH (DOV0158).

C. Morrill Hall at UNH

The UNH campus was addressed in various locations in the original VA, such as on pages 52, 54, 59, 61, 62, 64, 76–79, 86. Moreover, upon more careful review, Landworks concluded that Morrill Hall (determined eligible for significance in architecture and education) would not have direct views of the above-ground portion of the Project due to intervening buildings and vegetation to the north and west. There is sufficient vegetative screening even in winter due to tree branching and branch density. The only potential view of the corridor would be in front of the northwest façade of the building. This view is of the portion of the corridor where the Project would be located underground; therefore, there would be no direct visibility of any project structures.

Preservation Company and Landworks then reviewed each of the other sites further to determine if any of them possessed the requisite “scenic quality” in accordance with Site 102.45(e). The conclusions from that analysis are set forth below.

D. Woodbury Avenue Sites

Four Determined Eligible Sites along Woodbury Avenue in Newington may have visibility of the Project: the Louis deRochemont Mansion, Beane Farm, Isaac Dow House, and the Portsmouth Water Booster Station. While these historic buildings along Woodbury Avenue may have limited views of the Project from the building sites or parking areas, such visibility is interrupted by the presence of intervening buildings blocking any extended view as the Project heads toward the Portsmouth substation.

The additional review also confirmed that these four sites lack scenic quality based on a variety of factors. The context of the sites is in a non-scenic, non-view-sensitive environment that includes a major power plant, extensive box buildings (including the Mall at Fox Run and Wal-Mart), chain restaurants, and parking lots. The extensive commercial and industrial land development patterns in this area distinctly lack aesthetic or scenic value. In addition, based on the Project Area Form (“PAF”) submitted for this Project (App. Ex. 29), all four sites lack integrity of setting due to a variety of issues including the new highway, developed land, and large commercial buildings. Moreover, setting is not a defining feature for any of the sites. See App Ex. 29 at 117–18.

In sum, for these reasons, the Woodbury Avenue sites lack scenic quality and would therefore not qualify as scenic resources requiring further review.

E. General Sullivan Bridge

At the General Sullivan Bridge in Durham the view south / southwesterly towards Fox Point Road and Nimble Hill Road in Newington may yield some visibility of Project structures at or slightly above the existing tree line. The only potential visibility would be, at most, of the top 10-15 feet of structures in a few locations. The ups and downs of the corridor itself, the height of the structures primarily at 65-75' and tree heights that range upwards of 60-80' in some places may screen most of the potentially visible structures. Even at 0.7 to 1.0 miles from the Project, the structures appear as distant vertical elements in and among the tree pattern of branches, foliage and canopies, etc.

The bridge has been determined eligible for listing for engineering and transportation; it is not eligible for listing due to significance of scenic qualities or views. In addition, the bridge is a transportation facility and it is not a destination viewpoint, park or public gathering area. While the bridge has been used for fishing, the high level of traffic on this newer bridge next to it also serves to diminish the scenic or recreational value of the resource. Currently, the bridge is closed to any pedestrian or bicycle traffic. From a visual assessment standpoint, this site lacks scenic quality and would therefore not qualify as a scenic resource requiring further review.

F. Conclusion

As stated previously, no Determined Eligible Sites that are actually scenic resources under Site 102.45 were overlooked in the VA. After sites are screened based on lack of visibility, lack of public access and/or lack of scenic quality, none remain that were not already considered.
