Subject: Revised water quality monitoring protocol
Attachments: SRP Water Quality Monitoring Plan Final 052219 suggested revisions.pdf

Gregg,

Please find attached a revised version of the WQ monitoring plan. The edits include information on the jet plow trial monitoring (a separate plan but closely linked), and more information on how we propose to interpret results. They are shown in track changes.

We look forward to meeting with you on the 30th.

Thanks

Sarah
