Re: Seacoast Reliability Project (RPR# 6528) Construction Change in Vicinity of Historic Property

Dear Ms. Miller-

Eversource Energy (Eversource) is proposing a small construction change in the vicinity of a historic property at the request of the landowner as part of the Seacoast Reliability Project (the "Project"). Ms. Lulu Pickering, owner of the Alfred Pickering Farm located at 339 Little Bay Road in Newington, NH, has requested that Structure 105 be moved thirteen feet to the west within the right-of-way on her property. Ms. Pickering believes that views of the structure from her home will be better screened by existing vegetation at the newly proposed location.

The Alfred Pickering Farm was determined eligible for the National Register of Historic Places in 2015 as an individual property under Criteria A and C in the Areas of Agriculture and Architecture. Ms. Cheryl Widell, owner of Widell Preservation Services, LLC and cultural resources expert witness for the Project, has reviewed the proposed change, which she believes will not cause any additional adverse effect to the historic property nor change or negate the mitigation for the visual adverse effects previously identified during the design review, compliance and permitting processes for the Project (see Attachment 1).

Additionally, the proposed change will not impact any known archaeological sites, nor is it expected to impact any yet-to-be identified archaeological resources as the area was not considered sensitive for archaeological resources during the Phase IA Archaeological Sensitivity Assessment (Bunker 2015) and no archaeological resources were identified during the Phase IB Intensive Archaeological Investigation in nearby Sensitivity Areas Newington-2 and Newington-3 (Bunker 2018).

If you have any questions, please feel free to call me at 603-717-5198 or email me at brooke.kenline-nyman@eversource.com.

Sincerely,

Brooke Kenline-Nyman
Eversource Energy
Cultural Resource Specialist

Ms. Nadine Miller, Deputy State Historic Preservation Officer
New Hampshire Division of Historical Resources
19 Pillsbury Street
Concord, NH 03301-3570

Dear Ms. Miller,

As the expert witness for cultural resources for the Eversource Company for the Seacoast Reliability Project, I wanted to inform you of a very small change in the placement of a structure in the right of way of the project in the rear of the Alfred Pickering Farm, 339 Little Bay Road in Newington, NH.

The structure location (Old Structure 105) which is shown on the accompanying maps, will be moved thirteen feet from the original planned location to a new location (New Structure 105). The structure type and size will not be changed. The change in location is most clearly seen in the photo from the location which is attached to this letter. The yellow line was the original proposed location for the structure; the red line shows the new proposed for the structure.

I have reviewed this change to the original project. In my expert opinion, this change in location will not cause any additional adverse effect to the historic property nor change or negate the mitigation for the visual adverse effects previously identified during the design review, compliance and permitting processes for the project. It does not change my testimony presented to the New Hampshire Site Evaluation Committee that " the proposed project will have an adverse effect on the Alfred Pickering Farm as it will alter the setting and feeling of the open agricultural land that is a characteristic qualifying the property for inclusion in the National Register under Criterion A. The change will not cause any addition visual adverse effects to the historic property and no additional mitigation is required.

Should you have any additional questions about this change, please contact me or Ms. Brooke Kenline-Nyman, Cultural Resource Specialist at Eversource Energy at brooke.kenline-nyman@eversource.com or 603-634-2147.

Thank you for your attention to this matter.

Sincerely,

Cheryl Widell, Principal
Widell Preservation Services, LLC

Appendix A:
Revised Effects Table for the Alfred Pickering Farm

HISTORIC PROPERTY/PROPERTIES AFFECTED TABLE
RESULTS OF EFFECT EVALUATION FOR
Alfred Pickering Farm, 339 Little Bay Road, Newington (NWN0001)
Seacoast Reliability Project, 2019

Significance (including Criteria):

The Alfred Pickering Farm was determined eligible for the National Register of Historic Places in 2015 under Criteria A and C in the Areas of Agriculture and Architecture. The Georgian-style frame farmhouse was built ca. 1812 for Thomas Pickering by Cyrus Frink who was an engineer and builder of bridges and homes in the Piscataqua Region. The house and surrounding 37+ acres of land are still owned by members of the Pickering Family. The property also retains two early nineteenth century outbuildings; a carriage house and a large barn, with a rare surviving interior silo. The buildings have seen some historic period alteration, and the house has a ca. 2000 addition; however the property retains integrity to demonstrate its significance under both Criteria A and C for its agricultural associations and as an example of an intact functionally-planned New England Farm, as recorded in the Determination of Eligibility. The setting of open field is a character-defining feature. The land remains in agricultural use as hay field and pasture. The character-defining features under Criterion A include the large barn, shed and house, set on a high point surrounded by fields backed by woods. The roadside stone walls, driveway and barnyard contribute to the setting. A baseball diamond was in use for several years but has reverted to grass with little evidence remaining in the landscape. Other historically associated land to the east and west was subdivided in the late twentieth century and the fields became large house lots for new homes. The Pickering family cemetery is located on one of those parcels, not within the eligible historic property. The reduction of the farmland from roughly 88 acres to 37 acres and development of surrounding land have diminished the original setting, association and feeling of the agricultural property. The electric utility right of way dates from near the end of the historic period in the 1950s and is not a contributing element, but rather relates to construction of Pease Air Force Base.

NR Boundary (description/justification):

The boundary of the National Register eligible property includes all of the land presently associated with the historic buildings. Identified in Newington tax records as Map-Lot 23-23, it contains 37.4 acres. The historic property includes fields around the buildings and extending to the north where the electric utility right-of-way crosses the property at the edge of the woods. Other land to the east and west was subdivided for new home construction in the late twentieth century and no longer conveys agricultural associations.

RELATIONSHIP OF PROPOSED ACTION TO HISTORIC RESOURCE

The Seacoast Reliability Project will cross the Alfred Pickering Farm in the existing electric utility corridor. The 100'-wide right of way runs east-west for about 0.2 miles across the historic property. The existing distribution line will be relocated elsewhere and the proposed transmission line installed in its place. A single pole on the property, Structure 105 will be moved thirteen feet west from its initial proposed location.

DEFINITION OF EFFECT

An effect may occur when there is alteration to the characteristics of a historic property qualifying it for inclusion in or eligible for the National Register as defined in Section 800.16(1).

EVALUATION

This change in location will not cause any additional adverse effect to the historic property nor change or negate the mitigation for the visual adverse effects previously identified during the design review, compliance and permitting processes for the project.

RECOMMENDED FINDING

No historic property affected.

**APPLICATION OF THE CRITERIA OF ADVERSE EFFECT FOR
Alfred Pickering Farm, 339 Little Bay Road, Newington (NWN0001)
Seacoast Reliability Project, 2016**

CRITERIA OF ADVERSE EFFECT

An adverse effect is found when an undertaking may alter, directly or indirectly, any of the characteristics of a historic property that qualify the property for inclusion in the National Register of Historic Places in a manner that would diminish the integrity of the property's location, design, setting, materials, workmanship, feeling or association. Consideration shall be given to all qualifying characteristics of a historic property, including those that may have been identified subsequent to the original evaluation of the property's eligibility for the National Register. Adverse Effects may include reasonably foreseeable effects caused by the undertaking that may occur late in time, be farther removed in distance or be cumulative.

Example of Adverse Effects, pursuant to Section 800.5(a)(2)	Evaluation
Adverse effects on historic properties include, but are not limited to:	
(i) Physical destruction of or damage to all or part of the property;	None
(ii) Alteration of a property, including restoration, rehabilitation, repair, maintenance, stabilization, hazardous material remediation and provision of handicapped access, that is not consistent with the Secretary's Standards for the Treatment of Historic Properties (36 CFR§68) and applicable guidelines;	None
(iii) Removal of the property from its historic location;	None
(iv) change of the character of the property's use or of physical features within the property's setting that contribute to its historic features;	None
(v) Introduction of visual, atmospheric, or audible elements that diminish the integrity of the property's significant historic features;	The proposed location change for Structure 105 will not introduce a new visual element that diminishes the setting of the property.

(vi) Neglect of a property which causes its deterioration, except where such neglect and deterioration are recognized qualities of a property or religious and cultural significance to an Indian tribe or Native Hawaiian organization; and	None
(vii) Transfer, lease, or sale of property out of Federal ownership or control without adequate and legally enforceable restrictions or conditions to ensure long-term preservation of the property's historic significance.	Not Applicable
(viii) OTHER:	None
RECOMMENDED FINDING	No Adverse Effect -- The proposed location change will not cause any additional adverse effect on the Alfred Pickering Farm.
