**Re: Site Evaluation Committee Docket No. 2015-04 – Public Service of New Hampshire  
d/b/a Eversource Energy, Jet Plow**

Dear Mr. Nelson:

On January 31, 2019, the Site Evaluation Committee (Committee) issued an Order and Certificate of Site and Facility with Conditions (Certificate) to Eversource for construction of the above-referenced Project. The Certificate contained a number of conditions related to the installation of submarine cable by jet plow under Little Bay.

On October 2, on behalf of Eversource, Normandeau Associates submitted a Revised Jet Plow Trial Summary Report to the Committee and to the NH Department of Environmental Services (NHDES). On October 4 and October 14, NHDES submitted correspondence to the Committee recommending that, based upon its review of the report and the results of supplemental sediment testing results, Eversource Energy be allowed to install the submarine cable under Little Bay by jet plow.

The Certificate at page 4, contains the following conditions:

- Further Ordered that NHDES is authorized to permit installation of the Project by jet plow under Little Bay; and it is,
- Further Ordered that installation of the submarine cable in Little Bay shall not proceed until authorized by NHDES; and it is,

Based upon my review of the Certificate and the letters submitted by NHDES on October 4 and October 11, no further approval of the Committee is required for installation of the submarine cable by jet plow.

Sincerely,

A handwritten signature in black ink, appearing to read "P. Monroe".

Pamela G. Monroe  
Administrator
