**Re: SEC Docket No. 2015-04: Public Service Company of New Hampshire d/b/a
Eversource Energy (“Eversource”): Notification of Commercial Operation**

Dear Ms. Monroe:

I write to provide a status update on Public Service Company of New Hampshire d/b/a Eversource Energy’s (“Eversource”) Seacoast Reliability Project (“SRP” or the “Project”). Eversource anticipates that physical construction of the new 115 kV transmission line (the “F-107 Line”), will be completed by May 29, 2020. Restoration activities for the F-107 Line will continue throughout the spring and summer. In addition, Eversource anticipates that it will complete construction of the final portion of the Project, a distribution line between the Madbury Substation and Packers Falls Substation (the “380 Line”), during the first week of June.

In accordance with the SEC Certificate issued to Eversource for the construction and operation of the Project, Eversource hereby provides you with two weeks’ notice prior to the commencement of commercial operation of the F-107 Line. Eversource anticipates commencing commercial operation of the F-107 Line on or after May 29, 2020. In addition, it is anticipated that the 380 Line will resume commercial operation on or after June 8, 2020.

Lastly, as we discussed on May 6, 2020, and in accordance with the SEC Certificate, Eversource will provide you with a complete copy of the as-built plans for the entire Project no later than the energization date of the 380 Line, which will be the date that the Project, as a whole, will be commercially operational.
