**Subject:** My Oyster Farm and the health of Great Bay in Trouble! Problematic Eversource Project - Please Read

Please read the attached information about the Eversource Project that wants to use a jet plow to trench 8 feet into Great Bay's sea floor to lay cable. This jet plowing will disturb years of sediment that can ruin the health of the Bay. They have alternative routes to take and this is NOT their only solution - just their easiest.

For the sake of the oyster farmers, fishermen, lobstermen and all who enjoy the beauty of the bay, PLEASE read the attached and sign the petition. And pass along to those that care. Thank you!

Laura
