Subject: Update on Citizens petition to stop Eversource Jet Plowing Across Little Bay

Dear Ms. Monroe,

I would like to update you on the signatures and comments on the Friends of Great Bay petition to stop Eversource from jet plowing under Little Bay as part of their Seacoast Reliability Project. There are over 800 signatures and 170 informed comments to date. Please take a few minutes to review these comments as they reflect the attitudes and opinions of so many of us concerned about the real potential for adverse ecological impact to Little Bay and into the greater Great Bay Estuary from this jet plowing procedure.

Please find the petition here <https://www.ipetitions.com/petition/no-eversource-jet-plowing-across-little-bay>.

We appreciate that the SEC will be at its most diligent in reviewing all material for this controversial and environmentally damaging project. We hope that the SEC sees the potential for damage here and asks Eversource to find another way. One that proves "least impact" as that is the standard we hold for any other residential or commercial projects that impact our environment and water bodies.

Kindest regards,

Nancy Bulkley and the Friends of Great Bay of Durham NH and the greater Seacoast area
