Subject: Little Bay/Eversource

Hi Ms. Monroe,

I am a homeowner in Newington, NH with a young family (two preschool aged boys) and we plan to live here forever. I am devastated by the thoughts of the damage that will be done through Jet-Plowing under Little Bay. Eversource is skewing the presentation of their data to downplay the negative effects of their plan, specifically the jet-plowing. Large amounts of nitrogen will be released and the sediment contains toxic chemicals. This is not necessary. There are better ways. They may cost more, but we can never get our estuary back once the damage is done. A hundred years from now, no one will care if Eversource got the project done under budget.

Please don't let this happen.

Thank you,

Jessica Morgan
