Subject: Seacoast Reliability Project

Hello Pam,

I write to you today to express my continued concern regarding the Eversource Seacoast Reliability Project. I remain concerned that our town's charm and beauty will be diminished by the 85' (sometimes larger) poles running through our neighborhoods, town, and along Little Bay. I am mostly concerned with the environmental impacts jet plowing will have through the mudflats of our beautiful and fragile Bay. I am not in support of this project.

Thank you for hearing my concerns.
