Subject: Comments on Seacoast Reliability Project

Hello. My wife and I live at 280 Durham Point Road, Durham, NH 03824. We own 35 acres on this road, with an existing power line right of way cutting through the center of our land. The proposed "Reliability Project" with the huge 85 foot metal towers will have a significantly negative impact on the value of our land. I am a retired real estate professional, so I speak with some level of expertise. In fact, the Nature Conservancy, with whom we have been speaking relative to a possible conservation easement, has also indicated that this project will reduce the value of our property.

Therefore we are adamantly opposed to this project. Sincerely, Richard and Kathleen Gsottschneider, 603 781 0594
