Subject: Oppose Eversource 'jet plow' transmission lines

Ms. Monroe,

Please oppose the Eversource 'jet plow' project under the Little Bay. Residents of all Seacoast Towns have been required by the Federal Government to plan to double and triple water utility bills as we upgrade sewage treatment plans because of concerns regarding the water health in the Piscataqua River with the Great and Little Bays water health being paramount in these decisions.

The federal government made it clear they have only just begun in their attempt to raise the costs of sewage treatment (and thus our water bills) and will be using the water health in these waters, including the Little Bay as a metric in determining increasing stringency.

I believe this factor has been put to the side and not considered at all in the decision to 'jet plow' the line for Eversource. At the very least, put the federal EPA officials who are requiring massive expansions and upgrades to sewage treatment for all area towns into the loop.

Thanks so very much
