

## SEC COMMENTS COLLECTION

SECDocket	2015-05 Eversource/NEP - Merrimack Valley
CommenterName	Shawn Murray
CommenterCity	Hudson
DateReceived	10-27-2016

### CommenterWords

As a property owner directly affected by this Merrimack Valley project in which Eversource will clear my frontage of trees and clearing back approximately 200 feet exposing my property to the proposed and existing power lines I would ask the SEC to consider revisiting this approval until property owners can learn more about the project.

I will attest in a court of law that myself and my neighbor who faces the same land clearing by Eversource was not notified of this project. I recently found out about the project when a employee of Eversource knocked on my door and attempted to get me to sign off on receiving the wood that would be cut.

I attended a public meeting sponsored by Eversource on Thursday October 20, 2016 at the Hudson Memorial School. An employee of Eversource commented that "they" were wondering why there had not been more public input on the project when I informed them I was never contacted about the project.

I need additional time to review all of the documents submitted over the past two years to assist me to understand how this will effect me so that I can make an informed decision as to the impact on my property.

One document I have seen was a request for the Committee to do a site visit which was denied. I would ask the Committee to reconsider and conduct a site visit (with my permission to enter my property) so that the Committee can get a first hand look at the significance of the impact this project will have in clearing my property of trees.

Thank You for your consideration.
