As the tree removal unfolds I am appalled at what I see. There have been no EMF testing results provided. the tree removal is part of the construction. The EMFs should have been tested and the result published before the tree removal. I continue to see pictures and ride by the devastation already caused by the tree removal.

I wish I could say that this winter was EMF reaction free for me. While it has been far more mild than last year, I reacted to the EMFs while standing at my son's bus stop during tree removal. Imagine my shock and surprise since my son stood there every day for the past two years!! Fortunately I was able to get the school dept to move it finally after they came and same the devastation already being done with the tree removal! They were shocked that another line as going in. Imagine, they had heard NOTHING about it!!

One other reaction involved the other end of the MVRP in Tewksbury, MA as I drove by the already massive, overbuilt substation on Route 38!

These reactions can be debilitating for the right person. However, I have managed to figure out how to recover quickly so long as I am not the driver!

I have talked to and met families along the ROW for the MVRP. I see developmental delays in the children in one family that are undoubtedly a direct result of having the high voltage transmission lines in their back yard.

I shudder to imagine what is going to happen to people as you put in the actual line!

Eversource and its employees and affiliates are irresponsible, greedy, sneaky, slimy and unethical company.

Just look at their financial statements on sec.gov. \$9 BILLION in debt! The debt structure looks like Bernie Madolf is managing it! How can a company have debt that high if their operations are funded by their rate payers? Take a look at the plush and lavish dividends, salaries and benefits, including retirement plans! They don't care who they hurt or kill so long as their pockets are well lined and they don't actually know the victims!

What is beyond forgivable is that the NH SEC and the NH AGs office could have and should have STOPPED this project. The failed to do their job in protecting the people and providing proper oversight!!!

You all continue to live in denial and blind people with your lies and corruption when there is documented information as to the dangers from the EMFs from the overbuilt infrastructure!!
