Concord, NH 03301

**Re: SEC Docket No. 2015-05: Public Service Company of New Hampshire d/b/a Eversource Energy ("PSNH") and New England Power Company d/b/a National Grid ("NEP"): Joint Application for a Certificate of Site and Facility for the Merrimack Valley Reliability Project – Submission of As-Built Plans**

Dear Ms. Monroe:

Enclosed for filing, please find one confidential version and one redacted version of the Joint Applicants' Final Engineering As-Built Drawings for the Merrimack Valley Reliability Project and a thumb drive enclosing electronic copies of the plans. The Applicants respectfully request, however, that the SEC only upload the redacted version of these drawings to the SEC website. The confidential version contains critical energy infrastructure information ("CEII") that cannot be disseminated publicly.

The Applicants are submitting these as-built plans in compliance with the final Certificate of Site and Facility and Condition that required the Applicants to "construct the Project within three (3) years of the date of the Certificate and [to] file as-built drawings of the Project with the Committee no later than the date of commercial operation of the Project." Order and Certificate of Site and Facility, Docket 2015-05, at 5 (October 4, 2016).

Due to the large file size of the submittal the Joint Applicants are unable to distribute an electronic copy of the plans to the service list.

Please do not hesitate to contact me with any questions.

Sincerely,

Barry Needleman
