Jeanne Menard

**Re: Northern Pass Transmission – Station Abutter Maps**

Dear Ms. Menard:

This is in response to the letter that you sent to Pam Monroe in August relating to the “Station Abutter Maps” that were posted on the SEC website on July 26.

Your first request on behalf of the Deerfield Abutter Intervenor Group is whether we can label each new structure on the plans and also provide a “rendition” of each structure. I am enclosing an updated facing sheet to the plan sheet of the Deerfield Substation area that provides a typical drawing of each structure along with the structure height. The structure numbers are on the plan sheets we submitted last October with the SEC application and again with the “Station Abutter Maps” that we submitted last summer. Your second request is for a 3D cross section of the expanded substation area from various advantage points, but we have done such cross sections.

I hope this is helpful to you and your group. Please let me know if you have any follow up questions.

Very truly yours,

  
George Dana Bisbee

Enclosure
