**Re: Site Evaluation Committee Docket No. 2015-06
Joint Application of Northern Pass Transmission LLC and Public Service Company of New
Hampshire d/b/a Eversource Energy (the "Applicants") for a Certificate of Site and Facility
Applicants' December 15, 2016 Responses**

Dear Ms. Monroe:

The Site Evaluation Committee's ("SEC" or "Committee") discovery schedule requires that the Applicants "provide supplemental responses to data requests addressing the underground portion of the Project and the Applicants' responses to the Department of Environmental Services' ("DES") requests on or before December 15, 2016."

The supplemental responses to data requests addressing the underground portion of the Project comprise the final design packages prepared for the Department of Transportation, which have been uploaded to ShareFile. The Spokespersons for the various parties have been notified that the information has been uploaded. We also include a thumb drive of that material in the event you wish to post it to the SEC website.

With respect to the responses to DES, except for the limited information that is the subject of the Applicants' December 7, 2016 Motion for Additional Time, the remaining materials were provided to the Committee on December 14, 2016, in the same manner that the previous responses to DES were provided. The responses were also uploaded to ShareFile.

Please contact me directly should you have any questions.

Sincerely,

Thomas B. Getz
