**Re: Site Evaluation Committee Docket No. 2015-06
Joint Application of Northern Pass Transmission LLC and Public Service Company of New
Hampshire d/b/a Eversource Energy (the "Applicants") for a Certificate of Site and Facility
Applicants' December 15, 2016 Responses
Correction to Certain Files**

Dear Ms. Monroe:

The Site Evaluation Committee ("SEC" or "Committee") required that the Applicants provide supplemental responses to data requests addressing the underground portion of the Project on or before December 15, 2016, which they did. However, two of the files uploaded to ShareFile and provided to the SEC were not the final versions provided to the Department of Transportation ("DOT").

As explained previously, the supplemental responses to data requests addressing the underground portion of the Project comprise the design packages prepared for DOT. The files labeled SHEB (Sugar Hill Eastern Bypass) and ROCK (Rocks Estate Bypass) were the December 8, 2016 internal review versions and not the December 13, 2016 final permit versions, though the differences between the two versions are minor. In addition, with respect to the WMNF (White Mountain National Forest) file, page WMNFC188 was left out and with respect to WBR3 (Woodstock to Bridgewater - Route 3), page WBR3049-1 was left out.

To address these errors, the Applicants have notified the Spokespersons for the various parties that the corrected information has been uploaded. A thumb drive of that material will also be hand delivered in the event you wish to post it to the SEC website.

Please contact me directly should you have any questions.

Sincerely,

Thomas B. Getz
