**Re: Site Evaluation Committee Docket No. 2015-06
Joint Application of Northern Pass Transmission LLC and Public Service
Company of New Hampshire d/b/a Eversource Energy (the "Applicants") for
a Certificate of Site and Facility**

Dear Ms. Monroe:

On Tuesday, November 21, 2017 during cross examination of Mr. Martland, Counsel for the Applicants introduced App. Ex. 443. The Applicants write to clarify the record with respect to this exhibit. App. Ex. 443 is a summary table prepared by the Applicants, which references several photosimulations prepared by the Applicants from private properties in response to the change in the new rules. The Applicants' first submitted these simulations in response to the new rule change in February, 2016 and this submission has been marked as App. Ex. 2, Appendix 8-9.

Subsequently, Applicants further revised the photosimulations submitted in February in a supplemental submission in September, 2016, which has been marked as App. Ex. 71. The table used during cross examination of Mr. Martland, App. Ex. 443, is identified as being from App. Ex. 71. During the course of cross examination, Attorney Needleman represented that the information was submitted in February, however, as noted previously, App. Ex. 71 was filed in September, 2016 and not in February. The same photosimulations appear in both the February and September filing, but the bates numbers included on the exhibit refer to App. Ex. 71, not App. Ex. 2.

In either instance, Mr. Martland had access to these photosimulations many months before the deadline for filing his supplemental testimony in March, 2017. Please contact me directly should you have any questions regarding this clarification of the record.

Sincerely,

Barry Needleman
