Petition to Intervene
Pamela Monroe, Administrator
NH Site Evaluation Committee
21 South Fruit Street, Suite 10
Concord NH 03301

RE: NH Site Evaluation Committee, Docket No. 2015-06 Northern Pass

Dear Ms. Monroe:

We, Eric and Barbara Meyer, respectfully request to intervene in the SEC proceedings under Docket No. 2015-06 regarding the Northern Pass.

We own a property, known as the Bungay Jar, located on Route 116, in the town of Easton, in Grafton County, New Hampshire, which **abuts the currently proposed route** of the Northern Pass transmission line.

Issues of principal concern to us include:

Legal right to location. Eversource/Northern Pass has not shown us that they have a legal right to locate this type of transmission line on or along our property.

Property value. We are concerned that the project will diminish the value of our property.

Vegetation. This property is a long-established bed & breakfast and its frontage vegetation staying in place is critical to its visual appeal.

Excavation damage. We are concerned that excavation could damage the well in our front yard.

We therefore request that we be allowed to intervene in this docket.

Sincerely,

Eric and Barbara Meyer
