

Dear Ms. Monroe,

PETITION FOR INTERVENTION BY Carol L. Currier of Ashland, NH

I, Carol L. Currier, of Ashland, 03217, request the Site Evaluation Committee to grant me status as an intervener in the Northern Pass docket No. 2015-06. I seek this designation as interveners for the following reasons:

- I own approximately 30 acres of land in Ashland at 70 Cedar Lane (Tax Map & Parcel 004-001-001)
- My property which has been family owned for almost 75 years will be directly impacted by the Northern Pass project as presently proposed.
- The proposed path of Northern Pass will run directly down the center of our property with overhead steel towers which I understand gives me statutory basis to intervene.
- There will be a severe negative impact to the value and enjoyment of the property. The siting of the proposed Northern Pass transmission on my property, including the overly tall towers and the high voltage transmission lines, may cause very significant loss in the value of the property and also will negatively impact the quiet enjoyment we have had of the property. Obviously, the lines will not only be visible from our property but we as well as any visitors will have to drive back and forth under the lines to reach our house.
- Undue stress will be caused as we have animals that pasture under these lines as well as reside in the barn located just 100 feet from the easement.
- My Interests as the property owner are direct, substantial and distinct from the interests of the public at large.

Thank you for your time and consideration.

Sincerely,

Carol L. Currier
