

Before the New Hampshire Site Evaluation Committee

Docket No. 2015-06

Joint Application of Northern Pass Transmission LLC (“NPT”) and Public Service Company of New Hampshire d/b/a Eversource Energy (“Eversource”) for a Certificate of Site and Facility for the Construction of a New 1,090 MW Electric Transmission Line

Motion to Intervene

We, The Sierra Club Chapter of New Hampshire at 40 North Main Street, Suite 2, Concord, NH 03301, respectfully request to intervene in the captioned docket.

Memorandum in Support of Motion

We have members and supporters in the towns hosting the proposed project of NPT and Eversource before the Site Evaluation Committee. We also have members and supporters throughout the state and the country who will be affected by the proposal’s imposing construction of high voltage transmission infra-structure for the importation of electricity from Canada.

Our mission to “Explore, enjoy and protect the earth” requires our due diligence to support clean energy that does not destroy our environment, our communities, and our way of life. We are concerned that the energy source of this proposal is neither clean nor renewable; that the construction will be a burden on property owners, ratepayers, and the state; and, that there are truly clean and sustainable energy sources that would prove a wiser investment.

We, therefore, request that we be granted the right to intervene in this docket.

Respectfully submitted,
