RE: Petition to Intervene NH Site Evaluation Docket No. 2015-06
Northern Pass Transmission—Eversource

Dear Ms. Monroe,

On behalf of the Dixville Notch—Harvey Swell Location, we hereby petition the State of New Hampshire Site Evaluation Committee to grant us full intervention status in the proceedings for the above-mentioned docket.

The Dixville Notch—Harvey Swell Location is made up of neighbors in Stewartstown and East Colebrook, all of whom have direct views of the overhead towers along parts or all of the 3.5 miles, beginning at the transition point where the 8 miles of buried line transitions to overhead, and ending at a point where the overhead line enters the Wagner Woodlot.

The negative impacts:

- The visual impact and decreased property values of the petitioning group with resulting repercussions of less tax money to the towns. i.e. decreased *view taxes*
It is hard to confirm that the taxed towers will make up for devaluation of property/loss of taxes to the towns.
- View Sheds disrupted- loss of natural beauty of the area
- Negative impact on normal potential development of land *The orderly development will be unduly disrupted—any new development will not occur.*
- Way of life threatened—the public interest negatively affected
- Natural habitats disrupted
- Negative impact on tourism
- The transition area, resulting in a substantial, permanent scar—up to a 200' x 300' fenced in area. **The transition area and excavation leading to it would mean the substantial destruction of historical natural resources, namely, the Bear Rock (the outcrop of cliffs and ledges between Holden Hill Road, Heath Road, and Bear Rock Road), which is the namesake for the eponymous road, historic school house, the nearby Bear Caves, and the immediate vicinity within Colebrook and Stewartstown. These natural and historic resources deserve much greater study than they have received to date.**

Please be reminded that the people of each town in the North Country have been very vocal, nearly unanimously against Northern Pass. The Board of Selectmen of Pittsburg, Clarksville and Stewartstown have stated that they are unwilling to lend any support to the Northern Pass project.

We firmly believe that the 200 million dollar Forward NH Fund should not be a factor in the SEC's decision making. It is a dangling carrot. Put that 200 million toward complete burial. We request full burial along routes 3 and 93, according to DOE alternatives 4a or 4b, both of which have been found feasible, with lower impact.

Please take note that of the forty-two attached signatures, six are directly abutting the proposed underground/overhead DC lines. All other signators have a direct view of the overhead lines.

Thank you for your consideration of our petition.

Respectfully Submitted,
E. Martin Kaufman
