Dear PUC members....

The Northern Pass Project is not a viable approach for NH as it currently is projected. If it is to be considered seriously, it must be buried, and hopefully, along the public right of way via RT 93.

I have never seen another project galvanize an entire region in complete opposition as this foreign entity encroachment. All segments in the North Country across political/social and economic positions stand solidly against this. Thirty three NC towns have said NO.

All the former claims and pronouncements of PSNH/Hydro Quebec/Eversource have been debunked over the past several years of this ill conceived project, in spite of the millions spent to influence decisions.

Your credibility and status as a viable public watchdog is at stake with your decisions. I implore you to do the prudent and correct thing for the citizens of New Hampshire. Deny any continuation of the Northern Pass.

Sincerely,

Kent Butterfield

Easton, NH 03580
